

ETHICS

Facilitate research & protect rights, safety, dignity & well being of people participating in research

Research ethical review

Clarity of process for ethical review

Research ethical review → GAP in Scotland ← Research ethical review

Social care research ethical review

CARE HOME DATA

Meaningful & timely data supporting positive outcomes

RATIONALISATION

Think about it from provider perspective

Work collaboratively ↓ Reduce duplication

Streamline data collections → submit once & share

Coordinate data requests to limit duplication

Enabling approach to fully realise benefits from data

Core minimum dataset

PROCESSES

Infrastructure/systems to support collection of data

Standardisation of processes needed

Process to approve / modify data collections

Co-design approach

STANDARDISATION

Language → Consistency → codes → formats → classifications

data definitions → consistency

Increase data quality & interoperability

Make data findable, reusable, linkable

DATA GAPS

Complexity of care

Outcomes & experiences of care in care homes is missing

Improve guidance notes

How your data is used... Privacy notice

relatives carers workforce

Show benefit of data

Network for data providers & users

knowledge experience

Finance

Need to understand the dependency of residents - relates to safer staffing

Data about the use of care homes

end of life palliative respite short term

Unmet need

Timeous staffing data

COMMUNICATIONS

INFORMATION GOVERNANCE

coverage → Data quality → consistency → accuracy → quick decision making

completeness

Complex analysis

Collaboration

Create awareness of what data collections are in place

IT

Storage & retention of data

Securely share & access data depending on purpose

Permissions

Data sharing agreements

All partners agree on data sharing

Learning from good practice

Training & support

Interoperability with digital care systems so data can be imported & reduce burden

People to resource complete data collections

SKILLS → Analysis → Ethical Review Panels

Investment in technology

Information governance

Time

RESOURCES

INSIGHT & RELEVANCE

Make care home analysis easy to find

Coherence across data sources

Timely access to information that meets everyone's needs

Stories we want to tell

Turn data into information

care & support data

Data linkage

Public benefit - personal - societal - economic

MAXIMISE its potential

Timeliness of information governance process

Multiple purposes for data → Operations → Improvements

National multimorbidity health data
