- 2. Do you have any further comments? In particular we are seeking views on
  - o the drafting of the Order;
  - the co-ordinates establishing the marine region boundaries;
  - the boundaries outlined at paragraph 8 above;
    the names of the regions suggested; and

o the illustrative map.

We are supportive of the Scottish Marine Regions Draft Order 2012 as the improved southern boundary of the Clyde SMR is in line with the Councils' boundaries making it easier for Dumfries and Galloway Council, as their coastal area falls into only one Marine region making efficiencies in the Councils' input and administration requirement. We would however request a slight alteration to the sea boundary as indicated red on the Plan below; to be more reflective of the actual Firth of Clyde and align more to ecosystem based approach to management already established by the Firth of Clyde Forum.
