24. A more collaborative and joint approach to services by professionals involved in health, social care and housing, resulting in better ways of working and more potential for efficiencies.	21. More people staying in their own home for longer, in comfort and safety, with savings for the NHS/local authorities.	29. Further effective reductions in Scotland's homelessness figures.	[21. More people staying in their own home for longer, in comfort and safety, with savings for the NHS/local authorities.]	4. Increase pace of housing supply through infrastructure investment which supports housing development.	21. More people staying in their own home for longer, in comfort and safety, with savings for the NHS/local authorities.	14. More effective and measurable achievement of reductions in the effects of climate change and fuel poverty.	12. Sufficient resources within the housing development industry to deliver new homes and undertake regeneration projects.	24. A more collaborative and joint approach to services by professionals involved in health, social care and housing, resulting in better ways of working and more potential for efficiencies.	10. Recommendations covering use of CPOs and Land Assembly measures which can then be used to further facilitate housing development and regeneration.	2. Availability of good quality private finance options for housing associations and SMEs, resulting in increased housing supply.	3. Increased options for people to own and fund their own homes and more opportunities for SMEs to undertake small scale house construction projects.
26. Raise public awareness of the complexity and importance of housing policy issues.	23. Savings to health and social care providers which can be demonstrated, and which result in the case for preventative spend within the 16/17 Scottish Government budget.		[24. A more collaborative and joint approach to services by professionals involved in health, social care and housing, resulting in better ways of working and more potential for efficiencies.]	5. Clearer understanding of the range of effective mechanisms to fund infrastructure to enable development to move forward.	22. More older people moving to suitable long term accommodation which they can afford and which can support them well into old age. Release of family homes into housing supply - public and private sector.	15. A set of measurable actions which take account of the issues in rural and off grid areas, and which make it easier and more affordable to heat homes in these areas.		26. Raise public awareness of the complexity and importance of housing policy issues.		3. Increased options for people to own and fund their own homes and more opportunities for SMEs to undertake small scale house construction projects.	11. More homes delivered by SME builders.
27. More older and disabled people appropriately housed, with needs evidenced to inform housing planning assumptions and supply.	24. A more collaborative and joint approach to services by professionals involved in health, social care and housing, resulting in better ways of working and more potential for efficiencies.			6. Better and faster delivery of housing through speedier consents.	24. A more collaborative and joint approach to services by professionals involved in health, social care and housing, resulting in better ways of working and more potential for efficiencies.	16. Increase in awareness and demand for energy efficient homes and a long term continuing communications campaign.		27. More older and disabled people appropriately housed, with needs evidenced to inform housing planning assumptions and supply.			13. Better information about what measures are necessary to support the new build industry and target resources.
28. A more person centred, cost effective adaptations process which combines joint working between all housing agencies, occupational therapists and health and support workers, resulting in more adaptations carried out which are appropriate and more people staying in their own homes.	25. Clear decisions about plans and resources by the health and social care partnerships which are fully informed about and take full opportunity of the significant contribution that housing will make to delivery of services.			7. More public support for housing development and buy in to long term visions for communities and places.	28. A more person centred, cost effective adaptations process which combines joint working between all housing agencies, occupational therapists and health and support workers, resulting in more adaptations carried out which are appropriate and more people staying in their own homes.						
				8. Increase in housing supply by increased focus on deliverability of housing sites in Development Plans.							
				9. Public and private sector agreement on a definition of effective land supply and more housing projects proceeding with better information.							
				17. More projects proceeding with community support, leading to shorter planning consent achievement times and better places.							
				(Also oversees 10.)							

UK Collaborative Centre for Housing Evidence

<b>PROPOSED TO BE CLOSED:</b>	1. The sustainability of the Affordable Housing Supply Programme and continuing support for investment in affordable housing through spending reviews.	30. More people choosing to rent in the private sector and staying for longer periods in good quality accommodation, where landlords have invested in long term relationships with their tenants.	31. A high quality private rented sector managed by well-informed landlords operating to clear standards and guidelines.	32. Increase supply of private rented sector homes.	33. Identification of more opportunities to build and develop PRS stock, increase overall supply and improve information exchange.
<b>TO BE ALLOCATED:</b>	18. More use of brownfield town centre sites for housing by private builders, with marketability and viability demonstrated.	19. More diverse housing projects in town centres and a more diverse group of people living there, including families.	20. More empty properties brought into effective use.	34. Improved stock condition through better and more cost effective building repairs done on an equitable basis between tenures.
