

The Scottish Federation for Coarse Angling has submitted a detailed response which the D2D Angling Club fully supports.

In particular we would like to highlight section 3 in the “Protection of established Coarse Fish Populations” segment of the SFCA's response. The club has recently lost much of the wild fish stocks from a reservoir due to a mishap during a routine inspection by Scottish Water which resulted in the reservoir being almost fully drained. This reservoir is close to a large community (Barrhead) and had excellent vehicle and disabled access. Whilst there are other reservoirs within the Dams to Darnley Country Park none have such good access and our efforts to engage with all sections of the local community will be hampered.
