

## CONSULTATION QUESTIONS

**Are you content with the proposed 2011 Data Zones?**

Yes  No

If you wish to make suggestions for change to a small number of draft Data Zones please provide the Data Zone code together with an explanation of its design limitations and the statistical benefits that would result from altering its boundary. Any accompanying maps and future supporting details would also be useful; preferably, a list of Census Output Areas with their current draft Data Zone assignment, along with the proposed new Data Zone assignment should be included.

Not qualified to suggest changes to individual datazones although in theory, reasons for changes are in our opinion justified. However working within datazones at a local level – specifically in the top 15% of SIMD – means that our future operations will be directly affected by these changes especially if comparative statistical information is not presented for 2011 datazones. Whether this will result in a huge negative impact remains to be seen and also greatly depends on how our local authority plan to consider such changes.

**Do you agree that 2011 Data Zones should use the median methodology for the calculation of centroids?**

Please see page 17 for further information.

Yes  No

**Are you content with the proposed best fit 2011 Intermediate Zones?  
If changes occur to the proposed 2011 Data Zones post consultation, these changes will be reflected in the Intermediate Zones.**

Yes  No

If you wish to make suggestions for change to a small number of best fit Intermediate Zones; please provide the Intermediate Zone code together with an explanation of its design limitations and the statistical benefits that would result from altering its boundary. Any accompanying maps and future supporting details would also be

useful; preferably, a list of Draft 2011 Data Zones with their current draft 2001 Intermediate Zone assignment, along with the proposed new Intermediate Zone assignment should be included.
