# Introduction

## What do these statistics cover?

The 'Businesses in Scotland' publication provides information on the number of enterprises (businesses) operating in Scotland. The main purpose of the publication is to provide an estimate of Scotland's business stock.

Within the publication the Scottish business stock is broken down by various dimensions including industry, business size, local authority area, urban/rural area and country of ownership. The publication includes **all** enterprises that **operate** in Scotland regardless of where the business is based.

The focus of the publication is on private sector enterprises, where the private sector is defined as including the following enterprise types:

- Companies (including Building Societies)
- Sole Proprietors
- Partnerships
- Public Corporations/Nationalised Bodies
- Non-profit making bodies and mutual associations

Data is also provided on enterprises' employment and turnover. However, please note that there are time lags associated with the employment and turnover variables.

## What are the statistics used for?

Statistics from the 'Businesses in Scotland' publication are used to provide insight into the characteristics of Scotland's business stock, and how Scotland's business stock has changed over time. The data are used to inform decision making and performance monitoring – both inside and outside government. More information on uses can be found in the on-line [Businesses in Scotland Data Sources, Suitability and Uses Note](#).

## What year do tables relate to?

The latest figures relate to March 2018 and were released on 7 November 2018.

The latest 2018 publication tables on the [Businesses in Scotland](#) website are consistent for the years 2010 to 2018. All industry sector data are based on the Standard Industrial Classification (SIC) 2007.

Older tables, available in the [Tables Archive](#), have not been updated to reflect the current methodology and are therefore not consistent with the latest tables. However, a high level time series for total (registered and unregistered) enterprises

and registered enterprises has been constructed for 2000 to 2018. This long time series has been produced on a consistent basis as far as possible.

The following data is available on the 'Businesses in Scotland' website:

Constructed Time Series back to 2000:

All enterprises (registered and unregistered)	2000 – 2018
Total registered enterprises	2000 – 2018

Latest detailed tables on a consistent methodological basis:

All enterprises (Tables A to E)	2010 – 2018
Registered enterprises by industry (Tables 1 to 16)	2010 – 2018
National Indicators (Tables 17 to 20)	2010 – 2018

Archived Tables (on old methodology and SIC 2003 basis):

All enterprises (Tables A to E)	2000 – 2010
Registered enterprises by industry (Tables 1 to 8)	2000 – 2010

### **What's new?**

Tables 17 to 20 are new and provide data for two [National Performance Framework](#) National Indicators – on the number of businesses and high growth businesses.

We have also improved the methodology for estimating the number of unregistered businesses (those businesses not registered for VAT and/or PAYE), this has led to revisions back to 2010.

### **When will the figures be updated?**

It is our aim to publish Businesses in Scotland 2019 as soon as possible after the release of the Office for National Statistics UK Business Activity publication due for release in Autumn 2019.

# Key Facts 2018

## Summary

- As at March 2018, there were an estimated 345,915 private sector businesses operating in Scotland – representing a decrease of 8,830 businesses (-2.5%) since March 2017.
- The decrease over the latest year was driven by a fall in the number of unregistered businesses (those not registered for VAT and/or PAYE). The number of unregistered businesses decreased from 178,340 in 2017 to 169,620 in 2018 – a decrease of 8,720 unregistered businesses (-4.9%).
- The number of VAT/PAYE registered businesses has decreased over the latest year also - down by 105 businesses (-0.1%) from 174,600 in 2017 to 176,295 in 2018 – this is the first fall in the registered business stock since 2011.
- Overall, the number of employers has increased by 915 (0.9%) from 107,465 employers in 2017 to 108,380 employers in 2018 – there are now more private sector employers operating in Scotland than at any other time in the series (back to 2000).
- As at March 2018, there were 343,535 Small and Medium-sized Enterprises (SMEs) operating in Scotland, providing an estimated 1.2 million jobs. SMEs accounted for 99.3% of all private sector businesses in 2018, accounting for 54.9% of private sector employment and 41.5% of private sector turnover.

## Scottish Economy – Gross Domestic Product (GDP) growth

In 2017, Scotland's onshore GDP grew by 1.4% compared to 2016. Growth has picked up from lower levels in 2015 and 2016, but remains below the longer-term average of around 2% per year. By broad industry sector, there was growth of 1.0% for the Services sector between 2016 and 2017 – compared to 4.4% for the Construction sector and 2.0% for the Production sector.

## Businesses in Scotland as at March 2018

As at March 2018, there were an estimated 345,915 private sector businesses operating in Scotland. Almost all of these businesses (98.2%) were small (0 to 49 employees); 3,925 (1.1%) were medium-sized (50 to 249 employees) and 2,380 (0.7%) were large (250 or more employees).

As at March 2018, there were 343,535 Small and Medium-sized Enterprises (SMEs) operating in Scotland, providing an estimated 1.2 million jobs. SMEs accounted for 99.3% of all private sector enterprises, accounting for 54.9% of private sector employment and 41.5% of private sector turnover.

Small (0 to 49 employees) businesses alone accounted for 42.3% of private sector employment and 27.3% of private sector turnover as at March 2018 (see Chart 1).

The 2,380 large (250+ employees) businesses operating in Scotland, as at March 2018, accounted for 45.1% of private sector employment and 58.5% of private sector turnover (see Chart 1).

**Chart 1: Share of enterprises, employment and turnover by size, 2018**

As at March 2018, businesses with no employees – that is sole proprietors/partnerships comprising only the owner-managers or companies comprising only the employee director – accounted for 68.7% of all private sector businesses in Scotland, 13.1% of private sector employment and 5.0% of private sector turnover. Whilst the 108,380 employers in Scotland, as at March 2018, accounted for 86.9% of private sector employment and 95.0% of private sector turnover.

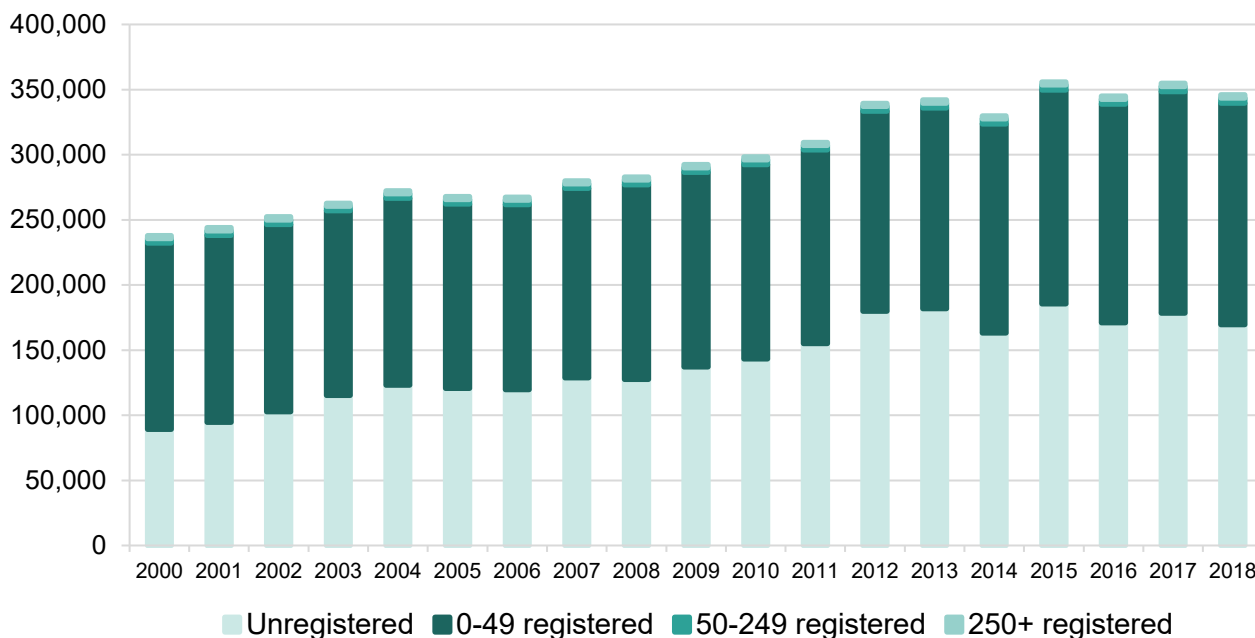

The total number of businesses operating in Scotland comprises those that are registered for VAT and/or PAYE, and those that are not (so called unregistered enterprises). Unregistered businesses are sole proprietorships and partnerships that are not large enough to be VAT registered (have an annual turnover below the VAT threshold - £85,000 as at March 2018) and are not PAYE registered (i.e. do not employ others). As at March 2018, unregistered businesses represented 49.0% of all private sector businesses in Scotland.

### **Changes in the Scottish business stock over time**

As at March 2018, there were an estimated 345,915 private sector businesses operating in Scotland. Between 2000 and 2018, the total number of businesses

increased by an estimated 45.4% (108,020 businesses). As shown in the Chart 2 below, this increase over the long term has been driven by a rise in the number of unregistered businesses. Although there has been a considerable increase in the number of registered businesses over this period also – up 18.6% (27,630 businesses).

**Chart 2: Private sector enterprises operating in Scotland, 2000 – 2018**

Between 2017 and 2018, the total number of private sector businesses in Scotland decreased by 8,830 businesses (-2.5%). This follows an increase in the previous annual period.

The decrease over the latest year was driven by a fall in the number of unregistered businesses. The number of unregistered businesses decreased from 178,340 in 2017 to 169,620 in 2018 – a decrease of 8,720 unregistered businesses (-4.9%).

The number of registered businesses (those registered for VAT and/or PAYE) decreased over the latest year also - down by 105 businesses (-0.1%) from 174,600 in 2017 to 176,295 in 2018 – this is the first fall in the registered business stock since 2011. However, the registered business count for 176,295 is still relatively high – it is the second highest point in the series back to 2000.

This slight fall in the registered business stock over the latest year was as a result of a decrease in the number of small (0 to 49 employees) registered businesses – down 0.1% (-190 businesses) between 2017 and 2018. Within this group, there was a decrease in the number of non-employed registered businesses (down 1,025 businesses) but an increase in the number of small employers (1 to 49 employees) from 101,245 in 2017 to 102,075 in 2018 (up 830 businesses).

The number of medium-sized (50 to 249 employees) businesses increased between 2017 and 2018 to 3,925 – representing an increase of 70 businesses. There has

been an increase of 575 medium-sized businesses since 2000 and the 2018 medium-sized business count is a series high.

The number of large (250 or more employees) businesses also increased, over the latest year, to 2,380 – an increase of 15 since 2017. There has been an increase of 135 large businesses since 2000 and the 2018 large business count is a series high also. Following the recession, from mid-2008 to 2009, there was a slight shift in employment from large businesses (250+ employees) to small businesses – with large businesses accounting for 47.1% of private sector employment in 2010 compared to a low of 44.2% in 2015. The latest figures for 2018 show that the large business share of private sector employment has increased slightly over the latest year from 44.9% in 2017 to 45.1% in 2018.

The number of employers increased, between 2017 and 2018, from 107,465 to 108,830 – representing an increase of 915 employers (0.9%). This takes the number of private sector employers in Scotland to the highest level in the series (back to 2000).

**Chart 3: Private sector employers operating in Scotland, 2000 – 2018**

### Enterprises by legal status

As at March 2018, private sector enterprises in Scotland, as per the ‘Businesses in Scotland’ definition, fell into the following categories:

- Sole Proprietors/Partnerships<sup>1</sup> (64.9% of enterprises, 19.5% of employment)
- Companies<sup>2</sup> (32.9% of enterprises, 72.0% of employment)
- Non-Profit Making Bodies (2.3% of enterprises, 8.5% of employment)

<sup>1</sup> Note that the Sole Proprietorships/Partnerships legal status group includes unregistered enterprises.

<sup>2</sup> Includes a small number of public corporations.

Although Sole Proprietors/Partnerships continue to make up the majority of private sector enterprises; there has been sustained growth in the number of Companies over the last eight years. The number of Companies has increased from 76,995 in 2010 to 113,705 in 2018 – an increase of 36,710 (47.7%).

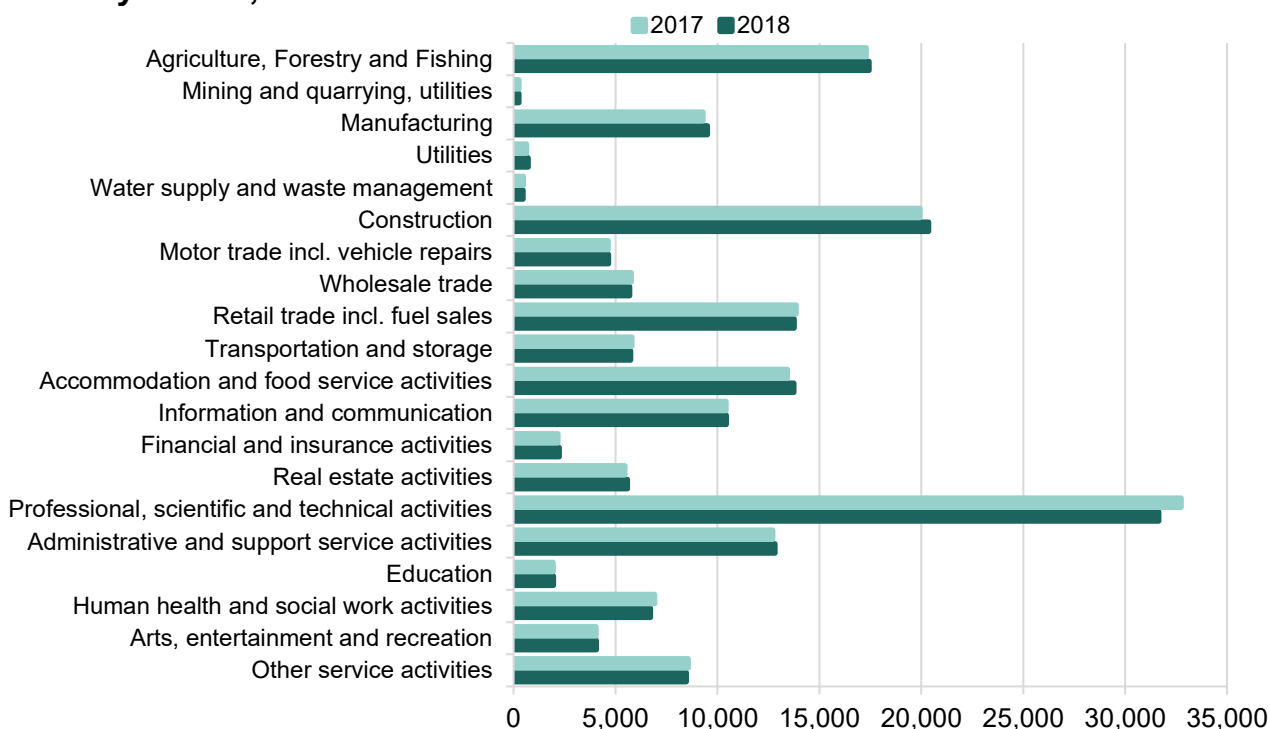

### Enterprises by broad industry sector

As at March 2018, the two largest industry sectors were ‘Professional, Scientific & Technical Activities’ (48,155 enterprises) and Construction (47,800 enterprises). Together, these two sectors make up 27.7% of all private sector enterprises in Scotland. In terms of private sector registered enterprises - these two sectors are also the largest, ‘Professional, Scientific & Technical Activities’ (31,650 registered enterprises) and Construction (20,355 registered enterprises).

Between 2017 and 2018, the number of registered enterprises in the ‘**Electricity, gas, steam and air conditioning supply**’ sector increased by 11.8% (75 enterprises) – the sector with the highest **relative** growth over the latest year. In contrast, the number of registered enterprises in the ‘**Professional, Scientific & Technical Activities**’ sector decreased by 3.4% (-1,100 enterprises) - the sector with the lowest **relative** growth over the latest year.

Between 2017 and 2018, the number of registered enterprises in the ‘**Construction**’ sector increased by 425 enterprises (+2.9%) – the sector with the highest **absolute** growth over the latest year. Note that the ‘**Professional, Scientific & Technical Activities**’ sector was the sector with the lowest **absolute** growth over the latest year, as well as lowest relative growth over the latest year.

**Chart 4: Number of registered private sector enterprises, Scotland, by industry sector, 2017 and 2018**

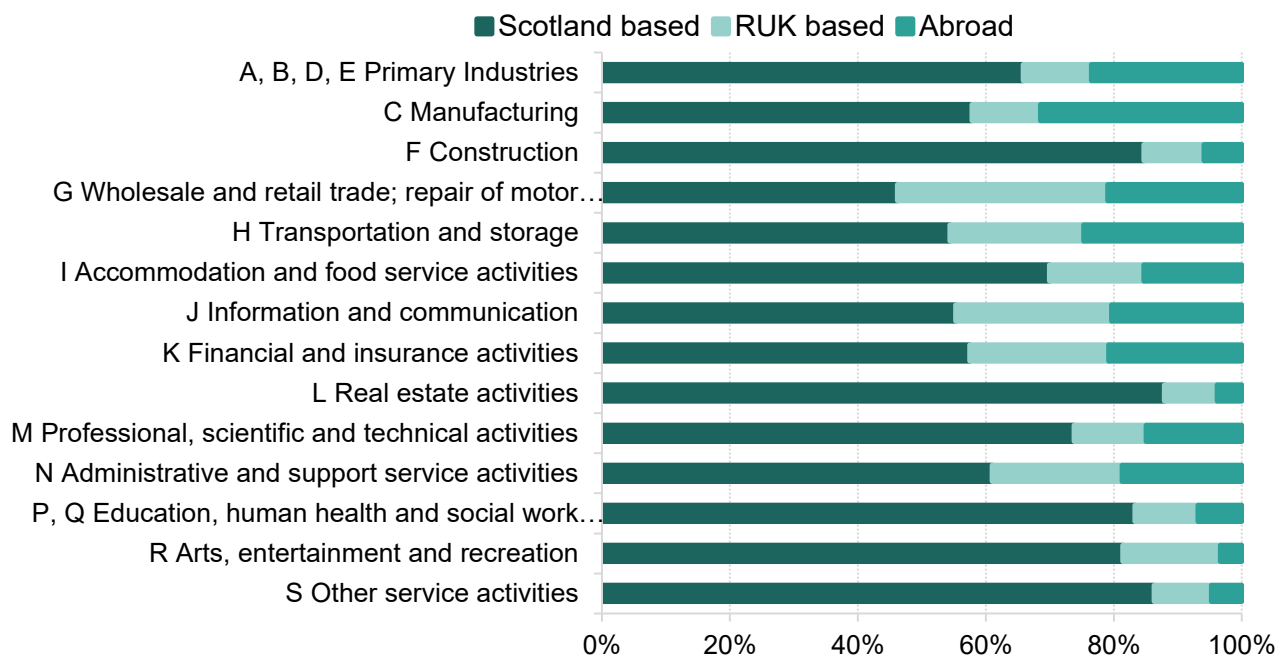

## Ownership (registered enterprises only)

Within the 'Businesses in Scotland' publication, enterprises can be either 'UK owned - Scotland based', 'UK owned - Rest of the UK (RUK) based' or Abroad owned.

As at March 2018, registered private sector enterprises with ultimate base outside Scotland (RUK based or Abroad owned) represented 3.1% of enterprises, accounting for 34.5% of employment and 53.7% of turnover. Within large businesses they represented 81.5% of enterprises, accounting for 62.3% of employment and 74.8% of turnover.

As at March 2018, 34.5% of private sector employment was in enterprises with ultimate base outside Scotland. Breaking this down, 17.5% of Scottish private sector employment was in enterprises with ultimate base in the RUK with 17.0% of employment in enterprises with ultimate ownership Abroad (outside the UK). The share of employment in Abroad owned enterprises varies by industry sector. For example, as at March 2018, 31.4% of Scottish manufacturing employment was in Abroad-owned enterprises, compared to 3.3% of Scottish 'Arts, entertainment and recreation' employment (see Chart 5). Between 2017 and 2018, the number of Abroad-owned enterprises in Scotland increased from 2,350 to 2,610.

**Chart 5: Share of employment by ownership and industry sector, 2018**

As at March 2018, there were 1,100 EU Abroad-owned enterprises operating in Scotland – employing 121,790 people and generating a turnover of £33 billion (12.6% of all turnover from registered businesses in Scotland or 38.6% of all turnover from Abroad-owned registered businesses in Scotland).

In terms of individual countries, USA-owned enterprises accounted for the highest share of Scotland's Abroad-owned enterprises, Abroad-owned employment and Abroad-owned turnover. As at March 2018, there were 590 USA-owned enterprises

operating in Scotland – employing 107,750 people and generating a turnover of around £31 billion (36.6% of all turnover from abroad-owned registered businesses in Scotland).

### **Local Authority Area breakdown (registered enterprises only)**

Between 2017 and 2018, the registered business stock decreased in 18 of Scotland's 32 local authority areas – with the registered business stock falling the most in Aberdeen City (down 210 businesses, -2.2%) and Aberdeenshire (down 140 businesses, -1.0%). Over the latest year, Glasgow City local authority area experienced the greatest increase in the registered business stock with a rise of 335 businesses (up 1.7%) – followed by Fife (up 190 businesses, +1.9%) and then the City of Edinburgh (up 145 businesses, +0.7%).

The reduction in the business stock, over the latest year, in Aberdeen City and Aberdeenshire is driven by a fall in the number of enterprises in the 'Professional, scientific and technical activities' sector – reflecting the slowdown in the oil and gas sector and associated supply chain.

The share of employment in Abroad-owned enterprises varies significantly by local authority area. For example, as at March 2018, 29.7% of West Dunbartonshire's private sector employment was in Abroad-owned enterprises, compared to 4.8% in the Orkney Islands.

The share of employment in SMEs also varies significantly by local authority area. SMEs account for a larger share of employment in the more rural local authority areas, compared to the more urban local authority areas. As at March 2018, SMEs accounted for 81.8% of private sector employment in the Orkney Islands local authority area compared to 38.3% in the Glasgow City local authority area.

### **Urban/Rural Area breakdown (registered enterprises only)**

SMEs account for a larger share of private sector employment in rural areas, compared to urban areas. As at March 2018, SMEs accounted for 78.3% of private sector employment in remote rural areas compared to 69.0% in accessible rural areas and 46.4% in the rest of Scotland.

In remote rural areas, the 'Agriculture, forestry and fishing' industrial sector had the largest share of private sector employment (17.8%) in 2018, this was also the case in accessible rural areas (14.7%). However, in Scotland's urban areas the 'Wholesale, Retail and Repair' sector accounted for the largest share of private sector employment (19.6%) in 2018.

### **National Performance Framework - National Indicators**

The [National Performance Framework \(NPF\) 'Number of Businesses' Indicator](#) measures the total number of registered businesses operating in Scotland per 10,000

adults (the business stock rate). The provisional business stock rate<sup>3</sup> for 2018 shows that there were 391 businesses per 10,000 adults, the same rate as 2017.

Year	Registered Business Stock	Resident Adult Population (aged 16+)	National Indicator - Registered Business Stock per 10,000 resident adults
2010	155,045	4,344,402	357
2011	154,365	4,383,797	352
2012	159,580	4,398,974	363
2013	160,050	4,416,121	362
2014	166,525	4,436,559	375
2015	170,335	4,460,738	382
2016	173,995	4,488,783	388
2017	176,400	4,507,358	391
2018	176,295	4,507,358	391

The [National Performance Framework \(NPF\) 'High Growth Businesses' Indicator](#) measures high growth businesses as a share of all registered businesses operating in Scotland. The number of high growth<sup>4</sup> businesses decreased by 255 from 2,075 in 2017 to 1,820 in 2018. This results in a decrease in the high growth business share from 1.2% in 2017 to 1.0% in 2018. Note that although the latest business counts are as at the position in March 2018, the latest turnover data (used to measure high growth) are lagged and will be for the 2016 year for most businesses.

Growth Period	High Growth Businesses	Registered Business Stock	National Indicator - High Growth Businesses as share of Registered Business Stock
2010-2013	1,255	160,050	0.8%
2011-2014	1,515	166,525	0.9%
2012-2015	1,925	170,335	1.1%
2013-2016	2,060	173,995	1.2%
2014-2017	2,075	176,400	1.2%
2015-2018	1,820	176,295	1.0%

<sup>3</sup> The provisional business stock rate for 2018 is based on the March 2018 estimate of registered businesses and the 2017 mid-year population estimates. This rate will be revised when the 2018 mid-year population estimates are published in 2019.

<sup>4</sup> For the indicator a high growth business is an enterprise with 10+ employees in the base year (x-3) exhibiting an average of 20% annual growth in turnover over three years.

## Comparisons with the UK Business Stock

Business stock estimates for the UK as a whole are published by the Department for Business, Energy and Industrial Strategy (BEIS). The BEIS [Business Population Estimates 2018](#) show that for the UK as a whole the total number of businesses (registered and unregistered) decreased by 0.5% between the start of 2017 and start of 2018. This compares to a decrease of 2.5% for Scotland between March 2017 and March 2018 (as per the Businesses in Scotland 2018 results).

Scotland has a different business stock make-up compared to the UK as a whole. The table below shows that, in 2018, Scotland had a business stock rate of 750 (registered and unregistered) enterprises per 10,000 adults, compared to 1,059 enterprises per 10,000 adults in the UK as a whole.

Scotland has a lower rate of small businesses (particularly those that do not employ others) but a higher rate of medium and large businesses compared to the UK as a whole – see the table below.

Large businesses account for a higher share of Scotland's private sector employment (45%), compared to the UK as a whole (40%).

Country	Resident Adults Mid-year 2017	Private Sector Enterprises (registered & unregistered)	Private Sector Enterprises per 10,000 adults				
			Enterprise Size (number of employees UK-wide)				All Sizes
			None	Small (1-49)	Medium (50-249)	Large (250+)	
<b>UK</b>	53,534,872	5,667,510	799	252	7	1	1,059
<b>Scotland</b>	4,507,358	338,110	527	210	8	5	750

Source: UK - Business Population Estimates 2018, BEIS. Scotland – Businesses in Scotland 2018. Note that the Scotland data, in the table above, is restricted to enterprises that are companies, sole proprietorships, partnerships or public corporations to ensure as much consistency as possible between the UK and Scotland results.

# Scotland Tables

## Time Series 2000 to 2018

The latest 2018 publication tables are consistent for the years 2010 to 2018.

Older tables, available in the [Tables Archive](#), have not been updated to reflect the latest methodological changes and are therefore not consistent with the latest tables for 2010 to 2018.

However, a high level time series for all (registered and unregistered) enterprises and registered enterprises has been constructed for 2000 to 2018. This long time series has been produced on a consistent basis as far as possible.

<a href="#">Table 20</a>	2010-2018	High growth enterprises by employee sizeband, sector, owner and Local Authority area
--------------------------	-----------	--

All the tables in 'Businesses in Scotland 2018' publication are on a SIC 2007 basis. Please go to the [Tables Archive](#) on the [Businesses in Scotland](#) website for data on a SIC 2003 basis for 2000 to 2010. However, please note that the Archived Tables have not been updated with the latest methodology (to estimate the number of unregistered enterprises) or had the registered enterprise count revised upwards to take account of the extra registered enterprises added to the IDBR in 2012 as a result of improvements made to HMRC computer systems.

# Methodology

## 1. Introduction

The Businesses in Scotland Publication (formerly Scottish Corporate Sector Statistics) provides information about the **number of enterprises operating in Scotland**, broken down by various groupings including industry, business size, local authority area, urban/rural area and country of ownership. The publication includes all enterprises that operate in Scotland regardless of where the enterprise is based. This allows a more comprehensive understanding of the Scottish business environment than is possible via other business population estimates which only allocate enterprises to Scotland if they have their UK base in Scotland.

## 2. Use

Statistics from the 'Businesses in Scotland' publication are used to provide insight into the characteristics of Scotland's business stock, and how Scotland's business stock has changed over time. The data are used to inform decision making and performance monitoring – both inside and outside government. More information on the uses can be found in the on-line [Businesses in Scotland Data Sources, Suitability and Uses Note](#).

## 3. Overview of Methodology and Sources

The estimates have been constructed using data from the [Inter-Departmental Business Register \(IDBR\)](#), the Annual Population Survey (annual version of the [Labour Force Survey \(LFS\)](#)), the [Family Resources Survey \(FRS\)](#) and Self-Assessment (SA) data. The IDBR provides the number of enterprises registered for VAT and/or PAYE in Scotland. However there is a substantial number of very small enterprises which have no employees and are therefore not included on the IDBR. A modeling procedure that combines data from the IDBR with estimates derived from the LFS, FRS and SA data is used to estimate the number of unregistered enterprises. The principles of the model were developed by economic consultants working with the then Department of Trade and Industry and Eurostat.

## 4. Key Terms

Business units held on the IDBR can be grouped into 3 types:

### Administrative Units:

- VAT trader and PAYE employer information supplemented with incorporated business data from Companies House.

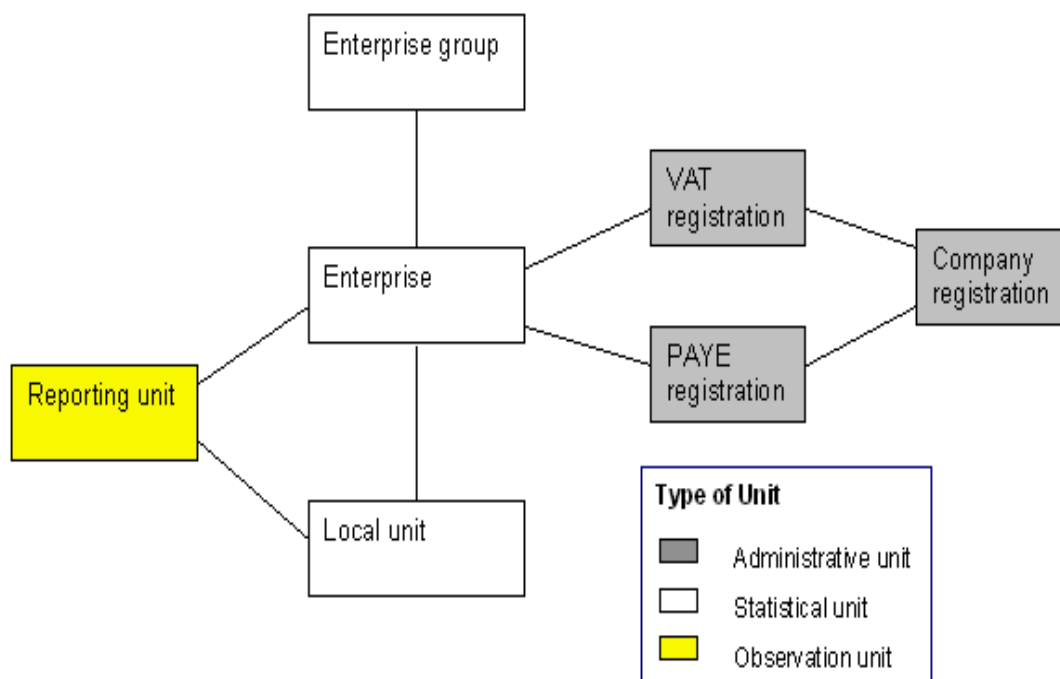

### Statistical Units:

- A group of legal units under common ownership is called an Enterprise Group.
- An **enterprise** can be defined as the smallest combination of legal units (generally based on VAT and/or PAYE records) that is an organisational unit producing goods or services, which benefits from a certain degree of autonomy in decision-making, especially for the allocation of its current resources. An enterprise carries out one or more activities at one or more locations. An enterprise may be a sole legal unit.
- A **local unit (or business site)** is an enterprise or part thereof (e.g. a workshop, factory, warehouse, office, mine or depot) situated in a geographically identified place.

### Observation Units:

- Reporting Units hold the mailing address to which the survey questionnaires are sent. The questionnaire can cover the enterprise as a whole, or parts of the enterprise identified by lists of local units.

The Businesses in Scotland publication is based on enterprise counts, with the exception of Table 8 and Table 13 which are based on business sites (or local units).

## 5. About the Estimates

The purpose of the publication is to provide information about the number of enterprises but the estimates also include information about enterprises' employment and turnover. The function of these data is to act as 'auxiliary variables' that can be used to (i) classify enterprises by employee/turnover size band and (ii) calculate shares of employment and turnover across industrial sectors, local areas, business

sizes etc. The nature of the underlying processes used to update these variables on the IDBR means that direct comparisons made using the absolute values are less reliable. (See Section 6.4 to 6.6)

Enterprises are counted only once in Scotland-level estimates (Tables 1-3, 14 and 15) or once each in each of the local authority areas or rural/urban areas they operate in (Tables 5-7, 9-11, 16, 18 and 20). Estimates of the number of business sites in each local authority area are provided in Table 8 and also by urban/rural area in Table 13. (See Section 12)

The estimates do not include turnover information for financial and insurance enterprises as it is not available on a comparable basis.

The figures for unregistered enterprises are estimated primarily using data from a sample survey (LFS), which is subject to sampling error – this should be considered when making year on year comparisons between the number of unregistered enterprises (these make up the majority of the smallest size band in Tables A-E).

## **Time Series**

The 2011 and 2012 publications introduced several methodological changes:

- All data are now published using the Standard Industrial Classification (SIC) 2007 only.
- In 2011 a number of changes were made to the methodology used to estimate the number of unregistered enterprises. See the [Methodology section](#) for more details.
- In 2012 improvements to HMRC computer systems led to previously excluded businesses being added to the IDBR. For Scotland, this resulted in 2,340 extra enterprises being added to the IDBR in 2012; these extra enterprises should have been included in previous years also.

The 2018 publication also introduces a new methodological tweak to constrain the estimates of unregistered jobs to the Scotland total.

The latest 2018 publication tables on the [Businesses in Scotland](#) website are consistent for the years 2010 to 2018 i.e. all methodological changes above have been applied back to 2010.

Older tables, available in the [Tables Archive](#), have not been updated to reflect the methodological changes and are therefore not consistent with the latest tables for 2010 to 2018.

However, a high level time series for total (registered and unregistered) enterprises and registered enterprises has been constructed for 2000 to 2018. This long time series has been produced on a consistent basis as far as possible – as follows:

- The registered time series has been adjusted upwards to take account of the 2,340 extra enterprises added to the IDBR in 2012. Note that this back revision is based on enterprises that were in operation in 2012, by using the birth dates of the enterprises they can be added into the stock estimates for back years. See Table 1 below.
- The unregistered time series has been adjusted upwards to take account of the improved unregistered enterprises estimation methodology. See table below.

### Constructed Back Series

Year	Original			Constructed Time Series		
	Registered	Unregistered	Total	Registered*	Unregistered**	Total
2000	148,635	89,195	237,830	148,665	89,230	237,895
2001	149,325	94,580	243,905	149,370	94,615	243,985
2002	149,560	102,655	252,215	149,615	102,695	252,310
2003	147,490	115,135	262,625	147,590	115,180	262,770
2004	149,025	122,980	272,005	149,180	123,025	272,205
2005	146,890	120,685	267,575	147,065	120,730	267,795
2006	147,490	119,670	267,160	147,745	119,715	267,460
2007	150,745	128,745	279,490	151,145	128,795	279,940
2008	154,635	127,490	282,125	155,285	127,540	282,825
2009	154,370	137,010	291,380	155,320	137,065	292,385

\* Adjusted for HMRC additions.

\*\* Adjusted based on relationship between estimates under old and latest methodology in 2010.

## 6. Registered Enterprises

### 6.1. Source

The Inter-Departmental Business Register (IDBR) is maintained by the Office for National Statistics (ONS) and is a database of all registered enterprises operating in the UK i.e. enterprises that are registered for VAT and/or PAYE. It covers 99% of economic activity in the UK. Those excluded are small sole traders or partnerships with no employees and an annual turnover of less than the VAT threshold.

When an enterprise registers/de-registers for VAT/PAYE with HMRC, this information is fed through to the IDBR. The reporting of de-registrations, however, can be subject to a number of time delays. For example when an enterprise closes there may be a delay before HMRC are informed. Closure of the VAT record may

then be delayed until all liabilities are settled. There may also be lags in recording PAYE data.

## **6.2. Time Period Covered**

The estimate of registered enterprises is based on a snapshot of the IDBR taken in March of each year (prior to 2005 the November snapshot was used). A Scottish extract provides a count of the IDBR enterprises that were “live” at the snapshot date. However, due to the time lags that often occur in recording de-registrations, an enterprise which had ceased trading by March but had outstanding business with HMRC may still be included on the IDBR at the time the extract is taken. Whilst this introduces some error into the data, this lag impacts on each year so the extracts are consistent over time.

## **6.3. Scope**

All tables in the ‘Businesses in Scotland’ Publication (excluding Table A, Table 4 and Table 12) focus on the private sector - that is companies, sole proprietors, partnerships, public corporations/nationalised bodies and not for profit organisations - and exclude central and local government. This differs from the headline estimates from the ONS publication “UK Business: Activity, Size and Location” which includes the public sector. Further information about other sources of business information is available in the information note [UK Business Data Sources](#).

## **6.4. Employment**

Prior to 2009, the employment information held on the IDBR was mainly drawn from the Business Register Survey and the employment part of the Annual Business Inquiry (ABI/1). The use of these sources caused a considerable time lag in the employment data, so that in each March extract, the majority of employment information was two years out of date i.e. employment estimates for 2009 were mainly based on data from 2007. For some enterprises, however, the employment data was more lagged than this.

The Business Register and Employment Survey (BRES) replaced and integrated the BRS and ABI/1 in 2009. For businesses that are surveyed by BRES, the regional and local estimates of employment are more accurate because, rather than producing data by an apportionment model, they are obtained directly from data reported at site level. Employment data is now updated on the IDBR on a monthly basis rather than annually, as updates are made as completed surveys are returned. This means that, at any point in time, employment data on the IDBR will be as accurate and up to date as possible, based on the survey returns that have been received at that time.

However, it also means that year on year comparisons made using point in time extracts of the IDBR will be less accurate as businesses are unlikely to return their forms at precisely the same time each year.

The most up to date employment information in 'Businesses in Scotland 2018' tends to be based on data from BRES 2017 (which asks businesses for their level of employment as at September 2017). For some enterprises the employment data will be more lagged than this.

It is important for users to be aware that time lags exist in the employment estimates in every year. However, the difference between the March 2009 and March 2010 extracts were particularly influenced by the change in BRES reporting.

Because BRES (and previously BRS/ABI1) is based on a sample of enterprises, estimates from previous returns and other ONS surveys are also used to update employment on the IDBR. For the smallest enterprises, either PAYE jobs or employment imputed from VAT turnover is used.

Note that the employment estimates refer to the number of employee jobs rather than the number of individual employees. A person who has more than one job will be counted once in each enterprise they work for. Furthermore, no distinction is made between full-time and part-time employees – both count as one employee.

## **6.5. Turnover**

On the IDBR, turnover for the majority of registered enterprises is based on VAT returns for a 12 month period. For 2018, these tend to relate to a 12 month period ending in December 2016, or January/February 2017, depending on the reporting pattern of the trader. For other records, in particular members of VAT group registrations; turnover may relate to an earlier period or survey data. For traders who have registered more recently, turnover represents the estimates made by traders at the time of registration. The turnover figures on the IDBR generally exclude VAT but include other taxes, such as the revenue duties on alcoholic drinks and tobacco.

## **6.6. Making Comparisons over Time**

The main purpose of the 'Businesses in Scotland' publication is to provide information about the number of enterprises which were operating in Scotland at the time of the IDBR snapshot in March but the estimates also include information about enterprises' employment and turnover. Sections 6.4 and 6.5 explained that these variables are updated on the IDBR via a number of sources and at different times. This makes it difficult to obtain accurate employment/turnover estimates on the IDBR because the figures for each enterprise may not relate to the same point in time. This should be considered if employment and turnover estimates are compared over time. The employment/turnover data should really be considered to be 'auxiliary variables' that

can be used to compare shares across industrial sectors or to determine how shares have changed over a period of several years.<sup>5</sup>

However, comparisons of enterprise counts can be made robustly. As the IDBR is a live register that is continually updated each time an enterprise registers/de-registers for VAT/PAYE, it can be taken as a reliable estimate of the number of enterprises in operation at any point in time. Since 'Businesses in Scotland' data is always based on a March extract of the IDBR, comparisons of enterprise counts from year to year can be considered reliable.

## **6.7. Exclusions**

Enterprises with no UK activity or dummy enterprises created to help with clerical procedures are excluded. Enterprises which have zero employment and zero turnover are also excluded as they are holding companies whose activity is recorded elsewhere or are enterprises not contributing to the economy at the time of the estimates.

There were a few instances where several registrations for a single company (usually VAT registrations) occurred at the same address. This may be a result of a legal loophole created as a result of changes in legislation. The Office for National Statistics now exclude these from their publications as the figures would overstate the actual number of businesses in existence and their associated employment in local area tables. Please note the estimates for 2000 and 2001 have not been amended to reflect these changes.

## **6.8. Major Reclassifications**

### Historic Reclassifications

The number of public corporations in Scotland decreased from 60 businesses in 2014 to 35 businesses in 2015 – this was largely as a result of the reclassification of Lloyds Banking Group plc. On 30th April 2014, the Office for National Statistics (ONS) announced the reclassification of Lloyds Banking Group plc. (and subsidiaries) as a former Public Corporation into the private sector. More information on this can be found in [Classification of Lloyds Banking Group and Subsidiaries](#).

On 17<sup>th</sup> December 2013, the Office for National Statistics (ONS) announced that from 1<sup>st</sup> September 2014, Network Rail would be reclassified as a Central Government body in the public sector. This change can be most clearly seen in Table 4 of the Businesses in Scotland publication, where public sector employment in the 'H Transportation and storage' sector increased by 2,850 (+87%) between 2014 and 2015. More information on this can be found in [Classification of Network Rail](#).

---

<sup>5</sup> More detailed comparisons can be obtained via [BRES](#) (for employee jobs) or [Scottish Annual Business Statistics](#) (for turnover).

Colleges of Further Education were re-classified by the Office for National Statistics to the public sector in October 2010 for the purposes of National Accounts. The change transferred 35 enterprises from the business sector to the public sector from the March 2011 results onwards. This reclassification has not been applied back to previous years' estimates.

Primary Care NHS Trusts and all remaining NHS Trusts were re-classified by the Office for National Statistics to the public sector in 2001 and 2003 respectively. This was done to bring the 2003 Standard Industrial Classification in line with international guidelines for National Accounts. The change transferred 54,200 and 95,530 jobs from the business sector to the public sector in 2001 and 2003. This has led to a discontinuity between tables as tables previously included this employment.

## **7. Unregistered Enterprises**

A large number of very small firms are excluded from the IDBR because they are small sole traders/partnerships with no employees and an annual turnover of less than the VAT threshold. This section describes the method used to estimate the number of unregistered enterprises in Scotland.

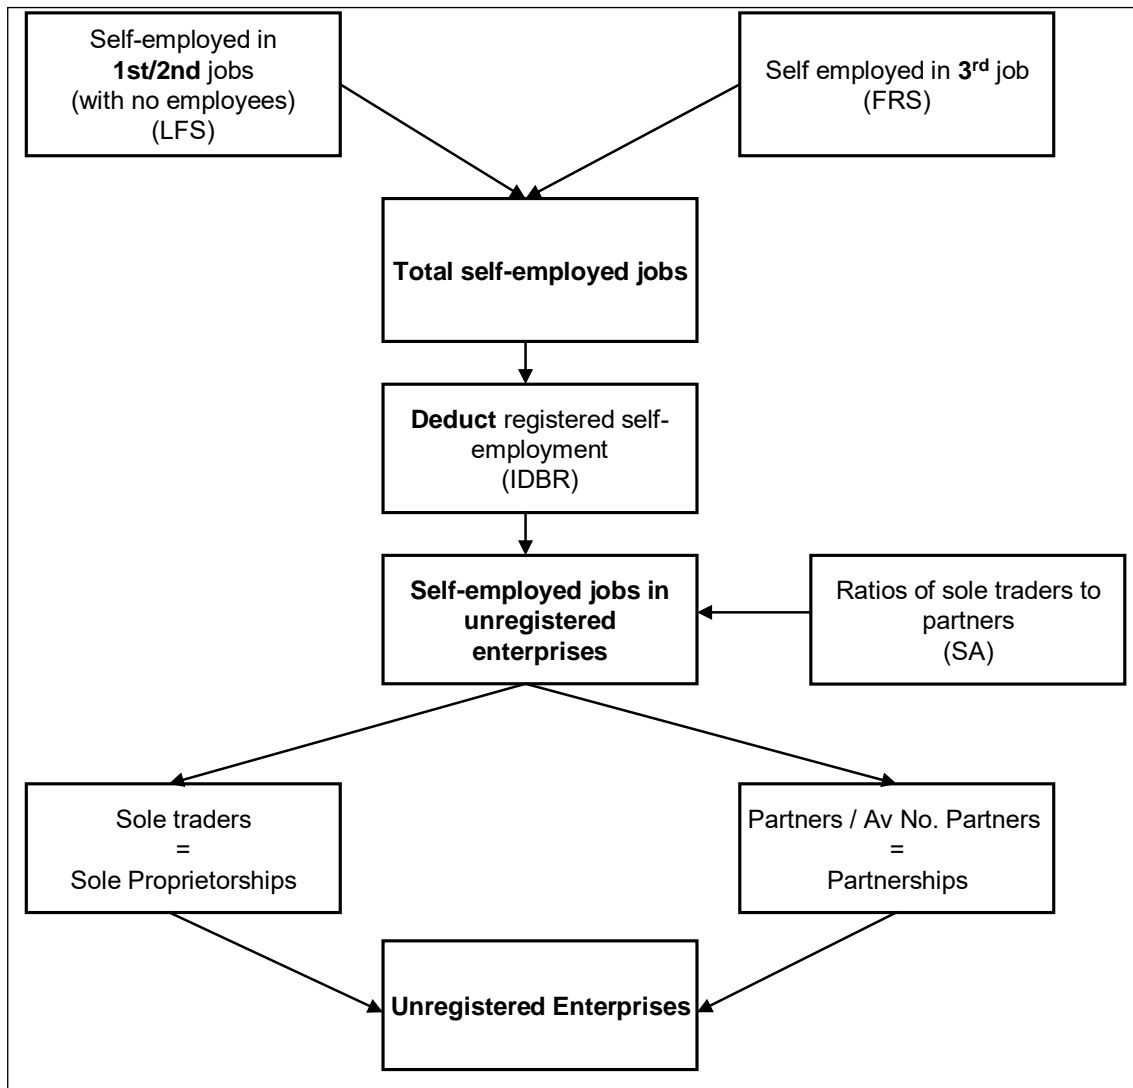

### **7.1. Estimation**

The Labour Force Survey (LFS) provides data on the number of people who are self-employed in their first or second jobs (with no employees). A new methodology has been applied to the estimates from 2010 onwards; the new methodology enables a better estimate of the self-employed to be obtained by reclassifying people who have misclassified their employment status. More information on this improvement can be found in the [‘Methodology Changes’ information note](#).

The LFS figure for second jobs is augmented by data from the Family Resources Survey (FRS) on people who are self-employed in a third job, to obtain an estimate of the total number of self-employed jobs (with no employees). This estimate is compared to the level of self-employment that is already registered on the IDBR in enterprises (sole traders/partnerships) with no employees. As many self-employed people are not required to pay VAT or register for PAYE, the figure from the LFS/FRS is generally higher.

The difference between these two figures (self-employed jobs in unregistered enterprises) is the starting point for estimating the number of additional sole traders and partners with no employees. The ratio between sole traders and partners is different in each industry and is obtained via HMRC Self Assessment (SA) data. Previously the Survey of Personal Incomes (SPI) was used for this purpose but delays with updated data and more stringent disclosure control processes meant that it was necessary to use a different source. Please see the [‘Methodology Changes’ information note](#) for more information about the effects of using SA data.

**Diagram 1: Estimating Unregistered Enterprises**

The ratios are used to derive the number of unregistered sole traders and partners in each industry and hence the number of sole proprietorships and partnerships.

Note that each of the sample surveys above are subject to sampling error. For example a yearly estimate of 300,000 taken from the Annual Population Survey (annual version of the Labour Force Survey (LFS)) has a 95% confidence interval of +/- 12,000. This sampling error should be considered when making year on year comparisons between the number of unregistered enterprises (the smallest size band in Tables A-E).

## 7.2. Time Period Covered

The estimate of unregistered enterprises is driven by the self-employment estimates from the Labour Force Survey. The LFS data that is used covers the period April to March, i.e. the estimate of unregistered enterprises for 2018 is derived from annual LFS data covering April 2017 to March 2018.

The FRS data used to estimate the number of people self-employed in a third job relative to those who are self-employed in a second job is based on a three year rolling average percentage. The 2018 estimates are based on FRS data from 2014/15, 2015/16 and 2016/17.

Self-Assessment data as at 2016/17 were used to obtain the ratio of sole traders to partners for the 2018 estimates.

### **7.3. Turnover**

Turnover in unregistered businesses will generally be lower than that of registered businesses of the same size, as turnover in the former would usually be below the VAT threshold. Turnover for the unregistered enterprises is imputed from turnover per head of registered sole traders and partners with zero employees in each industry division and then scaled down by a factor of a half. For a few 2-digit industry divisions, this still leaves average annual turnover per unregistered business above the VAT threshold. In these cases, the unregistered turnover is reduced to the VAT threshold for that year.

## **8. Industrial Classification**

The industrial sectors presented in the tables are defined by the UK Standard Industrial Classification (SIC). This is used to classify business establishments and other statistical units by the type of economic activity in which they are engaged.

### **8.1. Assigning Enterprises to Industrial Sectors**

Enterprises may have business sites operating in several industrial sectors. The enterprise as a whole is assigned to one sector based on the sector and then division in which the majority of its Scottish employment is found. A change in the balance of employment across sites can therefore lead to some enterprises changing their sector between years.

Table 8 provides sector classification at business site level rather than enterprise level.

The classification for this publication follows the standard coding scheme. Some titles have been shortened to make them more readable. The tables generally exclude central and local government (as defined by the legal status of the enterprise). The small number of enterprises that provide support services to public administration are, for these tables, included within the sector 'Other community social and personal services'. Extra territorial organisations and private households with employees are excluded.

### **8.2. Revision of Standard Industrial Classification**

In January 2008, the Standard Industrial Classification underwent a major revision to enable it to more accurately reflect the structure of the modern economy and SIC 2003 was replaced by SIC 2007. The revision was motivated by the need to adapt the classification to changes in the world economy. The revised classification reflects the growing importance of service activities in economies over the last fifteen years, mainly due to the developments in information and communications technologies.

The Businesses in Scotland 2018 tables provide data on registered enterprises for 2010 to 2018 on a SIC 2007 basis. Tables for unregistered enterprises (and hence total enterprises) are available on a SIC 2007 basis for 2010 to 2018. Time series data on total (unregistered and registered) and registered enterprises has also been made available from 2000 to 2018. Data on the old SIC 2003 basis is still available on the Scottish Government website but note that archived tables have not been updated with the latest methodology.

## 9. VAT Thresholds

Operative Dates	VAT Registration Threshold
01 Apr 1999 – 31 Mar 2000	£51,000
01 Apr 2000 – 31 Mar 2001	£52,000
01 Apr 2001 – 24 Apr 2002	£54,000
25 Apr 2002 – 09 Apr 2003	£55,000
10 Apr 2003 – 31 Mar 2004	£56,000
01 Apr 2004 – 31 Mar 2005	£58,000
01 Apr 2005 – 31 Mar 2006	£60,000
01 Apr 2006 – 31 Mar 2007	£61,000
01 Apr 2007 – 31 Mar 2008	£64,000
01 Apr 2008 – 30 Apr 2009	£67,000
01 May 2009 – 31 Mar 2010	£68,000
01 Apr 2010 – 31 Mar 2011	£70,000
01 Apr 2011 – 31 Mar 2012	£73,000
01 Apr 2012 – 31 Mar 2013	£77,000
01 Apr 2013 – 31 Mar 2014	£79,000
01 Apr 2014 – 31 Mar 2015	£81,000
01 Apr 2015 – 31 Mar 2016	£82,000
01 Apr 2016 – 31 Mar 2017	£83,000
01 Apr 2017 –	£85,000

Further details on VAT thresholds can be found via the following link – [HM Revenue & Customs](#).

## 10. Size Bands

In the tables (with the exception of Table 8), enterprises are classified by employee size bands on the basis of their total UK employees. The rationale behind this approach is that the size of the overall enterprise determines its behaviour as an

economic agent. An enterprise with a large number of employees in the UK as a whole is likely to behave like a large enterprise, regardless of its level of Scottish employment. An information note about the effects of using size bands based on UK rather than Scottish employees is available at:

<http://www2.gov.scot/Topics/Statistics/Browse/Business/Corporate/sizebands>

Table 8 contains data on the number of business sites and is classified by the total number of employees at each site.

Enterprises with only one employee (who is also the employer) are treated as a self-employed person working in a firm with zero employees unless the enterprise is part of an enterprise group. As these companies provide no employment for others it is more consistent to classify them as enterprises with no employees.

## 11. Public Sector

Public sector enterprises are involved in more varied activities than the majority of those in the private sector, so Table 4 (and Table 12) accounts for this by counting each enterprise once in each sector it has activity in. This helps to provide a more realistic impression of public sector activity in each industry. However, in order to provide accurate figures at Scotland level, each enterprise is counted only once in the total, therefore the table components do not equal the overall total.

Public sector employee jobs estimates at the local authority area level are available via the ONS publication [Business Register Employment Survey](#).

## 12. Geographical Analyses

The geographical analyses use a postcode index file from the Office for National Statistics. Unregistered enterprises are not included in the geographical analyses.

Tables 5-7,16,18,20: These tables split the data by local authority area. They include each enterprise once in each local authority it operates in, irrespective of how many business sites it has in each area. As in Table 4, each enterprise is only counted once in the total for Scotland, hence cells in the enterprise column of the tables do not sum to the overall total due to double counting.

Note that only enterprises are double-counted in these tables – enterprises' employment and turnover, where provided, are assigned to the local authority areas they operate in.

Tables 8, 13: Table 8 (and Table 13) present data on individual business sites within each local authority area (and urban/rural area for Table 13).

This is a straightforward count of the number of sites located in each local authority area (and urban/rural area for Table 13). Note that in Table 8 the employee size bands are based on the number of employees at each site.

Tables 9-11: These tables split the data by urban/rural area. They include each enterprise once in each area it operates in, irrespective of how many business sites it has in each area. As in Tables 5-7, each enterprise is only counted once in the total for Scotland, hence cells in the enterprise column of the tables do not sum to the overall total due to double counting.

Note that only enterprises are double-counted in these tables – enterprises' employment and turnover, where provided, are assigned to the urban/rural areas they operate in.

Data on the total number of business sites at intermediate-zone will be made available on the <http://statistics.gov.scot/> site in November 2018.

### **13. Business Ownership**

Within Businesses in Scotland, business ownership is defined as:

- UK (Scotland based)
- UK (Rest of the UK (RUK) based)
- Abroad

Country of ownership is either UK or Abroad (outside the UK). Business country of ownership is determined by the nationality of the ultimate parent of the business (i.e. the institutional unit, proceeding up a business' chain of control, which is not controlled by another institutional unit). Where control of the business is shared, country of ownership is determined by the country of residence of the majority ultimate owner. Enterprise groups with foreign ownership are identified using data provided by Dun & Bradstreet. All businesses that do not belong to an enterprise group, and are therefore not under the control of another institutional unit, are classified as UK-owned.

Once it is determined that an enterprise is UK owned, the next step is to classify businesses into whether they are Scotland registered or registered in the Rest of the UK (RUK). Enterprises, and their associated local units, are classified as Scotland registered if the enterprise's VAT/PAYE registered office address is in Scotland. Enterprises, and their associated local units, are classified as registered in RUK if the enterprise's VAT/PAYE registered office address is, outside Scotland, elsewhere in the UK.

### **14. Statistical Disclosure Control**

The confidentiality of all data held on the IDBR is protected by the Code of Practice for Official Statistics and by specific legislation. The disclosure of data relating to individual undertakings without consent is prohibited under the Statistics of Trade Act 1947, the Value Added Tax Act 1994 and the Finance Act 1969. In accordance with these requirements, measures have been taken to ensure that no information about individual enterprises or local units are disclosed. All figures in this publication have been rounded to avoid disclosure, and where necessary additional measures have been taken to protect confidentiality.

The number of enterprises/business sites are rounded to the nearest 5, employment is rounded to the nearest 10 and turnover is rounded to the nearest £million.

The statistical disclosure control process was updated for the 2010 results onwards. Previously, a minimum threshold rule was applied, whereby the employment and turnover values associated with enterprise counts below a certain threshold were suppressed. To avoid disclosure by deduction, additional cells were also suppressed. To further minimise disclosure, the minimum threshold was lowered and an additional dominance rule was introduced. The dominance rule identifies and suppresses cells where a small number of enterprises account for the majority of the associated employment or turnover. The overall effect of these changes is that more information is included in the tables but greater protection is provided for enterprises which dominate their respective industry or local area.

## **15. Revisions Policy**

### **15.1. General Revisions Policy for Unregistered Enterprises**

LFS self-employment data is the basis for the estimate of unregistered jobs, which lead to the estimate of unregistered enterprises. ONS reweight the LFS data according to the latest population estimates. As a result, we will revise the unregistered time series to take account of the reweighted LFS data. These revisions are generally small in magnitude – we will revise to take account of the latest LFS data on a biennial basis (every two years). We may also make improvements to the unregistered enterprise methodology.

### **15.2 Unregistered Enterprises – latest revisions**

The unregistered estimates for 2010 to 2017 have been revised to take account of a new methodological change to the unregistered jobs estimates – the unregistered jobs estimates are now constrained to the Scotland total unregistered jobs, where in previous years the sum of the sectoral unregistered jobs had been used. Constraining to the Scotland total ensures that the LFS data is used in the most robust way possible given the scale of the sampling error associated with the LFS self-employment data. See the [revisions tables](#) to see the impact that this has made

on the overall figures. The next set of revisions for the unregistered estimates will be in the Businesses in Scotland 2019 publication to take account of the latest LFS reweighted data and any other methodological improvements.

### **15.3. General Revisions Policy for Registered Enterprises**

In general, the figures for registered enterprises should be final and should not be revised in future, since they are based on a snapshot in time from the IDBR which cannot change. However sometimes, when quality assuring the data for the latest year, errors in terms of the industry or geographical classifications applied to businesses may come to light in which case we may correct the erroneous business classifications in previous years.

### **15.4. Registered Enterprises – latest revisions**

The registered estimates have been revised back this year – a small number of enterprises have had their industrial and geographical classifications revised back to 2010. See the [revisions tables](#) to see the impact that this has made on the figures broken down by sector.

## **16. Making comparisons with other business statistics**

### **16.1. Business Stock Data published by ONS and BEIS**

Business stock estimates for the UK and all regions of the UK (including Scotland) are published by the Office for National Statistics (ONS) and the Department for Business, Energy and Industrial Strategy (BEIS). A key difference between the UK series for Scotland and the ‘Businesses in Scotland’ publication estimates is that ‘Businesses in Scotland’ includes all enterprises that operate in Scotland regardless of where the business is based. There are other differences between the publications, and these are explained in the following on-line information notes: <http://www2.gov.scot/Topics/Statistics/Browse/Business/Corporate/ukbusiness>

### **16.2. Scottish Annual Business Statistics**

Scottish Annual Business Statistics (SABS) is another publication released by the Scottish Government. The source of the SABS is the Annual Business Survey. The main purpose of SABS is to provide information on the performance of detailed industry sectors of the Scottish economy, predominately, in terms of turnover or gross value added. As discussed, in section 6.6 above, the employment and turnover estimates provided in the ‘Businesses in Scotland’ publication are not ideal for comparing change in employment or turnover over time. Scottish Annual Business Statistics is the best source for comparing turnover change over time for detailed industry sectors. More information on the key differences between Scottish Annual Business Statistics and the ‘Businesses in Scotland’ publication (formerly Scottish Corporate Sector Statistics) is available at:

<http://www2.gov.scot/Topics/Statistics/Browse/Business/SourcesandSuitability/KeyDifferences>

## Contact Details

If you have any enquiries relating to Business Statistics then please contact us at:

Email: [industrystatistics@gov.scot](mailto:industrystatistics@gov.scot)

Telephone: 0131 244 6813

Post: Scottish Government  
Business and Enterprise Statistics  
Office of the Chief Economic Adviser  
5 Atlantic Quay  
150 Broomielaw  
Glasgow

We welcome any comments on both the format and content of the website, including any problems you may encounter.

You may also contact the Statistician Group Enquiries for general information.

# Links to area within the Scottish Government

## [statistics.gov.scot](https://statistics.gov.scot)

statistics.gov.scot is the Open Data Platform for official statistics for Scotland. On the site you can access a range of official statistics about Scotland for information and re-use. You can explore the data by theme, organisation, or geography. You can also search for datasets, places or enter your postcode to find data about your local area. The data can be viewed as tables, maps and charts or downloaded in various formats.

## [Growth Sector Statistics Database](#)

The Growth Sector statistics database provides economic statistics for the growth sectors (also known as key sectors) as set out in the [Scotland's Economic Strategy 2015](#).

## [Scottish Annual Business Statistics](#)

Scottish Annual Business Statistics (SABS) provides data mainly on the Production (including Manufacturing), Construction and Service Sectors in Scotland. The Annual Business Survey, from which the statistics are largely derived, covers approximately two thirds of the economy. The main sectors not covered are the financial sector & parts of agriculture and the public sector. These statistics are therefore best suited to the analysis of individual industries rather than the economy as a whole.

## [Business, Enterprise and Energy - Data Sources and Suitability](#)

For background on Businesses in Scotland (formerly Scottish Corporate Sector Statistics) and Scottish Annual Business Statistics (SABS) as data sources including comparison of their differences.

# Links to websites outside the Scottish Government

Please note that when accessing the following links you will leave the Scottish Government website. The Scottish Government and its staff are not responsible for content external to this website.

## [Business Population Estimates](#)

Produced by the Department for Business, Energy and Industrial Strategy, the Business Population Estimates publication is the main UK equivalent of Businesses in Scotland and provides business information for each Government Office Region in the UK broken down by company size and industry. It includes information about registered and unregistered enterprises.

## [UK Business: Activity, Size and Location](#)

The publication UK Business: Activity, Size and Location is produced by the Office for National Statistics (ONS) and contains detailed information on all registered businesses in the UK including size, classification and location.

## [Business Demography](#)

Statistics on Enterprise Births, Deaths and Survival are released annually by the ONS. They are the best official source on business start-ups, closures and survival rates and provide detailed information by local authority, region and industrial sector at a UK level.

The information note [UK Business Data Sources](#) provides more detail about the three publications above and, in particular, explains the key differences between them and Scottish Corporate Sector Statistics (now known as Businesses in Scotland).

## [IDBR](#)

For more information on the Inter Departmental Business Register (IDBR) please see the link above.

## [Business Register and Employment Survey \(BRES\)](#)

Business Register and Employment Survey (BRES) is the preferred source for employment estimates by industry for regional and sub-regional geographies. Data is released annually in September.

## [Public Sector Employment \(PSE\)](#)

Public Sector Employment (PSE) is the preferred source of *public sector* employment data is the National Statistics Public Sector Employment (PSE) series. This is published quarterly by ONS and the Scottish Government and provides

employment estimates at national and regional (government office) level based on public sector returns.

### **Virtual Microdata Laboratory (VML)**

The Virtual Microdata Laboratory (VML) is a facility within the Office for National Statistics (ONS) for providing secure access to sensitive detailed data for statistical research purposes that serve the public good. Access is provided for Approved Researchers working on defined and approved projects. Available data sources include business surveys, social surveys and Census samples. For information, a remote lab is located in Glasgow.

### **UK Data Service**

The UK Data Service is a comprehensive resource funded by the ESRC to support researchers, teachers and policymakers who depend on high-quality social and economic data. It is a single point of access to a wide range of secondary data including large-scale government surveys, international macrodata, business microdata, qualitative studies and census data.

### **Scottish Business Information Service**

Scottish Business Information Service (SCOTBIS) provides a research service for businesses across Scotland. SCOTBIS is based on the vast resources of the National Library of Scotland (NLS). At NLS you can access market research reports, business databases, international directories, and business and trade journals.

Source : Scottish Government, ONS (IDBR)

Notes:

1. Excludes central and local government.
2. Sizeband is based on the number of employees that the enterprise employs across the UK.
3. To enable a robust comparison over time, this time series has been produced on a consistent basis as far as possible using the latest methodology. These estimates supersede those published in previous Businesses in Scotland and Scottish Corporate Sector Statistics publications.

Source : Scottish Government, ONS (IDBR)

Notes:

1. Excludes central and local government.
2. Sizeband is based on the number of employees that the enterprise employs across the UK.
3. To enable a robust comparison over time, this time series has been produced on a consistent basis as far as possible using the latest methodology. These estimates supersede those published in previous Businesses in Scotland and Scottish Corporate Sector Statistics publications.
4. HMRC provide information on VAT/PAYE registrations, which forms the basis of the Inter Departmental Business Register (IDBR). In 2012, improvements to HMRC computer systems led to previously excluded businesses being added to the IDBR. For Scotland, this resulted in 2,340 extra enterprises being added to the IDBR in 2012; these extra enterprises should have been included in previous years also. This step change has been taken back in the Scottish statistics as far as possible so as not to hinder time series analysis. This has resulted in the registered enterprises count being revised upwards for previous years when compared to data published in Scottish Corporate Sector Statistics 2011.

Source: Scottish Government, ONS (IDBR)

Note: Totals may not equal the sum of the constituent parts due to rounding.

1. Excludes central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
3. [For advice about comparing employment over time please see the Methodology note.](#)
4. Turnover data for financial intermediation enterprises are not available.
5. Sizeband refers to the number of employees that the enterprise employs across the UK.

Source: Scottish Government, ONS (IDBR)

1. Excludes central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
3. Sizeband refers to the number of employees that the enterprise employs across the UK.

Note: Totals may not equal the sum of the constituent parts due to rounding.

Source: Scottish Government, ONS (IDBR)

1. Excludes central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
3. Sizeband refers to the number of employees that the enterprise employs across the UK.

Source: Scottish Government, ONS (IDBR)

1. Turnover figures quoted are in £ millions.
2. Turnover data for financial intermediation enterprises are not available.
3. Excludes central and local government.
4. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
5. Sizeband refers to the number of employees that the enterprise employs across the UK.

For more information on Definitions and Methodology - please click here

Source : Scottish Government, ONS (IDBR)

Notes:

- Excludes central and local government.
- Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
- For more information on Standard Industrial Classification 2007 - please click here.
- Sizeband is based on the number of employees that the enterprise employs across the UK.
- Turnover for financial and insurance activities enterprises are not available on a comparable basis.

For more information on Definitions and Methodology - please click here

- Excludes central and local government.
- Turnover data for financial intermediation enterprises are not available on a comparable basis.
- For more information on Standard Industrial Classification 2007 - please click here.
- For this analysis enterprises were classified as based in Scotland if the enterprise address was in Scotland.  
Foreign based companies were classified in the same way, i.e. they were regarded as based in Scotland if their main UK address was in Scotland.
- Sizeband is based on the number of employees that the enterprise employs across the UK.

For more information on Definitions and Methodology - please click here

Source : Scottish Government, ONS (IDBR)

- This data only refers to central and local government.
- Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
- For more information on Standard Industrial Classification 2007 - please click here.
- Counts of the number of enterprises operating within each sector have been derived from an analysis at business site level. These do not sum to the total, as the same enterprise may operate in more than one sector.
- Primary industries include Agriculture, forestry and fishing, Mining and quarrying and Electricity, gas and water supply.

Note: Totals may not equal the sum of the constituent parts due to rounding.

Source: Scottish Government, ONS (IDBR)

1. Excludes central and local government.

2. Turnover for financial and insurance activities enterprises are not available. Totals exclude turnover of such enterprises.

3. For more information on Standard Industrial Classification 2007 - please click here.

4. Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.

5. Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.

Note that only enterprises are double-counted in these tables – each enterprise's employment and turnover are assigned to the local authorities they operate in therefore the sum of these columns do correspond to the Scotland totals.

6. Sizeband is based on the number of employees that the enterprise employs across the UK.

For more information on Definitions and Methodology - please click here

Table 6: Number of registered enterprises<sup>1,2</sup> by Local Authority area<sup>3</sup>, employee sizeband and sector<sup>4</sup>  
March 2010-2018

Year	Local Authority	Employee Sizeband	A Agriculture, Forestry and Fishing	B Mining and Quarrying	C Manufacturing	D Electricity, gas, steam and air conditioning supply	E Water supply; Sewerage, waste management and remediation activities	F Construction	G Wholesale and retail trade; Repair of motor vehicles and motorcycles	H Transportation and storage	I Accommodation and food service activities	J Information and communication	K Financial and insurance activities	L Real estate activities	M Professional, scientific and technical activities	N Administrative and support service activities	P Education	Q Human health and social work activities	R Arts, entertainment and recreation	S Other service activities	Total

Note: Totals may not equal the sum of the constituent parts due to rounding.

Source: Scottish Government, ONS (IDBR)

- Excludes central and local government.
- Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the 2011 results compared to data for earlier years.
- Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.
- For more information on Shetland's historical classification, please click here.
- Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.
- Sizeband is based on the number of employees that the enterprise employs across the UK.

For more information on Definitions and Methodology - please click here

Table 7: Number of registered enterprises<sup>1</sup> in Scotland and their total Scottish employment and turnover<sup>2</sup> by Local Authority area<sup>3</sup> and sector<sup>4</sup>  
March 2010-2018

Note: Totals may not equal the sum of the constituent parts due to rounding.

\* not available due to confidentiality constraints

1. Excludes central and local government.

2. Turnover for financial and insurance activities enterprises are not available on a comparable basis. Totals exclude turnover of such enterprises.

3. Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.

4. For more information on Standard Industrial Classification 2007, please click here.

5. Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.

Note that only enterprises are double-counted in these tables – each enterprise's employment and turnover are assigned to the local authorities they operate in therefore the sum of these columns do correspond to the Scotland totals.

Source: Scottish Government, ONS (IDBR)

1. Excludes central and local government.
2. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges (and any associated employment/turnover) from the private/business sector to the public sector. This change has not been applied to historical data, and therefore represents a step change in the results from 2011 onwards.
3. Includes June 2002 LA boundary changes between The City of Edinburgh & West Lothian and Glasgow City & Renfrewshire.
4. For more information on Standard Industrial Classification 2007 - please click here.
5. Sites are allocated a Sizeband by their total number of employees at that business site.

Source : Scottish Government, ONS (IDBR)

Note: Totals may not equal the sum of the constituent parts due to rounding.

1. Excludes central and local government.
2. Urban/rural classification according to 2016 sixfold classification. Data by previous urban/rural classification is available on request.
3. Turnover for financial and insurance activities enterprises are not available. Totals exclude turnover of such enterprises.
4. Counts of the number of enterprises operating within each urban/rural classification have been included. These do not sum to the total for Urban Areas, Rural Areas and Scotland, as the same enterprise may operate in more than one type of area.
5. Sizeband is based on the number of employees that the enterprise employs across the UK.

Note: Totals may not equal the sum of the constituent parts due to rounding.

1. Excludes central and local government.
2. Urban/rural classification according to 2016 sixfold classification. Data by previous urban/rural classification is available on request.
3. For more information on Standard Industrial Classification 2007 - please click here.
4. Turnover for financial and insurance activities enterprises are not available. Totals exclude turnover of such enterprises.
5. Counts of the number of enterprises operating within each urban/rural classification have been included. These do not sum to the total for Urban Areas, Rural Areas and Scotland, as the same enterprise may operate in more than one type of area.

\* not available due to confidentiality constraints

1. Excludes central and local government

2. Counts of the Number of enterprises operating within each urban/rural classification have been included. These do not sum to the total for Urban Areas, Rural Areas and Scotland, as the same enterprise may operate in more than one type of area.

3. Urban/rural classification according to 2016 sixfold classification. Data by previous urban/rural classification is available on request.

4. For more information on Standard Industrial Classification 2007 - please click here.

5. Turnover data for Financial and insurance activities exclude the turnover of financial intermediation enterprises as it is not available on a comparable basis.

6. Sizeband is based on the Number of employees that the enterprise employs across the UK.

Source : Scottish Government, ONS (IDBR)

- This data only refers to central and local government.
- For more information on Standard Industrial Classification 2007 - please click here.
- Urban/rural classification according to 2016 sixfold classification - this uses a datazone to urban/rural look-up i.e. the urban/rural category is applied according to the urban/rural classification of the datazone that the business site falls within. Data by previous urban/rural classification is available on request.
- Counts of the number of enterprises operating within each urban/rural classification have been included.  
These do not sum to the total for Scotland, as the same enterprise may operate in more than one type of area.
- Counts of the number of enterprises operating within each sector have been derived from an analysis at business site level. These do not sum to the total, as the same enterprise may operate in more than one sector.
- Primary industries include Agriculture, forestry and fishing, Mining and quarrying and Electricity, gas and water supply.

Source : Scottish Government, ONS (IDBR)

1. Excludes central and local government.

2. A business site (or local unit) refers to each individual shop, factory, restaurant etc that is part of an enterprise e.g. A large supermarket chain is considered to be one 'enterprise'. Each individual store that forms part of this supermarket chain is known as a 'business site'.

3. Urban/rural classification according to 2016 sixfold classification. Data by previous urban/rural classification is available on request.

Note: Totals may not equal the sum of the constituent parts due to rounding.

\* not available due to confidentiality constraints

- no registered enterprises present in Scotland

Source: Scottish Government, ONS (IDBR)

1. Excludes central and local government.

2. The IDBR uses data provided by Dun & Bradstreet to identify enterprise groups with foreign ownership and/or subsidiaries.

3. Turnover for financial and insurance activities enterprises are not available. Totals exclude turnover of such enterprises.

4. Each enterprise is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures. Note that only enterprises are double-counted in these tables  
 - each enterprise's employment and turnover are assigned to the local authorities they operate in therefore the sum of these columns do correspond to the Scotland totals.

## National Indicator: The number of businesses<sup>1</sup>

Table 17: Number of registered enterprises<sup>2</sup> per 10,000 resident adults<sup>3</sup>

Year	Number of Businesses	Resident Adult Population (aged 16+)	Business Stocks per 10,000 resident adults

National Records of Scotland (Mid-year population estimates)

1. This is part of the "Fair Work and Businesses" National Outcome

2. Excludes central and local government.

3. The rate for 2018 will be revised when the 2018 mid-year population estimates are published in April 2019.

4. Each enterprise (stock) is counted once in each local authority it operates in. The sum of the local authority enterprises do not equal the overall Scotland totals because each enterprise is only counted once in the Scotland figures.

## National Indicator: High growth businesses<sup>1</sup>

Table 19: High growth enterprises as a share of registered enterprises<sup>2</sup>

Years	High Growth Businesses	All Businesses	High Growth Percentage Share
2010-2013	1,255	160,050	0.8%
2011-2014	1,515	166,525	0.9%
2012-2015	1,925	170,335	1.1%
2013-2016	2,060	173,995	1.2%
2014-2017	2,075	176,400	1.2%
2015-2018	1,820	176,295	1.0%

Source: Scottish Government, ONS (IDBR)

[1. This is part of the "Fair Work and Businesses" National Outcome](#)

2. Excludes central and local government.

3. High growth enterprise is defined as an enterprise with 10+ employees in the base year (x-3) exhibiting an average of 20% growth over three years in terms of turnover. In practice, average annualised growth of 20% per annum over three years would be equal to 72.8% growth from year x-3 to year x.

4. Enterprises are classified by total Scottish turnover.

5. On the IDBR, turnover for the majority of registered enterprises is based on VAT returns for a 12 month period. For 2018 these relate to a 12 month period ending in December 2016, or January/February 2016, depending on the reporting pattern of the trader.

6. High growth excludes Financial and Insurance Activities (SIC2007) enterprises since turnover are not available on a comparable basis.

Source: Scottish Government, ONS (IDBR)

1. This is part of the 'Fair Work and Businesses' National Outcome

2. Excludes central and local government

3. Sizeband is based on the number of employees that the enterprise employs across the UK as at the initial year of March, i.e. March year x-3.

4. For more information on Standard Industrial Classification 2007 - please click here.

5. The IDBR uses data provided by Dun & Bradstreet to identify enterprise groups with foreign ownership and/or subsidiaries.

6. UK - Scotland based businesses are enterprises that are UK-owned and that have their registered office in Scotland.

7. High growth enterprise is defined as an enterprise with 10+ employees in the base year (x-3) exhibiting an average of 20% growth over three years in terms of turnover. In practice, average annualised growth of 20% per annum over three years would be equal to 72.8% growth from year x-3 to year x.

8. Enterprises are classified by total Scottish turnover.

9. On the IDBR, turnover for the majority of registered enterprises is based on VAT returns for a 12 month period.

For 2015 these relate to a 12 month period ending in December 2016, or January/February 2016, depending on the reporting pattern of the trader.

10. High growth excludes Financial and Insurance Activities (SIC2007) enterprises since turnover are not available on a comparable basis.

For more information on Definitions and Methodology - please click here.

## **A National Statistics publication for Scotland**

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be interpreted to mean that the statistics: meet identified user needs; are produced, managed and disseminated to high standards; and are explained well.

### **Correspondence and enquiries**

For enquiries about this publication please contact:

Marina Curran,  
Office of the Chief Economic Adviser,  
Telephone: 0131-244-6813,  
e-mail: [industrystatistics@gov.scot](mailto:industrystatistics@gov.scot)

For general enquiries about Scottish Government statistics please contact:

Office of the Chief Statistician, Telephone: 0131 244 0442,  
e-mail: [statistics.enquiries@gov.scot](mailto:statistics.enquiries@gov.scot)

### **How to access background or source data**

The data collected for this statistical bulletin publication>:

- are available in more detail through [Statistics.gov.scot](http://Statistics.gov.scot)
- may be made available on request, subject to consideration of legal and ethical factors. Please contact [industrystatistics@gov.scot](mailto:industrystatistics@gov.scot) for further information.
- cannot be made available by Scottish Government for further analysis as Scottish Government is not the data controller.

### **Complaints and suggestions**

If you are not satisfied with our service or have any comments or suggestions, please write to the Chief Statistician, 2W, St Andrews House, Edinburgh, EH1 3DG, Telephone: (0131) 244 0302, e-mail [statistics.enquiries@gov.scot](mailto:statistics.enquiries@gov.scot).

If you would like to be consulted about statistical collections or receive notification of publications, please register your interest at [www.gov.scot/scotstat](http://www.gov.scot/scotstat)  
Details of forthcoming publications can be found at [www.gov.scot/statistics](http://www.gov.scot/statistics)
