INTRODUCTION

What do these statistics cover?

The 'Businesses in Scotland' publication provides information on the number of enterprises (businesses) operating in Scotland. The main purpose of the publication is to provide an estimate of Scotland's business stock.

Within the publication the Scottish business stock is broken down by various dimensions including industry, business size, local authority area, urban/rural area and country of ownership. The publication includes **all** enterprises that **operate** in Scotland regardless of where the business is based.

The focus of the publication is on private sector enterprises, where the private sector is defined as including the following enterprise types:

- Companies (including Building Societies)
- Sole Proprietors
- Partnerships
- Public Corporations/Nationalised Bodies
- Non-profit making bodies and mutual associations

Data is also provided on enterprises' employment and turnover. However, please note that there are time lags associated with the employment and turnover variables.

What are the statistics used for?

Statistics from the 'Businesses in Scotland' publication are used to provide insight into the characteristics of Scotland's business stock, and how Scotland's business stock has changed over time. The data are used to inform decision making and performance monitoring – both inside and outside government. More information on uses can be found in the on-line [Businesses in Scotland Data Sources, Suitability and Uses Note](#).

What year do tables relate to?

The latest figures relate to March 2015 and were released on 3 November 2015.

The latest 2015 publication tables on the [Businesses in Scotland](#) website are consistent for the years 2010 to 2015. All industry sector data are based on the Standard Industrial Classification (SIC) 2007.

Older tables, available in the [Tables Archive](#), have not been updated to reflect the current methodology and are therefore not consistent with the latest tables for 2010 to 2015.

However, a high level time series for total (registered and unregistered) enterprises

and registered enterprises has been constructed for 2000 to 2015. This long time series has been produced on a consistent basis as far as possible.

The following data is available on the 'Businesses in Scotland' website:

Constructed Time Series back to 2000:

All enterprises (registered and unregistered)	2000 – 2015
Total registered enterprises	2000 – 2015

Latest detailed tables on a consistent methodological basis:

All enterprises (Tables A to E)	2010 – 2015
Registered enterprises by industry (Tables 1 to 11)	2010 – 2015

Archived Tables (on old methodology and SIC 2003 basis):

All enterprises (Tables A to E)	2000 – 2010
Registered enterprises by industry (Tables 1 to 8)	2000 – 2010

What's new?

Table B to E and Table 1 (2010 to 2015) now provide a more detailed breakdown of small employers (businesses with 1 to 49 employees).

Tables 9 to 10 (2014 – 2015) now provide a more detailed breakdown of the urban/rural classification.

The unregistered estimates for 2010 to 2014 have been revised to take account of the latest Annual Population Survey data (weighted to the 2011 population estimates). This has an impact on the total enterprise estimates, however the magnitude of these revisions are relatively small.

The registered estimates for 2014 have been revised to take account of revisions to the industry classification applied to a small number of individual businesses.

When will the figures be updated?

It is the aim to publish the Businesses in Scotland 2016 as soon as possible after the release of the Office for National Statistics' (ONS) UK Business Activity and the Department for Business, Innovation and Skills' (BIS) Business Population Estimates for the UK and Regions publications, which are due out in Autumn 2016.

Key Facts

Summary

- As at March 2015, there were an estimated 361,345 private sector enterprises operating in Scotland - the highest figure since the time series began (in 2000).
- Between March 2014 and March 2015, the estimated number of enterprises increased by 7.8% (26,090 enterprises).
 - The increase over the latest year is driven by a rise in the number of unregistered businesses (the smallest sole traders and partnerships that are not registered for VAT/PAYE) – unregistered businesses are up by 22,280 (+13.2%).
 - The number of VAT/PAYE registered businesses has increased also - up by 3,810 (+2.3%) from 166,525 in 2014 to 170,335 in 2015 – taking the number of registered businesses in Scotland to its highest level in the series.
 - As at March 2015, there were 359,050 Small and Medium-sized Enterprises (SMEs) operating in Scotland, providing an estimated 1.2 million jobs. SMEs accounted for 99.4% of all private sector enterprises, accounting for 55.6% of private sector employment and 39.4% of private sector turnover.

Scottish Economy – Gross Domestic Product (GDP) Trends - 1998 to 2015

[Scottish Gross Domestic Product \(GDP\)](#) in constant basic prices grew each year from 1998 reaching a peak in Q2 of 2008. Scotland then entered recession, which lasted 6 quarters, and returned to growth in Q1 of 2010. Further short periods of economic contraction occurred in Q4 2010 and Q1 2012. However, since late 2012 there has been sustained growth and the most recent quarterly GDP figures show that Scottish output expanded by 0.1% in Q2 2015, taking output 3.0% above the pre-recession peak.

Businesses in Scotland as at March 2015

As at March 2015, there were an estimated 361,345 private sector enterprises operating in Scotland. Almost all of these enterprises (98.3%) were small (0 to 49 employees); 3,870 (1.1%) were medium-sized (50 to 249 employees) and 2,295 (0.6%) were large (250 or more employees).

As at March 2015, there were 359,050 Small and Medium-sized Enterprises (SMEs) operating in Scotland, providing an estimated 1.2 million jobs. SMEs accounted for 99.4% of all private sector enterprises, accounting for 55.6% of private sector employment and 39.4% of private sector turnover.

Small (0 to 49 employees) enterprises alone accounted for 43.1% of private sector employment and 26.0% of private sector turnover as at March 2015 (see Chart 1).

The 2,295 large (250+ employees) enterprises operating in Scotland, as at March 2015, accounted for 44.4% of private sector employment and 60.6% of private sector turnover (see Chart 1).

Chart 1: Share of enterprises, employment and turnover by size of enterprise, 2015

As at March 2015, enterprises with no employees – that is sole proprietors/partnerships comprising only the owner-managers or companies comprising only the employee director – accounted for 70.3% of all private sector enterprises in Scotland, 13.5% of private sector employment and 4.6% of private sector turnover.

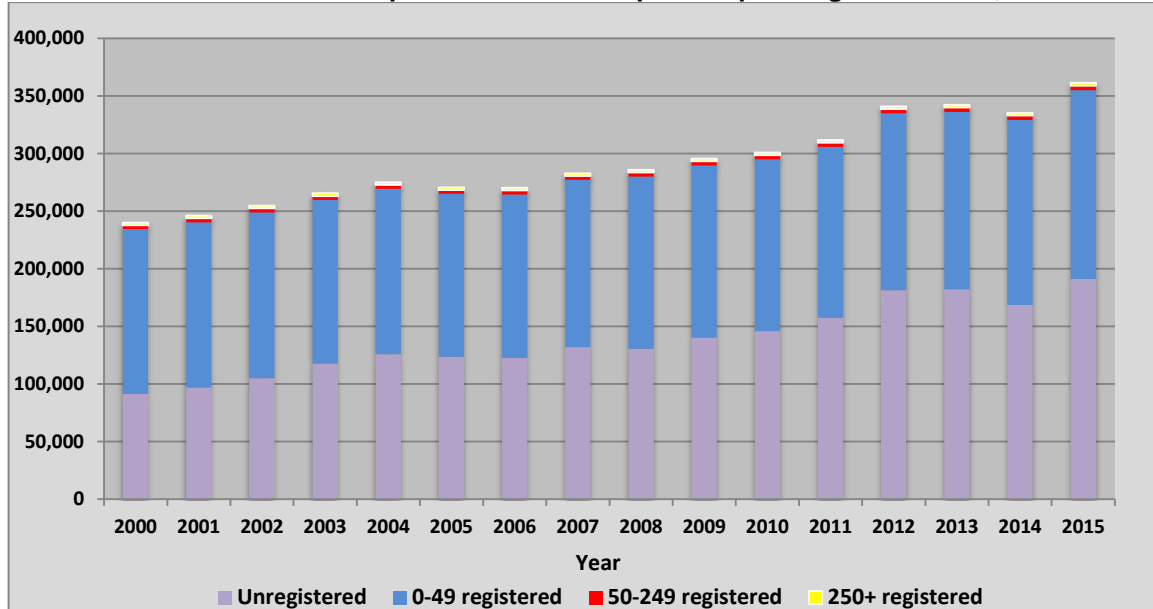

The total number of enterprises operating in Scotland comprises those that are registered for VAT and/or PAYE, and those that are not (so called unregistered enterprises). Unregistered enterprises are sole proprietorships and partnerships that are not large enough to be VAT registered (have an annual turnover below the VAT threshold - £81,000 as at March 2015) and are not PAYE registered (i.e. do not employ others). As at March 2015, unregistered enterprises represented 52.9% of all private sector enterprises in Scotland.

Changes in the Scottish business stock over time

As at March 2015, there were an estimated 361,345 private sector enterprises operating in Scotland - the highest figure since the time series began (in 2000).

Between 2000 and 2015, the total number of private sector enterprises has increased by an estimated 50.6% (+121,375 enterprises). As shown in Chart 2 below this increase has been driven by an increase in the smallest unregistered enterprises – the number of unregistered enterprises in Scotland has more than doubled since 2000 (up from 91,305 in 2000 to 191,010 in 2015). The number of registered enterprises increased between 2000 and 2015 also, from 148,665 to 170,335 (a 14.6% increase) - driven by an increase in the number of small (0 to 49 employees) registered enterprises.

Chart 2: Estimated number of private sector enterprises operating in Scotland, 2000 - 2015

Between 2014 and 2015, the total number of private sector businesses in Scotland grew by 26,090 businesses (+7.8%). This follows a decrease in the previous annual period.

The increase over the latest year was driven by a rise in the number of unregistered businesses. The number of unregistered businesses increased from 168,730 in 2014 to 191,010 in 2015 – an increase of 22,280 businesses (+13.2%). Following a dip between 2013 and 2014, the increase between 2014 and 2015 takes the unregistered business count to the highest level in the series.

The number of registered businesses (those registered for VAT and/or PAYE) increased also - from 166,525 businesses in 2014 to 170,335 business in 2015, a rise of 3,810 registered businesses (+2.3%). With four years of sustained growth, this takes the number of registered businesses to a new series high.

This rise in registered enterprises over the latest year was driven by an increase in the number of small (0 to 49 employees) enterprises – up 2.3% (+3,720 enterprises) between 2014 and 2015. Looking within the group of small registered enterprises, the number of registered enterprises without employees

grew by 3.1% from 61,135 in 2014 to 63,035 in 2015 and the number of registered small employers (1-49 employees) increased by 1.8% from 99,315 in 2014 to 101,135 in 2015.

The number of medium-sized (50 to 249 employees) enterprises increased, between 2014 and 2015, to 3,870 enterprises – representing an increase of 90 enterprises. There has been an increase of 520 medium-sized enterprises since 2000 and the 2015 estimate is now higher than at any time since 2000.

The number of large (250 or more employees) enterprises was unchanged over the latest year, remaining at 2,295 enterprises. The 2015 estimate is still lower than the large enterprise peak level of 2,345 enterprises experienced in 2001.

Since the recession, there has been a slight shift in employment from large businesses (250+ employees) to small businesses – and this in turn is reflected in the record number of businesses. In 2015, large businesses accounted for 44.4% of private sector employment, compared to 47.1% in 2010.

The number of employers increased, between 2014 and 2015, to 107,300 – representing an increase of 1,910 employers (+1.8%). There has been an increase of 13,485 employers (+14.4%) since 2000 and the 2015 estimate is now higher than at any time since 2000.

Enterprises by legal status

As at March 2015, private sector enterprises in Scotland, as per the ‘Businesses in Scotland’ definition, fell into the following categories:

Sole Proprietors/Partnerships ¹	(69.5% of enterprises, 21.7% of employment)
Companies ²	(28.4% of enterprises, 70.4% of employment)
Non-Profit Making Bodies	(2.0% of enterprises, 7.9% of employment)

Although Sole Proprietors/Partnerships continue to make up the majority of private sector enterprises; there has been sustained high growth in the number of Companies over the last five years. The number of Companies has increased from 77,060 in 2010 to 102,745 in 2015 – an increase of 25,685 (+33.3%).

Note that the number of public corporations in Scotland has decreased from 60 businesses in 2014 to 35 businesses in 2015 – this is largely as a result of the reclassification of Lloyds Banking Group plc. On 30th April 2014, the Office for National Statistics (ONS) announced the reclassification of Lloyds Banking Group plc. (and subsidiaries) as a former Public Corporation into the private

¹ Note that the Sole Proprietorships/Partnerships legal status group includes unregistered enterprises.

² Includes a small number of public corporations.

sector. More information on this can be found in [Classification of Lloyds Banking Group and Subsidiaries](#)

Enterprises by broad industry sector

As at March 2015, the two largest industry sectors were 'Professional, Scientific & Technical Activities' (53,450 enterprises) and Construction (48,135 enterprises). Together, these two sectors make up 28.1% of all private sector enterprises in Scotland.

Between 2014 and 2015, the number of enterprises in the 'Professional, Scientific & Technical Activities' sector increased by 1,330 enterprises (+2.6%). The number of enterprises in the Construction sector increased by 3,445 enterprises (+7.7%) between 2014 and 2015 – this follows a decline in the previous two annual periods.

The number of enterprises within the broad industry groups in March 2014 and March 2015 can be seen in Chart 3:

Chart 3: Number of private sector enterprises, Scotland, by industry sector, 2014 - 2015

Ownership (registered enterprises only)

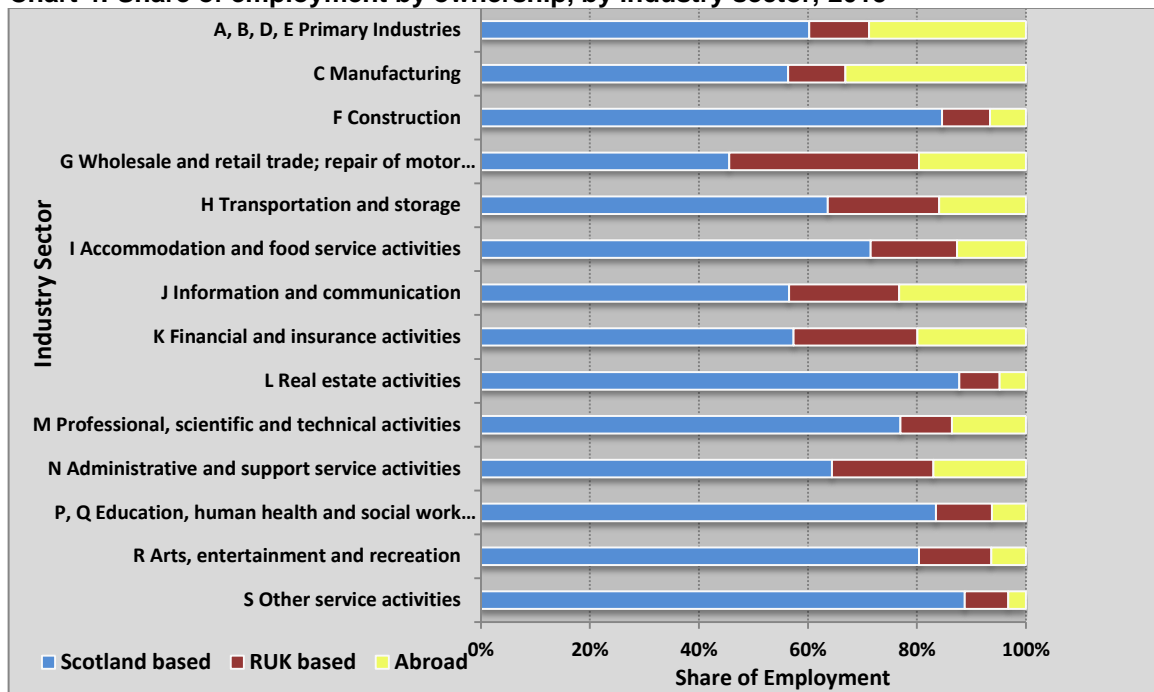

Information on the ownership of enterprises operating in Scotland is only available for enterprises registered for VAT and/or PAYE.

Within the 'Businesses in Scotland' publication, enterprises can be either 'UK owned - Scotland based', 'UK owned - Rest of the UK (RUK) based' or Abroad owned.

As at March 2015, registered private sector enterprises with ultimate base outside Scotland (RUK based or Abroad owned) represented 3.0% of enterprises, accounting for 34.1% of employment and 54.1% of turnover. Within large firms (250+ employees) they represented 81.7% of enterprises, accounting for 62.3% of employment and 74.9% of turnover.

As at March 2015, 34.1% of private sector employment was in enterprises with ultimate base outside Scotland. Breaking this down, 17.5% of Scottish private sector employment was in enterprises with ultimate base in the RUK with the remaining 16.6% of employment in enterprises with ultimate ownership Abroad (outside the UK). The share of employment in Abroad owned enterprises varies by industry sector. For example, as at March 2015, 33.1% of Scottish manufacturing employment was in Abroad-owned enterprises, compared to 6.6% of Scottish construction employment (see Chart 4).

Chart 4: Share of employment by ownership, by industry sector, 2015

Local Authority Area breakdown (registered enterprises only)

Between 2014 and 2015, nearly all local authority areas saw an increase in the number of registered enterprises. Only two local authority areas experienced a falling registered business count between 2014 and 2015 – Argyll & Bute (down 25 businesses) and The Scottish Borders (down 5 businesses). The City of Edinburgh local authority area experienced the greatest increase with a rise of 600 enterprises between 2014 and 2015 – followed by Glasgow City local authority area with an increase of 515 enterprises.

SMEs account for a larger share of private sector employment in the more rural local authority areas, compared to the more urban local authority areas. As at March 2015, SMEs accounted for 87.2% of private sector employment in the Orkney Islands local authority area compared to 37.5% in the Glasgow City local authority area.

Urban/Rural Area breakdown (registered enterprises only)

SMEs account for a larger share of private sector employment in rural areas, compared to urban areas. As at March 2015, SMEs accounted for 79.9% of private sector employment in remote rural areas compared to 70.7% in accessible rural areas and 46.3% in the rest of Scotland.

Between March 2014 and March 2015, private sector employment increased by 2.8% (2,900 jobs) in remote rural areas, by 1.3% (2,470 jobs) in accessible rural areas and by 1.5% (23,910 jobs) in the rest of Scotland.

In remote rural areas, the 'Agriculture, Forestry & Fishing' industrial sector had the largest share of private sector employment (18.3%), in accessible rural areas the Manufacturing sector was largest (14.7%) and in the rest of Scotland the 'Wholesale, Retail and Repair' sector was largest (20.4%).

Although, the 'Agriculture, Forestry & Fishing' sector accounts for the largest share of private sector employment in remote rural areas, the majority of employment growth over the last five years is attributable to jobs growth in two other sectors: 'Accommodation and food service activities' (up 2,650 jobs since 2010) and 'Professional, scientific and technical activities' (up 1,490 jobs since 2010).

Changes to Scotland's registered business stock rate

The registered business stock rate, the total stock of private sector registered enterprises per 10,000 resident adults in Scotland, is the basis of the Scottish Government National Indicator: "Increase the number of businesses".

Between 2014 and 2015, the number of registered enterprises increased by 2.3%. This has increased the business stock rate from 375 to 384 over the latest year.

Table 1 – Registered private sector businesses per 10,000 adults, Scotland, 2006-2015

Year	Registered Enterprises	Annual Change	Resident Adult Population (aged 16+)	Business Stock per 10,000 adults
2006	147,745	-	4,206,900	351
2007	151,145	2.3%	4,246,400	356
2008	155,285	2.7%	4,281,300	363

2009	155,320	0.0%	4,311,700	360
2010	155,045	-0.2%	4,344,400	357
2011	154,365	-0.4%	4,383,800	352
2012	159,580	3.4%	4,398,900	363
2013	160,050	0.3%	4,416,000	362
2014	166,525	4.0%	4,436,600	375
2015	170,335	2.3%	Not Yet Available	384*

Sources – Businesses in Scotland 2015, NRS Mid-year population estimates

*The provisional business stock rates for 2015 are based on the 2014 Mid-year population estimates.

The 2015 estimate for the indicator is provisional and is based on the currently available mid-year population estimates for 2014. This will be updated in April 2016 when the 2015 mid-year population estimates, needed to form the 'per 10,000 adults' rate, will become available. Further information can be found at:

<http://www.gov.scot/About/Performance/scotPerforms/indicator/businesses>

Comparisons with the UK Business Stock

Business stock estimates for the UK as a whole are published by the Department for Business Innovation and Skills (DBIS). The DBIS [Business Population Estimates 2015](#) show that for the UK as a whole the total number of businesses (registered and unregistered) increased by 2.8% between the start of 2014 and start of 2015. This compares to an increase of 7.8% for Scotland between March 2014 and March 2015 (as per the Businesses in Scotland 2015 results).

Over the latest annual period, Scotland's business stock has increased at a higher rate compared to the UK as a whole. However, Scotland's business stock dipped between 2013 and 2014; this was not the case for the UK as a whole. And therefore, it is helpful to contrast change over a longer period. Since 2007, Scotland's total business stock has risen at a similar rate to that for the UK. Between March 2007 and March 2015, the total number of businesses in Scotland increased by 27.7%, whilst for the UK the business stock increased by 26.2% between the start of 2007 and the start of 2015.

Despite similar growth rates over recent years, Scotland still has a different business stock make-up compared to the UK as a whole. Table 2 below shows that, in 2015, Scotland had a business stock rate of 798 enterprises per 10,000 adults, compared to 1,028 enterprises per 10,000 adults in the UK as a whole.

Scotland has a lower rate of small businesses (particularly those that do not employ others) but a higher rate of medium and large businesses compared to the UK as a whole – see Table 2 below.

Large businesses account for a higher share of Scotland's private sector employment (44%), compared to the UK as a whole (40%).

Table 2 – Private sector businesses (registered and unregistered) per 10,000 adults, 2015

Country	Resident Adults Mid-year 2014	Private Sector Enterprises	Private Sector per 10,000 adults				
			Enterprise Size (number of employees)				All Sizes
			None	Small (1-49)	Medium (50-249)	Large (250+)	
UK	52,443,290	5,389,450	778	243	6	1	1,028
Scotland	4,436,600	354,030	573	213	8	5	798

Source: UK - Business Population Estimates 2015, DBIS. Scotland – Businesses in Scotland 2015. Note that the Scotland data, in the table above, is restricted to enterprises that are companies, sole proprietorships, partnerships or public corporations to ensure as much consistency as possible between the UK and Scotland results.

SCOTLAND TABLES

Time Series 2000 to 2015

The latest 2015 publication tables are consistent for the years 2010 to 2015.

Older tables, available in the [Tables Archive](#), have not been updated to reflect the latest methodological changes and are therefore not consistent with the latest tables for 2010 to 2015.

However, a high level time series for all (registered and unregistered) enterprises and registered enterprises has been constructed for 2000 to 2015. This long time series has been produced on a consistent basis as far as possible.

Web Link	Time Trend	Content

Table 11	2010-2015	Number of registered enterprises and their total Scottish employment and turnover by sizeband and sector

All the tables in 'Businesses in Scotland 2015' publication are on a SIC 2007 basis. Please go to the [Tables Archive](#) on the [Businesses in Scotland](#) website for data on a SIC 2003 basis for 2000 to 2010. However, please note that the Archived Tables have not been updated with the latest methodology (to estimate the number of unregistered enterprises) or had the registered enterprise count revised upwards to take account of the extra registered enterprises added to the IDBR in 2012 as a result of improvements made to HMRC computer systems.

METHODOLOGY

1. Introduction

The Businesses in Scotland Publication (formerly Scottish Corporate Sector Statistics) provides information about the **number of enterprises operating in Scotland**, broken down by various groupings including industry, business size, local authority area, urban/rural area and country of ownership. The publication includes all enterprises that operate in Scotland regardless of where the enterprise is based. This allows a more comprehensive understanding of the Scottish business environment than is possible via other business population estimates which only allocate enterprises to Scotland if they have their UK base in Scotland.

2. Use

Statistics from the 'Businesses in Scotland' publication are used to provide insight into the characteristics of Scotland's business stock, and how Scotland's business stock has changed over time. The data are used to inform decision making and performance monitoring – both inside and outside government. More information on the uses can be found in the on-line [Businesses in Scotland Data Sources, Suitability and Uses Note](#).

3. Overview of Methodology and Sources

The estimates have been constructed using data from the [Inter-Departmental Business Register \(IDBR\)](#), the Annual Population Survey (annual version of the [Labour Force Survey \(LFS\)](#)), the [Family Resources Survey \(FRS\)](#) and Self Assessment (SA) data. The IDBR provides the number of enterprises registered for VAT and/or PAYE in Scotland. However there is a substantial number of very small enterprises which have no employees and are therefore not included on the IDBR. A modelling procedure that combines data from the IDBR with estimates derived from the LFS, FRS and SA data is used to estimate the number of unregistered enterprises. The principles of the model were developed by economic consultants working with the Department of Trade and Industry and Eurostat.

4. Key Terms

Business units held on the IDBR can be grouped into 3 types:

Administrative Units:

- VAT trader and PAYE employer information supplemented with incorporated business data from Companies House.

Statistical Units:

- A group of legal units under common ownership is called an Enterprise Group.

- An **Enterprise** can be defined as the smallest combination of legal units (generally based on VAT and/or PAYE records) that is an organisational unit producing goods or services, which benefits from a certain degree of autonomy in decision-making, especially for the allocation of its current resources. An enterprise carries out one or more activities at one or more locations. An enterprise may be a sole legal unit.
- A **local unit (or business site)** is an enterprise or part thereof (e.g. a workshop, factory, warehouse, office, mine or depot) situated in a geographically identified place.

Observation Units:

- Reporting Units hold the mailing address to which the survey questionnaires are sent. The questionnaire can cover the enterprise as a whole, or parts of the enterprise identified by lists of local units.

The Businesses in Scotland publication is based on enterprise counts, with the exception of Table 8 which is based on business sites (or local units).

5. About the Estimates

The purpose of the publication is to provide information about the number of enterprises but the estimates also include information about enterprises' employment and turnover. The function of these data is to act as 'auxiliary variables' that can be used to (i) classify enterprises by employee/turnover size band and (ii) calculate shares of employment and turnover across industrial sectors, local areas, business sizes etc. The nature of the underlying processes used to update these variables on

the IDBR means that direct comparisons made using the absolute values are less reliable. (See Section 6.4 to 6.6)

Enterprises are counted only once in Scotland-level estimates (Tables 1, 2 and 3) or once each in each of the local authority areas or rural/urban areas they operate in (Tables 5-7, Tables 9-11). Estimates of the number of business sites in each local authority area are provided in Table 8. (See Section 12)

The estimates do not include turnover information for financial and insurance enterprises as it is not available on a comparable basis.

The figures for unregistered enterprises are estimated primarily using data from a sample survey (LFS), which is subject to sampling error – this should be considered when making year on year comparisons between the number of unregistered enterprises (these make up the majority of the smallest size band in Tables A-E).

Time Series

The 2011 and 2012 publications introduced several methodological changes:

- All data are now published using the Standard Industrial Classification (SIC) 2007 only.
- In 2011 a number of changes were made to the methodology used to estimate the number of unregistered enterprises. See the [Methodology section](#) for more details.
- In 2012 improvements to HMRC computer systems led to previously excluded businesses being added to the IDBR. For Scotland, this resulted in 2,340 extra enterprises being added to the IDBR in 2012; these extra enterprises should have been included in previous years also.

The latest 2015 publication tables on the [Businesses in Scotland](#) website are consistent for the years 2010 to 2015 i.e. all 3 methodological changes above have been applied back to 2010.

Older tables, available in the [Tables Archive](#), have not been updated to reflect the 3 methodological changes and are therefore not consistent with the latest tables for 2010 to 2015.

However, a high level time series for total (registered and unregistered) enterprises and registered enterprises has been constructed for 2000 to 2015. This long time series has been produced on a consistent basis as far as possible – as follows:

- The registered time series has been adjusted upwards to take account of the 2,340 extra enterprises added to the IDBR in 2012. Note that this back revision is based on enterprises that were in operation in 2012, by using the

birth dates of the enterprises they can be added into the stock estimates for back years. See Table 1 below.

- The unregistered time series has been adjusted upwards to take account of the improved unregistered enterprises estimation methodology. See table below.

Constructed Back Series

Year	Original			Constructed Time Series		
	Registered	Unregistered	Total	Registered (adjusted for HMRC additions)	Unregistered (uprated based on relationship between estimates under old and new methodology in 2010)	Total
2000	148,635	89,195	237,830	148,665	91,310	239,970
2001	149,325	94,580	243,905	149,370	96,820	246,195
2002	149,560	102,655	252,215	149,615	105,090	254,700
2003	147,490	115,135	262,625	147,590	117,865	265,455
2004	149,025	122,980	272,005	149,180	125,895	275,075
2005	146,890	120,685	267,575	147,065	123,545	270,610
2006	147,490	119,670	267,160	147,745	122,505	270,250
2007	150,745	128,745	279,490	151,145	131,795	282,940
2008	154,635	127,490	282,125	155,285	130,510	285,800
2009	154,370	137,010	291,380	155,320	140,255	295,575

Note that the unregistered estimates for 2010 to 2014 have been revised to take account of the latest Annual Population Survey data (reweighted to the 2011 population estimates). This has an impact on the total enterprise estimates, however the magnitude of these revisions are relatively small and so the 2000 to 2009 time series has not been adjusted to reflect this. (See Section 15.1.1)

6. Registered Enterprises

6.1 Source

The Inter-Departmental Business Register (IDBR) is maintained by the Office for National Statistics (ONS) and is a database of all registered enterprises operating in

the UK i.e. enterprises that are registered for VAT and/or PAYE. It covers 99% of economic activity in the UK. Those excluded are small sole traders or partnerships with no employees and an annual turnover of less than the VAT threshold.

When an enterprise registers/de-registers for VAT/PAYE with HMRC, this information is fed through to the IDBR. The reporting of de-registrations, however, can be subject to a number of time delays. For example when an enterprise closes there may be a delay before HMRC are informed. Closure of the VAT record may then be delayed until all liabilities are settled. There may also be lags in recording PAYE data.

6.2 Time Period Covered

The estimate of registered enterprises is based on a snapshot of the IDBR taken in March of each year (prior to 2005 the November snapshot was used). A Scottish extract provides a count of the IDBR enterprises that were “live” at the snapshot date. However, due to the time lags that often occur in recording de-registrations, an enterprise which had ceased trading by March but had outstanding business with HMRC may still be included on the IDBR at the time the extract is taken. Whilst this introduces some error into the data, this lag impacts on each year so the extracts are consistent over time.

6.3 Scope

All tables in the ‘Businesses in Scotland’ Publication (excluding Table A and Table 4) focus on the private sector - that is companies, sole proprietors, partnerships, public corporations/nationalised bodies and not for profit organisations - and exclude central and local government. This differs from the ONS publication “UK Business: Activity, Size and Location” which includes the public sector. Further information about other sources of business information is available in the information note [UK Business Data Sources](#).

6.4 Employment

Prior to 2009, the employment information held on the IDBR was mainly drawn from the Business Register Survey and the employment part of the Annual Business Inquiry (ABI/1). The use of these sources caused a considerable time lag in the employment data, so that in each March extract, the majority of employment information was two years out of date i.e. employment estimates for 2009 were mainly based on data from 2007. For some enterprises, however, the employment data was more lagged than this.

The Business Register and Employment Survey (BRES) replaced and integrated the BRS and ABI/1 in 2009. For businesses that are surveyed by BRES, the regional and local estimates of employment are more accurate because, rather than producing data by an apportionment model, they are obtained directly from data reported at site level. Employment data is now updated on the IDBR on a monthly

basis rather than annually, as updates are made as completed surveys are returned. This means that, at any point in time, employment data on the IDBR will be as accurate and up to date as possible, based on the survey returns that have been received at that time.

However, it also means that year on year comparisons made using point in time extracts of the IDBR will be less accurate as businesses are unlikely to return their forms at precisely the same time each year.

The most up to date employment information in 'Businesses in Scotland 2015' tends to be based on data from BRES 2014 (which asks businesses for their level of employment as at September 2014). For some enterprises the employment data will be more lagged than this.

It is important for users to be aware that time lags exist in the employment estimates in every year. However, the difference between the March 2009 and March 2010 extracts were particularly influenced by the change in BRES reporting.

Because BRES (and previously BRS/ABI1) is based on a sample of enterprises, estimates from previous returns and other ONS surveys are also used to update employment on the IDBR. For the smallest enterprises, either PAYE jobs or employment imputed from VAT turnover is used.

Note that the employment estimates refer to the number of employee jobs rather than the number of individual employees. A person who has more than one job will be counted once in each enterprise they work for. Furthermore, no distinction is made between full-time and part-time employees – both count as one employee.

6.5 Turnover

On the IDBR, turnover for the majority of registered enterprises is based on VAT returns for a 12 month period. For 2015 these relate to a 12 month period ending in December 2013, or January/February 2014, depending on the reporting pattern of the trader. For other records, in particular members of VAT group registrations, turnover may relate to an earlier period or survey data. For traders who have registered more recently, turnover represents the estimates made by traders at the time of registration. The turnover figures on the IDBR generally exclude VAT but include other taxes, such as the revenue duties on alcoholic drinks and tobacco.

6.6 Making Comparisons over Time

The main purpose of the 'Businesses in Scotland' publication is to provide information about the number of enterprises which were operating in Scotland at the time of the IDBR snapshot in March but the estimates also include information about enterprises' employment and turnover. Sections 6.4 and 6.5 explained that these variables are updated on the IDBR via a number of sources and at different times. This makes it difficult to obtain accurate employment/turnover estimates on the IDBR

because the figures for each enterprise may not relate to the same point in time. This should be considered if employment and turnover estimates are compared over time. The employment/turnover data should really be considered to be 'auxiliary variables' that can be used to compare shares across industrial sectors or to determine how shares have changed over a period of several years.¹

However, comparisons of enterprise counts can be made robustly. As the IDBR is a live register that is continually updated each time an enterprise registers/de-registers for VAT/PAYE, it can be taken as a reliable estimate of the number of enterprises in operation at any point in time. Since 'Businesses in Scotland' data is always based on a March extract of the IDBR, comparisons of enterprise counts from year to year can be considered reliable.

6.7 Exclusions

Enterprises with no UK activity or dummy enterprises created to help with clerical procedures are excluded. Enterprises which have zero employment and zero turnover are also excluded as they are holding companies whose activity is recorded elsewhere or are enterprises not contributing to the economy at the time of the estimates.

There were a few instances where several registrations for a single company (usually VAT registrations) occurred at the same address. This may be a result of a legal loophole created as a result of changes in legislation. The Office for National Statistics now exclude these from their publications as the figures would overstate the actual number of businesses in existence and their associated employment in local area tables. Please note the estimates for 2000 and 2001 have not been amended to reflect these changes.

6.8 Reclassifications

2015 Reclassifications

The number of public corporations in Scotland has decreased from 60 businesses in 2014 to 35 businesses in 2015 (see Table A of the publication) – this is largely as a result of the reclassification of Lloyds Banking Group plc. On 30th April 2014, the Office for National Statistics (ONS) announced the reclassification of Lloyds Banking Group plc. (and subsidiaries) as a former Public Corporation into the private sector. More information on this can be found in [Classification of Lloyds Banking Group and Subsidiaries](#).

On 17th December 2013, the Office for National Statistics (ONS) announced that from 1st September 2014, Network Rail would be reclassified as a Central Government body in the public sector. This change can be most clearly seen in Table 4 of the Businesses in Scotland publication, where public sector employment

¹ More detailed comparisons can be obtained via [BRES](#) (for employee jobs) or [Scottish Annual Business Statistics](#) (for turnover).

in the 'H Transportation and storage' sector increased by 2,850 (+87%) between 2014 and 2015. More information on this can be found in [Classification of Network Rail](#).

Historic Reclassifications

Colleges of Further Education were re-classified by the Office for National Statistics to the public sector in October 2010 for the purposes of National Accounts. The change transferred 35 enterprises from the business sector to the public sector from the March 2011 results onwards. This reclassification has not been applied back to previous years' estimates.

Primary Care NHS Trusts and all remaining NHS Trusts were re-classified by the Office for National Statistics to the public sector in 2001 and 2003 respectively. This was done to bring the 2003 Standard Industrial Classification in line with international guidelines for National Accounts. The change transferred 54,200 and 95,530 jobs from the business sector to the public sector in 2001 and 2003. This has led to a discontinuity between tables as tables previously included this employment.

7. Unregistered Enterprises

A large number of very small firms are excluded from the IDBR because they are small sole traders/partnerships with no employees and an annual turnover of less than the VAT threshold. This section describes the method used to estimate the number of unregistered enterprises in Scotland.

7.1 Estimation

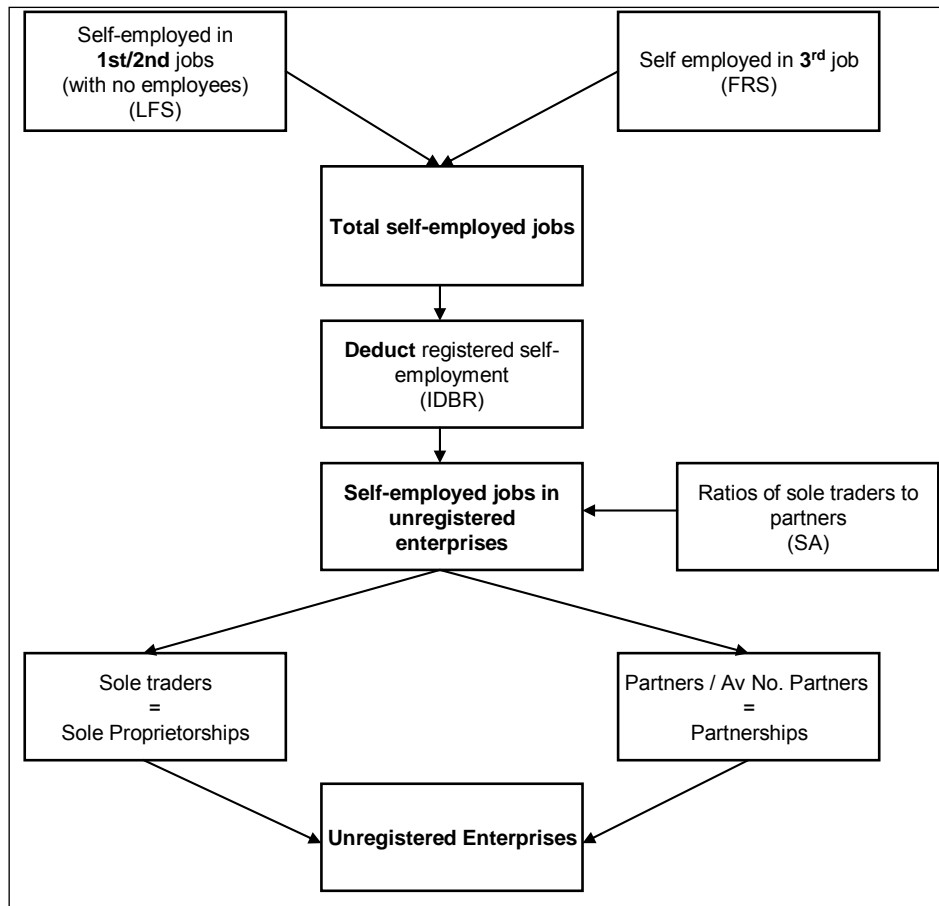

The Labour Force Survey (LFS) provides data on the number of people who are self-employed in their first or second jobs (with no employees). A new methodology has been applied to the estimates from 2010 onwards; the new methodology enables a better estimate of the self-employed to be obtained by reclassifying people who have misclassified their employment status. More information on this improvement can be found in the ['Methodology Changes' information note](#).

The LFS figure for second jobs is augmented by data from the Family Resources Survey (FRS) on people who are self-employed in a third job, to obtain an estimate of the total number of self-employed jobs (with no employees). This estimate is compared to the level of self-employment that is already registered on the IDBR in enterprises (sole traders/partnerships) with no employees. As many self-employed people are not required to pay VAT or register for PAYE, the figure from the LFS/FRS is generally higher.

The difference between these two figures (self-employed jobs in unregistered enterprises) is the starting point for estimating the number of additional sole traders and partners with no employees. The ratio between sole traders and partners is different in each industry and is obtained via HMRC Self Assessment (SA) data.

Previously the Survey of Personal Incomes (SPI) was used for this purpose but delays with updated data and more stringent disclosure control processes meant that it was necessary to use a different source. Please see the [‘Methodology Changes’ information note](#) for more information about the effects of using SA data.

Diagram 1: Estimating Unregistered Enterprises

The ratios are used to derive the number of unregistered sole traders and partners in each industry and hence the number of sole proprietorships and partnerships.

Note that each of the sample surveys above are subject to sampling error. For example a yearly estimate of 300,000 taken from the Annual Population Survey (annual version of the Labour Force Survey (LFS)) has a 95% confidence interval of +/- 12,000. This sampling error should be considered when making year on year comparisons between the number of unregistered enterprises (the smallest size band in Tables A-E).

7.2 Time Period Covered

The estimate of unregistered enterprises is driven by the self employment estimates from the Labour Force Survey. The LFS data that is used covers the period April to March, i.e. the estimate of unregistered enterprises for 2015 is derived from annual LFS data covering April 2014 to March 2015.

The FRS data used to estimate the number of people self-employed in a third job relative to those who are self-employed in a second job is based on a three year rolling average percentage. The 2015 estimates are based on FRS data from 2011/12, 2012/13 and 2013/14.

Self Assessment data as at 2013/14 were used to obtain the ratio of sole traders to partners for the 2015 estimates.

7.3 Turnover

Turnover in unregistered businesses will generally be lower than that of registered businesses of the same size, as turnover in the former would usually be below the VAT threshold. Turnover for the unregistered enterprises is imputed from turnover per head of registered sole traders and partners with zero employees in each industry division and then scaled down by a factor of a half. For a few 2-digit industry divisions, this still leaves average annual turnover per unregistered business above the VAT threshold. In these cases, the unregistered turnover is reduced to the VAT threshold for that year.

8. Industrial Classification

The industrial sectors presented in the tables are defined by the UK Standard Industrial Classification (SIC). This is used to classify business establishments and other statistical units by the type of economic activity in which they are engaged.

8.1 Assigning Enterprises to Industrial Sectors

Enterprises may have business sites operating in several industrial sectors. The enterprise as a whole is assigned to one sector based on the sector and then division in which the majority of its Scottish employment is found. A change in the balance of employment across sites can therefore lead to some enterprises changing their sector between years.

Table 8 provides sector classification at business site level rather than enterprise level.

The classification for this publication follows the standard coding scheme. Some titles have been shortened to make them more readable. The tables generally exclude central and local government (as defined by the legal status of the enterprise). The small number of enterprises that provide support services to public administration are, for these tables, included within the sector 'Other community social and personal services'. Extra territorial organisations and private households with employees are excluded.

8.2 Revision of Standard Industrial Classification

In January 2008, the Standard Industrial Classification underwent a major revision to enable it to more accurately reflect the structure of the modern economy and SIC

2003 was replaced by SIC 2007. The revision was motivated by the need to adapt the classification to changes in the world economy. The revised classification reflects the growing importance of service activities in economies over the last fifteen years, mainly due to the developments in information and communications technologies.

The Businesses in Scotland 2015 tables provide data on registered enterprises for 2010 to 2015 on a SIC 2007 basis. Tables for unregistered enterprises (and hence total enterprises) are available on a SIC 2007 basis for 2010 to 2015. Time series data on total (unregistered and registered) and registered enterprises has also been made available from 2000 to 2015. Data on the old SIC 2003 basis is still available on the Scottish Government website but note that archived tables have not been updated with the latest methodology.

9. VAT Thresholds

Operative Dates	VAT Registration Threshold
01 Apr 1999 – 31 Mar 2000	£51,000
01 Apr 2000 – 31 Mar 2001	£52,000
01 Apr 2001 – 24 Apr 2002	£54,000
25 Apr 2002 – 09 Apr 2003	£55,000
10 Apr 2003 – 31 Mar 2004	£56,000
01 Apr 2004 – 31 Mar 2005	£58,000
01 Apr 2005 – 31 Mar 2006	£60,000
01 Apr 2006 – 31 Mar 2007	£61,000
01 Apr 2007 – 31 Mar 2008	£64,000
01 Apr 2008 – 30 Apr 2009	£67,000
01 May 2009 – 31 Mar 2010	£68,000
01 Apr 2010 – 31 Mar 2011	£70,000
01 Apr 2011 – 31 Mar 2012	£73,000
01 Apr 2012 – 31 Mar 2013	£77,000
01 Apr 2013 – 31 Mar 2014	£79,000
01 Apr 2014 – 31 Mar 2015	£81,000
01 Apr 2015 -	£82,000

Further details on VAT thresholds can be found via the following link – [HM Revenue & Customs](#).

10. Size Bands

In the tables (with the exception of Table 8), enterprises are classified by employee size bands on the basis of their total UK employees. The rationale behind this approach is that the size of the overall enterprise determines its behaviour as an economic agent. An enterprise with a large number of employees in the UK as a whole is likely to behave like a large enterprise, regardless of its level of Scottish employment. An information note about the effects of using size bands based on UK rather than Scottish employees is available at:

<http://www.gov.scot/Topics/Statistics/Browse/Business/Corporate/sizebands>

Table 8 contains data on the number of business sites and is classified by the total number of employees at each site.

Enterprises with only one employee (who is also the employer) are treated as a self-employed person working in a firm with zero employees unless the enterprise is part of an enterprise group. As these companies provide no employment for others it is more consistent to classify them as enterprises with no employees.

11. Public Sector

Public sector enterprises are involved in more varied activities than the majority of those in the private sector, so Table 4 accounts for this by counting each enterprise once in each sector it has activity in. This helps to provide a more realistic impression of public sector activity in each industry. However, in order to provide accurate figures at Scotland level, each enterprise is counted only once in the total, therefore the table components do not equal the overall total.

As discussed in Section 6.8, Network Rail has been reclassified from the private sector to the public sector. This change can be most clearly seen in Table 4 of the Businesses in Scotland publication, where public sector employment in the 'H Transportation and storage' sector increased significantly between 2014 and 2015.

As discussed in Section 6.8, Colleges of Further Education were reclassified to the public sector in October 2010, hence Table 4 contains an increase in the number of enterprises in between 2010 and 2011.

Public sector employee jobs estimates at the local authority area level are available via the ONS publication [Business Register Employment Survey](#).

12. Geographical Analyses

The geographical analyses use a postcode index file from the Office for National Statistics. Unregistered enterprises are not included in the geographical analyses.

Tables 5-7: These tables split the data by local authority area. They include each enterprise once in each local authority it operates in, irrespective of how many business sites it has in each area. As in Table 4, each enterprise is only counted once in the total for Scotland, hence cells in the enterprise column of the tables do not sum to the overall total due to double counting.

Note that only enterprises are double-counted in these tables – enterprises' employment and turnover, where provided, are assigned to the local authority areas they operate in. However, the sum of the turnover over the local authority areas is slightly lower than the Scotland

total turnover since turnover for sites in Section K (financial and insurance activities) is not available.

Table 8: Table 8 presents data on individual business sites within each local authority. This is a straightforward count of the number of sites located in each local authority. Note that in this table the employee size bands are based on the number of employees at each site.

Tables 9-11: These tables split the data by urban/rural area. They include each enterprise once in each area it operates in, irrespective of how many business sites it has in each area. As in Tables 5-7, each enterprise is only counted once in the total for Scotland, hence cells in the enterprise column of the tables do not sum to the overall total due to double counting.

Note that only enterprises are double-counted in these tables – enterprises' employment and turnover, where provided, are assigned to the urban/rural areas they operate in. However, the sum of the turnover over the urban/rural areas is slightly lower the Scotland total turnover since turnover for sites in Section K (financial and insurance activities) is not available.

Data on the total number of business sites at intermediate-zone level are available on [Scottish Neighbourhood Statistics \(SNS\)](#) broken down by broad industrial sector – the latest data for 2015 will be made available on SNS in December 2015.

13. Business Ownership

Within Businesses in Scotland, business ownership is defined as:

- UK (Scotland based)
- UK (Rest of the UK (RUK) based)
- Abroad

Country of ownership is either UK or Abroad (outside the UK). Business country of ownership is determined by the nationality of the ultimate parent of the business (i.e. the institutional unit, proceeding up a business' chain of control, which is not controlled by another institutional unit). Where control of the business is shared, country of ownership is determined by the country of residence of the majority ultimate owner. Enterprise groups with foreign ownership are identified using data provided by Dun & Bradstreet. All businesses that do not belong to an enterprise group, and are therefore not under the control of another institutional unit, are classified as UK-owned.

Once it is determined that an enterprise is UK owned, the next step is to classify businesses into whether they are Scotland registered or registered in the Rest of the UK (RUK). Enterprises, and their associated local units, are classified as

Scotland registered if the enterprise's VAT/PAYE registered office address is in Scotland. Enterprises, and their associated local units, are classified as registered in RUK if the enterprise's VAT/PAYE registered office address is, outside Scotland, elsewhere in the UK.

14. Statistical Disclosure Control

The confidentiality of all data held on the IDBR is protected by the Code of Practice for Official Statistics and by specific legislation. The disclosure of data relating to individual undertakings without consent is prohibited under the Statistics of Trade Act 1947, the Value Added Tax Act 1994 and the Finance Act 1969. In accordance with these requirements, measures have been taken to ensure that no information about individual enterprises or local units are disclosed. All figures in this publication have been rounded to avoid disclosure, and where necessary additional measures have been taken to protect confidentiality.

The number of enterprises/business sites are rounded to the nearest 5, employment is rounded to the nearest 10 and turnover is rounded to the nearest £million.

The statistical disclosure control process was updated for the 2010 results onwards. Previously, a minimum threshold rule was applied, whereby the employment and turnover values associated with enterprise counts below a certain threshold were suppressed. To avoid disclosure by deduction, additional cells were also suppressed. To further minimise disclosure, the minimum threshold was lowered and an additional dominance rule was introduced. The dominance rule identifies and suppresses cells where a small number of enterprises account for the majority of the associated employment or turnover. The overall effect of these changes is that more information is included in the tables but greater protection is provided for enterprises which dominate their respective industry or local area.

15. Revisions Policy

15.1 General Revisions Policy for Unregistered Enterprises

LFS self employment data is the basis for the estimate of unregistered enterprises. ONS reweight the LFS data according to the latest population estimates. As a result, we will revise the unregistered time series to take account of the reweighted LFS data.

15.1.1 Unregistered Enterprises – latest revisions

The unregistered estimates for 2010 to 2014 have been revised to take account of the latest LFS data which has been reweighted to the 2011 population estimates. The impact of this is shown in the table below:

Unregistered estimates – impact of revisions

Year	Original	Revised	%difference
2010	146,720	145,885	-0.6%
2011	156,155	157,455	0.8%
2012	181,775	181,365	-0.2%
2013	183,055	182,130	-0.5%
2014	168,490	168,730	0.1%

As the magnitude of these revisions are relatively small, the historic time series from 2000 to 2009 has not been back revised.

15.2 General Revisions Policy for Registered Enterprises

In general, the figures for registered enterprises should be final and should not be revised in future, since they are based on a snapshot in time from the IDBR which cannot change. However sometimes, when quality assuring the data for the latest year, errors in terms of the industry classification applied to businesses may come to light in which case we may correct the erroneous business classifications in previous years. Where these corrections lead to revisions to previously published data, we will flag this up in the revised tables using the 'r' flag.

15.2.1 Registered Enterprises – latest revisions

The registered estimates for 2014 have been revised to take account of revisions to the industry classification applied to a small number of large businesses. The impact that these revisions have on the 2014 registered business count is very small, but there is a more sizeable impact on turnover and employment for the following industry sectors:

- A large company restructure has led to turnover revisions; in 'Sector C Manufacturing' turnover revised down by £4.9 billion, in 'Sector L Real estate activities' turnover revised down by £46 million and in 'Sector M Professional, scientific and technical activities' turnover revised down by £969 million.
- A large company reclassification moves 2,800 jobs and £189 million in turnover from 'Sector F Construction' to 'Sector H Transport and storage'.
- A large company SIC code revision moves 130 jobs from 'Sector K Financial and insurance activities' to 'J Information and communication' – this also increases turnover in sector J by £3.7 billion.
- A large company SIC code revision moves 780 jobs and £169 million in turnover from 'Sector K Financial and insurance activities' to 'S Other service activities'.

16. Making comparisons with other business statistics

16.1 Business Stock Data published by ONS and BIS

Business stock estimates for the UK and all regions of the UK (including Scotland) are published by the Office for National Statistics (ONS) and the Department for Business Innovation and Skills (BIS). A key difference between the UK series for

Scotland and the 'Businesses in Scotland' publication estimates is that 'Businesses in Scotland' includes all enterprises that operate in Scotland regardless of where the business is based. There are other differences between the publications, and these are explained in the following on-line information notes:

<http://www.gov.scot/Topics/Statistics/Browse/Business/Corporate/ukbusiness>

16.2 Scottish Annual Business Statistics

Scottish Annual Business Statistics (SABS) is another publication released by the Scottish Government. The source of the SABS is the Annual Business Survey. The main purpose of SABS is to provide information on the performance of detailed industry sectors of the Scottish economy, predominately, in terms of turnover or gross value added. As discussed, in section 6.6 above, the employment and turnover estimates provided in the 'Businesses in Scotland' publication are not ideal for comparing change in employment or turnover over time. Scottish Annual Business Statistics is the best source for comparing turnover change over time for detailed industry sectors. More information on the key differences between Scottish Annual Business Statistics and the 'Businesses in Scotland' publication (formerly Scottish Corporate Sector Statistics) is available at:

<http://www.gov.scot/Topics/Statistics/Browse/Business/SourcesandSuitability/KeyDifferences>

Links to areas within the Scottish Government

Scottish Neighbourhood Statistics

Scottish Neighbourhood Statistics (SNS) provides access to a wide range of information and statistics on: health, education, poverty, unemployment, housing, population, crime and social/community issues in Scotland. The data is available at a range of different geographic levels.

A beta version of a new [Scottish Statistics Website](#), which will ultimately replace SNS website has been launched. The aim of beta testing on the new site is to make sure that everything works and to gather thoughts on the functionality and usability of the site.

Growth Sector Statistics Database

The **Growth Sector statistics database** provides economic statistics for the growth sectors (also known as key sectors) as set out in the [Scotland's Economic Strategy 2015](#).

Scottish Annual Business Statistics

Scottish Annual Business Statistics (SABS) provides data mainly on the Production (including Manufacturing), Construction and Service Sectors in Scotland. The Annual Business Survey, from which the statistics are largely derived, covers approximately two thirds of the economy. The main sectors not covered are the financial sector & parts of agriculture and the public sector. These statistics are therefore best suited to the analysis of individual industries rather than the economy as a whole.

Business, Enterprise and Energy - Data Sources and Suitability

For background on **Businesses in Scotland** (formerly Scottish Corporate Sector Statistics) and Scottish Annual Business Statistics (SABS) as data sources including comparison of their differences.

Links to websites outside the Scottish Government

Please note that when accessing the following links you will leave the Scottish Government website. The Scottish Government and its staff are not responsible for content external to this website.

Business Population Estimates

Produced by the Department for Business, Innovation and Skills, the **Business Population Estimates** publication is the main UK equivalent of Businesses in Scotland and provides business information for each Government Office Region in the UK broken down by company size and industry. It includes information about registered and unregistered enterprises.

UK Business: Activity, Size and Location

The publication **UK Business: Activity, Size and Location** is produced by the Office for National Statistics (ONS) and contains detailed information on all registered businesses in the UK including size, classification and location.

Business Demography

Statistics on **Enterprise Births, Deaths and Survival** are released annually by the ONS. They are the best official source on business start-ups, closures and survival rates and provide detailed information by local authority, region and industrial sector at a UK level.

The information note [UK Business Data Sources](#) provides more detail about the three publications above and, in particular, explains the key differences between them and Scottish Corporate Sector Statistics (now known as Businesses in Scotland).

IDBR

For more information on the **Inter Departmental Business Register (IDBR)** please see the link above.

Business Register and Employment Survey (BRES)

Business Register and Employment Survey (BRES) is the preferred source for employment estimates by industry for regional and sub-regional geographies. Data is released annually in September.

Public Sector Employment (PSE)

Public Sector Employment (PSE) is the preferred source of *public sector* employment data is the National Statistics Public Sector Employment (PSE) series. This is published quarterly by ONS and the Scottish Government and provides employment estimates at national and regional (government office) level based on public sector returns.

Virtual Microdata Laboratory (VML)

The **Virtual Microdata Laboratory (VML)** is a facility within the Office for National Statistics (ONS) for providing secure access to sensitive detailed data for statistical research purposes that serve the public good. Access is provided for Approved Researchers working on defined and approved projects. Available data sources include business surveys, social surveys and Census samples. For information, a remote lab is located in Glasgow.

UK Data Service

The **UK Data Service** is a comprehensive resource funded by the ESRC to support researchers, teachers and policymakers who depend on high-quality social and economic data. It is a single point of access to a wide range of secondary data including large-scale government surveys, international macrodata, business microdata, qualitative studies and census data.

Scottish Business Information Service

Scottish Business Information Service (SCOTBIS) provides a research service for businesses across Scotland. SCOTBIS is based on the vast resources of the National Library of Scotland (NLS). At NLS you can access market research reports, business databases, international directories, and business and trade journals.

Source : Scottish Government, ONS (IDBR)

Notes:

1. Excludes central and local government.
2. Size band is based on the number of employees that the enterprise employs across the UK.
3. To enable a robust comparison over time, this time series has been produced on a consistent basis as far as possible using the latest methodology. These estimates supersede those published in previous Businesses in Scotland and Scottish Corporate Sector Statistics publications.
4. HMRC provide information on VAT/PAYE registrations, which forms the basis of the Inter Departmental Business Register (IDBR). In 2012, improvements to HMRC computer systems led to previously excluded businesses being added to the IDBR. For Scotland, this resulted in 2,340 extra enterprises being added to the IDBR in 2012; these extra enterprises should have been included in previous years also. This step change has been taken back in the Scottish statistics as far as possible so as not to hinder time series analysis. This has resulted in the registered enterprises count being revised upwards for previous years when compared to data published in Scottish Corporate Sector Statistics 2011.

* not available due to confidentiality constraints

1. Turnover data for financial intermediation enterprises are not available. Totals exclude turnover of such enterprises.

2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector.

This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.

[3. Please refer to Definitions and Methodology for further details of the estimation of unregistered enterprises.](#)

4. Size band is based on the number of employees that the enterprise employs across the UK.

5. Includes central and local government.

6. r denotes revised figures. See methodology for more details.

Source: Scottish Government, ONS (IDBR)

1. Excludes central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
3. Size band is based on the number of employees that the enterprise employs across the UK.
4. ^r denotes revised figures. See methodology for more details.

1. Excludes central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
3. Size band is based on the number of employees that the enterprise employs across the UK.
4. r denotes revised figures. See methodology for more details.

* not available due to confidentiality constraints

Notes:

1. Excludes central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
3. For more information on Standard Industrial Classification 2007 - please click here.
4. Size band is based on the number of employees that the enterprise employs across the UK.
5. Turnover for financial and insurance activities enterprises are not available on a comparable basis.

Source: Scottish Government, ONS (IDBR)

Notes:

1. Excludes central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
3. For more information on Standard Industrial Classification 2007 - please click here.
4. Size band is based on the number of employees that the enterprise employs across the UK.
5. Turnover for financial and insurance activities enterprises are not available on a comparable basis.
6. r denotes revised figures. See methodology for more details.

* not available due to confidentiality constraints

- no registered enterprises of this type present in Scotland

Source: Scottish Government, ONS (GBR)

Notes:

- Excludes central and local government.
- Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards. [For more information on Standard Industrial Classification 2007 - please click here.](#)
- Size band is based on the number of employees that the enterprise employs across the UK.
- Turnover for financial and insurance activities enterprises are not available on a comparable basis.

Source: Scottish Government, ONS (DBR)

* not available due to confidentiality constraints

- no registered enterprises of this type present in Scotland

Notes:

1. Excludes central and local government.

2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector.

This change has not been applied to historical data, and therefore represents a step change in the 2011 results compared to data for earlier years.

3. For more information on Standard Industrial Classification 2007 - please click here.

4. Size band is based on the number of employees that the enterprise employs across the UK.

5. Turnover for financial and insurance activities enterprises are not available on a comparable basis.

For more information on Definitions and Methodology - please click here

- Excludes central and local government.
- Turnover data for financial intermediation enterprises are not available on a comparable basis.
- For more information on Standard Industrial Classification 2007 - please click here.
- For this analysis enterprises were classified as based in Scotland if the enterprise address was in Scotland.
Foreign based companies were classified in the same way, i.e. they were regarded as based in Scotland if their main UK address was in Scotland.
- Size band is based on the number of employees that the enterprise employs across the UK.
- r denotes revised figures. See methodology for more details.

1. Excludes central and local government.

2. Turnover data for financial intermediation enterprises are not available on a comparable basis.

3. For more information on Standard Industrial Classification 2007 - please click here.

4. For this analysis enterprises were classified as based in Scotland if the enterprise address was in Scotland.

Foreign based companies were classified in the same way, i.e. they were regarded as based in Scotland if their main UK address was in Scotland.

5. Size band is based on the number of employees that the enterprise employs across the UK.

Source: Scottish Government, ONS (IDBR)

1. Excludes central and local government.

2. Turnover data for financial intermediation enterprises are not available on a comparable basis.

3. For more information on Standard Industrial Classification 2007 - please click here.

4. For this analysis enterprises were classified as based in Scotland if the enterprise address was in Scotland.

Foreign based companies were classified in the same way, i.e. they were regarded as based in Scotland if their main UK address was in Scotland.

5. Size band is based on the number of employees that the enterprise employs across the UK.

For more information on Definitions and Methodology - please click here

Table 3: Number of registered enterprises¹ and their total Scottish employment and turnover² by sector³ and country of ownership^{4,5} March 2015

Sector	Employee Sizeband ⁶	Country of Ownership														
		UK - Scotland based ⁷			UK - RUK based			Total UK			Abroad			Total		
		Enterprises	Employment	Turnover (£ millions)	Enterprises	Employment	Turnover (£ millions)	Enterprises	Employment	Turnover (£ millions)	Enterprises	Employment	Turnover (£ millions)	Enterprises	Employment	Turnover (£ millions)

* not available due to confidentiality constraints

1. Excludes central and local government.

2. Turnover for financial and insurance activities enterprises are not available on a comparable basis.

3. For more information on Standard Industrial Classification 2007 - please click here.

4. The IDBR uses data provided by Dun & Bradstreet to identify enterprise groups with foreign ownership and/or subsidiaries.

For further information on Dun & Bradstreet, please contact Ron Turner at TurnerR@dnb.com

5. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector.

This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.

6. Size band is based on the number of employees that the enterprise employs across the UK.

7. UK - Scotland based businesses are enterprises that are UK-owned and that have their registered office in Scotland.

For more information on Definitions and Methodology - please click here

Note: Totals may not equal the sum of the constituent parts due to rounding.

* not available due to confidentiality constraints

1. Excludes central and local government.

2. Turnover for financial and insurance activities enterprises are not available on a comparable basis.

3. For more information on Standard Industrial Classification 2007 - please click here.

4. The IDBR uses data provided by Dun & Bradstreet to identify enterprise groups with foreign ownership and/or subsidiaries.

For further information on Dun & Bradstreet, please contact Ron Turner at TurnerR@dnb.com

5. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector.

This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.

6. Size band is based on the number of employees that the enterprise employs across the UK.

7. UK - Scotland based businesses are enterprises that are UK-owned and that have their registered office in Scotland.

For more information on Definitions and Methodology - please click here

Table 3: Number of registered enterprises¹ and their total Scottish employment and turnover² by sector³ and country of ownership March 2012

Sector	Employee Sizeband ⁶	Country of Ownership														
		UK - Scotland based ⁷			UK - RUK based			Total UK			Abroad			Total		
		Enterprises	Employment	Turnover (£ millions)	Enterprises	Employment	Turnover (£ millions)	Enterprises	Employment	Turnover (£ millions)	Enterprises	Employment	Turnover (£ millions)	Enterprises	Employment	Turnover (£ millions)

Source: Scottish Government, ONS (IDBR)

1. Excludes central and local government.

2. Turnover for financial and insurance activities enterprises are not available on a comparable basis.

3. For more information on Standard Industrial Classification 2007 - please click here.

4. The IDBR uses data provided by Dun & Bradstreet to identify enterprise groups with foreign ownership and/or subsidiaries.

For further information on Dun & Bradstreet, please contact Ron Turner at TurnerR@dnb.com

5. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector.

This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.

6. Size band is based on the number of employees that the enterprise employs across the UK.

7. UK - Scotland based businesses are enterprises that are UK-owned and that have their registered office in Scotland.

For more information on Definitions and Methodology - please click here

1. This data only refers to central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
3. [For more information on Standard Industrial Classification 2007 - please click here.](#)
4. Counts of the number of enterprises operating within each sector have been derived from an analysis at business site level. These do not sum to the total, as the same enterprise may operate in more than one sector.
5. Primary industries include Agriculture, forestry and fishing, Mining and quarrying and Electricity, gas and water supply.

R Arts, entertainment and recreation	50	13,260
S Other service activities	45	5,120
Total	245	578,760

Note: Totals may not equal the sum of the constituent parts due to rounding.

Source : Scottish Government, ONS (IDBR)

* not available due to confidentiality constraints

1. This data only refers to central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the 2011 results compared to data for earlier years.
3. [For more information on Standard Industrial Classification 2007 - please click here.](#)
4. Counts of the number of enterprises operating within each sector have been derived from an analysis at business site level. These do not sum to the total, as the same enterprise may operate in more than one sector.
5. Primary industries include Agriculture, forestry and fishing, Mining and quarrying and Electricity, gas and water supply.

Note: This data only refers to the registered enterprises. Unregistered are sole traders and partnerships who are not registered for PAYE or VAT.

Source: Scottish Government, ONS (IDBR)

Totals may not equal the sum of the constituent parts due to rounding.

1. Excludes central and local government.

2. Turnover for financial and insurance activities enterprises are not available. Totals exclude turnover of such enterprises.

3. For more information on Standard Industrial Classification 2007 - please click here.

4. Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.

5. Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.

Note that only enterprises are double-counted in these tables – each enterprise's employment and turnover are accurately assigned to the local authorities they operate in therefore the sum of these columns do correspond to the Scotland totals.

6. Size band is based on the number of employees that the enterprise employs across the UK.

Note: This data only refers to the registered enterprises. Unregistered are sole traders and partnerships who are not registered for PAYE or VAT.

Source: Scottish Government, ONS (IDBR)

Totals may not equal the sum of the constituent parts due to rounding.

1. Excludes central and local government.

2. Turnover for financial and insurance activities enterprises are not available. Totals exclude turnover of such enterprises.

3. For more information on Standard Industrial Classification 2007 - please click here.

4. Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.

5. Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.

Note that only enterprises are double-counted in these tables – each enterprise's employment and turnover are accurately assigned to the local authorities they operate in therefore the sum of these columns do correspond to the Scotland totals.

6. Size band is based on the number of employees that the enterprise employs across the UK.

Note: This data only refers to the registered enterprises. Unregistered are sole traders and partnerships who are not registered for PAYE or VAT.

Source: Scottish Government, ONS (IDBR)

Totals may not equal the sum of the constituent parts due to rounding.

1. Excludes central and local government.

2. Turnover for financial and insurance activities enterprises are not available. Totals exclude turnover of such enterprises.

3. For more information on Standard Industrial Classification 2007 - please click here.

4. Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.

5. Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises does not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures. Note that only enterprises are double-counted in these tables – each enterprise's employment and turnover are assigned to the local authority areas they operate in. However, the sum of the local authority area turnover is slightly lower than the Scotland total turnover since the local authority area turnover is estimated up from site (local unit) turnover - and turnover for Section K (financial and insurance activities) sites is not available.

6. Size band is based on the number of employees that the enterprise employs across the UK.

For more information on Definitions and Methodology - please click here

Table 6: Number of registered enterprises^{1,2} by Local Authority area³, employee size band and sector⁴
March 2015

Note: Totals may not equal the sum of the constituent parts due to rounding.

Source: Scottish Government, ONS (IGBR)

- Excludes central and local government.
- Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the 2011 results compared to data for earlier years.
- Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.
- For more information on Standard Industrial Classification 2007 - please click here.
- Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.
- Size band is based on the number of employees that the enterprise employs across the UK.

For more information on Definitions and Methodology - please click here.

Table 6: Number of registered enterprises^{1,2} by Local Authority area³, employee size band and sector⁴
March 2014

Note: Totals may not equal the sum of the constituent parts due to rounding.

Source: Scottish Government, ONS (IGBR)

- Excludes central and local government.
- Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the 2011 results compared to data for earlier years.
- Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.
- For more information on Standard Industrial Classification 2007 - please click here.
- Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.
- Size band is based on the number of employees that the enterprise employs across the UK.

For more information on Definitions and Methodology - please click here.

Table 6: Number of registered enterprises^{1,2} by Local Authority area³, employee size band and sector⁴
March 2013

Note: Totals may not equal the sum of the constituent parts due to rounding.

Source: Scottish Government, ONS (ISR)

- Excludes central and local government.
- Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the 2011 results compared to data for earlier years.
- Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.
- For more information on Standard Industrial Classification 2007 - please click here.
- Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.
- Size band is based on the number of employees that the enterprise employs across the UK.

For more information on Definitions and Methodology - please click here.

Table 6: Number of registered enterprises^{1,2} by Local Authority area³, employee size band and sector⁴
March 2012

Note: Totals may not equal the sum of the constituent parts due to rounding.

Source: Scottish Government, ONS (ISR)

1. Excludes central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the 2011 results compared to data for earlier years.
3. Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.
4. For more information on Standard Industrial Classification 2007, please click here.
5. Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.
6. Size band is based on the number of employees that the enterprise employs across the UK.

For more information on Definitions and Methodology, please click here.

Table 6: Number of registered enterprises^{1,2} by Local Authority area³, employee size band and sector⁴
March 2011

Note: Totals may not equal the sum of the constituent parts due to rounding.

Source: Scottish Government, ONS (IDBR)

1. Excludes central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the 2011 results compared to data for earlier years.
3. Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.
4. For more information on Standard Industrial Classification 2007 - please click here.
5. Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.
6. Size band is based on the number of employees that the enterprise employs across the UK.

For more information on Definitions and Methodology - please click here.

Table 6: Number of registered enterprises¹ by Local Authority area², employee size band and sector³
March 2010

Note: Totals may not equal the sum of the constituent parts due to rounding.

Source: Scottish Government, ONS (DBR)

1. Excludes central and local government.
2. Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.
3. For more information on Standard Industrial Classification 2007 - please click here.
4. Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.
5. Size band is based on the number of employees that the enterprise employs across the UK.
For more information on Definitions and Methodology - please click here.

Source: Scottish Government, ONS (IDBR)

1. Excludes central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
3. Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.
4. For more information on Standard Industrial Classification 2007 - please click here.
5. Sites are allocated a size band by their total number of employees at that business site.

For more information on Definitions and Methodology - please click here

Source : Scottish Government, ONS (IDBR)

Note: Enterprise counts rounded to the nearest five. Employment rounded to the nearest ten.

Totals may not equal the sum of the constituent parts due to rounding.

1. Excludes central and local government.

2. Urban/rural classification according to 2011-12 sixfold classification.

3. Counts of the number of enterprises operating within each urban/rural classification have been included.

These do not sum to the total for Scotland, as the same enterprise may operate in more than one type of area.

4. Size band is based on the number of employees that the enterprise employs across the UK.

Source : Scottish Government, ONS (IDBR)

- Excludes central and local government
- Counts of the number of enterprises operating within each urban/rural classification have been included. These do not sum to the total for Scotland, as the same enterprise may operate in more than one type of area.
- Urban/rural classification according to 2011-12 sixfold classification
- For more information on Standard Industrial Classification 2007 - please click here.
- Turnover data for K,L Financial and insurance activities and Real estate activities exclude the turnover of financial intermediation enterprises as it is not available on a comparable basis.
- Size band is based on the number of employees that the enterprise employs across the UK.

Table 11: Number of enterprises^{1,2} in Scotland by urban/rural classification³, broad sector⁴ and employee sizeband and their total Scottish employment and turnover⁵
March 2012

Note: Totals may not equal the sum of the constituent parts due to rounding.
* not available due to confidentiality constraints

Source: Scottish Government, ONS (IDBR)

- Excludes central and local government
- Counts of the number of enterprises operating within each urban/rural classification have been included. These do not sum to the total for Scotland, as the same enterprise may operate in more than one type of area.
- Urban/rural classification according to 2011-12 sixfold classification
- For more information on Standard Industrial Classification 2007 - please click here.
- Turnover data for K,L Financial and insurance activities and Real estate activities exclude the turnover of financial intermediation enterprises as it is not available on a comparable basis.
- Size band is based on the number of employees that the enterprise employs across the UK.

A National Statistics publication for Scotland

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be interpreted to mean that the statistics: meet identified user needs; are produced, managed and disseminated to high standards; and are explained well.

Correspondence and enquiries

For enquiries about this publication please contact:

Marina Curran,
Office of the Chief Economic Adviser,
Telephone: 0300-244-6813,
e-mail: Marina.Curran@gov.scot
