

<b><u>Question</u></b>	<b><u>Answer</u></b>
Do you support the development of an MPA network in Scotland's Seas?	Yes
Designation	With the success of the NTZ in Lamlash I support the South Arran MPA and would love it to be extended round the whole of the island
Management Options	I feel that to make it succeed trawling, dredging and hydraulic gear should be banned from the whole area, allowing the seabed to recover. Angling ,diving and any other sustainable method of fishing to be allowed.
Socioeconomic Assessment:	In the long view a healthier seabed must be better for the fishing industry and recreational fishing. There used to be a vibrant sea angling festival in Lamlash, putting Arran very much on the tourist map.
Other Comments	It is up to the Scottish government to set the framework in place for regeneration and sustainability. Going green is not just about energy it is about how we live our lives and the image we portray to the rest of the world.
