# Background

## Background

### iMatter

The iMatter Continuous Improvement Model was developed by NHSScotland staff with the aim of engaging all staff in a way that feels right for them. The focus is on team-based understanding of experience, but it also offers information at various levels within organisations to evidence and help improve staff experience. As such, it can provide clarity on where to focus efforts for maximum impact, which in turn leads to better care, better health, and better value.

Demographic questions were first introduced in the Everyone Matters Pulse Survey 2020 and were added to the iMatter survey in 2021. They were again included in iMatter 2022. The questions asked are the same as those asked in the Scottish Census 2022 [Scotland's Census 2022 paper questionnaires | Scotland's Census \(scotlandscensus.gov.uk\)](#). It is intended that in the future comparisons can be made to national statistics, but at this time the final 2022 census data is not available.

The full iMatter questionnaire is contained in [Appendix 1](#)

### iMatter Fieldwork

The iMatter process uses Webropol to distribute electronic and paper questionnaires to NHSScotland employees, as well as those employed by the Local Authority who work in a Health & Social Care Partnership who chose to participate. In 2022, all 22 Health Boards and 29 H & SCPs took part, and all fieldwork was carried out between 16 May to 8 August 2022

### Demographic Analysis

This report seeks to draw learning from the iMatter demographic data set that can be of value to Scottish Government and Health and Social Care, both in terms of profiling the workforce and exploring relationships between demographic characteristics and workplace experience. The analysis looks in detail at how attitudes and experiences compare across various demographic groups. The learning will support activity around diversity and inclusion across Health and Social Care.

This report will act as a benchmark against which we will measure future progress. Currently, the report is presented at a national level, but we will continue investigating how we might present the report at individual Board level safely without compromising anonymity.

Where appropriate comparisons are made to the 2021 iMatter survey, in which the same set of questions were used and to the Everyone Matters Pulse Survey carried out in 2020 during the Covid-19 pandemic, in which similar demographic questions were included.

### Response Rate

In total 199,772 questionnaires were issued, 5,330 more than in 2021. A total of 110,250 usable responses were received, up by 2,084 on 2021. This equates to an overall response rate of 55%. Through the report comparisons are made to iMatter 2021 and to the Everyone Matters Pulse Survey (EMPS) carried out during the Covid-19 pandemic in 2020. The response rate in 2021 was 56% and 43% for EMPS 2020.

Survey	Sample Size	Response Rate
iMatter 2022	110,250	55%
iMatter 2021	108,166	56%
Everyone Matters Pulse Survey 2020	83,656	43%

### Non-Response/‘Prefer not to say’

Demographic questions were optional and a ‘prefer not to say’ option was also included in each question.

Typically, over 90% of those completing the survey opted to provide answers to the demographic questions, so over 40% of the workforce.

Much of the analysis in this report is based on **just those staff who responded to the question with information about themselves** (i.e. excluding both those who chose not to answer the question at all and those who opted for ‘Prefer not to say’). Because we are looking to understand more about the demographic profile of staff and the relationship those profiles have on well-being and workplace experiences, those who did not provide this information cannot be included in this analysis.

The proportion of staff **not** answering each of the questions is shown below.

Question	Staff NOT answering
What was your age at your last birthday?	11%
What is your sex?	7%
Do you consider yourself to be trans, or have a trans history?	7%
What is your legal marital or registered civil partnership status?	9%
Which of the following best describes your sexual orientation?	8%
Do you consider yourself to be disabled within the definition of the Equality Act 2010?	6%
Do you have any of the following, which have lasted, or are expected to last, at least 12 months?	18%
Have you been on maternity/parental or shared parental leave in the past 12 months?	7%
What religion, religious denomination or body do you belong to?	7%
What is your ethnic group?	7%
Since last September, have you experienced change either in your job role or the environment you work in?	2%
Which staff group do you belong to? (please select the group that reflects your main role)	3%
Which staff group do you belong to? (NHSScotland staff only)	3%
Which staff group do you belong to? (local authority staff only)	3%

### Potential Response Bias

This analysis is based on the staff who chose to take part in iMatter and respond on the demographic questions. In statistical terms the views of 4 in 10 staff would be deemed representative of all staff. However, we note that there may be a demographic bias in the staff that take part in the survey.

Comparisons are made to the NHSScotland published workforce data [Data tables | Turas Data Intelligence \(nhs.scot\)](#). This data has been collected via staff engagement forms when people join, or change boards within NHSScotland, or via the e:you questionnaire exercise undertaken for all

NHSScotland staff in post. Demographic details are not known for 19% and 38% of staff, plus an additional 8% to 12% who decline to provide personal information. This data source is therefore based on up to two-thirds of NHSScotland staff.

### **Small Base Sizes**

There are a number of demographic groups that are very small and therefore cannot be analysed beyond the overall national level. This does not in any way imply a reduced importance of those minority groups, but rather is reflective of the need to protect the anonymity of individuals. In some cases we are able to combine smaller demographic groups in order to provide some analysis e.g. combining two age groups or several ethnicity groups to provide a robust sample size.

### **Protecting Anonymity**

In carrying out this analysis we are sensitive to the risk of identification of individual people, through their demographic characteristics and responses to individual questions. For that reason, analysis is only reported here where the sample size is 10 or more. Where necessary, individual data points are suppressed to protect confidentiality.

### **The Relevance of Change**

The questions relating to changes experienced (personal and work-related) were introduced into the Everyone Matters Pulse Survey in 2020 during the Covid-19 pandemic. At this time lives were subjected to unprecedented change, and it was important to understand the extent to which Health and Social Care staff were experiencing change. The EMPS reporting illustrated the relationship between change and certain demographic groups. The question was retained in iMatter 2021 and it was evident that some staff were continuing to experience Covid-linked change both work-related and personal. iMatter 2022 saw a considerable drop in the proportion of staff experiencing change (41% in 2022 compared to 63% in 2021 and 74% in 2020)

Whilst not possible to fully verify, we believe that the nature of change experienced in 2022 is likely to be more 'normal' than seen in 2020 and 2021. For example:

- changes in team or in work location are more likely to be chosen job changes rather than those emergency changes made in response to the pandemic
- those with caring responsibilities are more likely to be ingoing, rather than specific Covid-triggered responsibilities caring for vulnerable people who had been advised to shield

### **Rounding Errors**

Rounding percentages to the nearest whole number occasionally results in total percentages that do not add up to exactly 100%.

# Demographic Profile and Trend

## Demographic Profile

### Overview of Demographic Profile of Staff

*Note: Percentages shown are based on those staff answering each relevant question.*

- There are staff from across the age spectrum, with the most prevalent age group being 45 – 54 years (29% of staff)
- Four out of five staff working in Health and Social Care who took part in iMatter 2022 are female (80%) and one in five (20%) are male
- 95% think of themselves as heterosexual/straight, with small minorities describing themselves as gay, lesbian, bisexual or self-describe.
- Less than 1% of staff taking part in iMatter consider themselves as Trans or with a Trans history. This is in line with the estimate of 0.5% of adults (almost 24,000) across the Scottish population (Source: [National Care Service: equality evidence review, June 2022](#))
- 4% of staff have taken maternity/paternity leave in the preceding 12 months
- 56% of staff are married or in a civil partnership, while 30% have never been married or in a civil partnership
- 6% of staff responding to iMatter consider themselves disabled. Conditions experienced include ones affecting both physical and/or mental health.
- Over half of staff say they have no religion. Church of Scotland and Roman Catholic are the two most prevalent religions.
- White is the most prevalent ethnicity (96%) and within that 88% are Scottish and 10% are other British White.

Demographic Characteristic	Percentage
<b>What was your age at your last birthday?</b>	
Under 25 years	4%
25-34 years	18%
35-44 years	24%
45-54 years	29%
55-64 years	23%
65+ years	2%
<b>What is your sex?</b>	
Male	20%
Female	80%
<b>Which of the following best describes your sexual orientation?</b>	
Straight/Heterosexual	95%
Gay or Lesbian	3%
Bisexual	2%
Prefer to self-describe <sup>1</sup>	1%
<b>Do you consider yourself to be trans, or have a trans history?</b>	
Yes, I identify as transgender <sup>2</sup>	<1%
No, I do not identify as transgender	100%
<b>Have you been on maternity/parental or shared parental leave in the past 12 months?</b>	
Yes	4%
No	96%

<sup>1</sup> Those who prefer to self-describe are most likely to describe themselves as “pansexual”, “asexual”. Or “queer”

<sup>2</sup> Those who say they identify as transgender are most likely to describe themselves as “Non Binary” in the open responses.

Demographic Characteristic	Percentage
<b>What is your legal marital or registered civil partnership status?</b>	
Married	55%
Never married and never in civil partnership	30%
Divorced / dissolved	9%
Separated	3%
Widowed / surviving partner from civil partnership	2%
In a registered civil partnership	1%
<b>Do you consider yourself to be disabled within the definition of the Equality Act 2010?</b>	
Yes	6%
No	94%
<b>Do you have any of the following, which have lasted, or are expected to last, at least 12 months?<sup>3</sup></b>	
Long-term illness, disease or condition	13%
Mental health condition	9%
Deafness or partial hearing loss	4%
Physical disability	4%
Other condition	4%
Learning difficulty	2%
Blindness or partial sight loss	1%
Learning disability	1%
Full or partial loss of voice or difficulty speaking	<1%
Developmental disorder	<1%
<b>What religion, religious denomination or body do you belong to?</b>	
None	56%
Church of Scotland	22%
Roman Catholic	15%
Other Christian	5%
Muslim	1%
Hindu	<1%
Buddhist	<1%
Sikh	<1%
Jewish	<1%
Pagan	<1%
Another religion or body <sup>4</sup>	1%

<sup>3</sup> Individuals can give more than one response. 68% said they had 'No condition' and 18% did not answer the question

<sup>4</sup> Other religions mentioned most in open responses are "Baptist", "Evangelical" and "Church of England"

<b>Demographic Characteristic</b>	<b>Percentage</b>
<b>What is your ethnic group?</b>	
White	96%
Mixed or multiple ethnic groups	1%
Asian, Scottish Asian or British Asian	2%
African, Scottish African or British African	1%
Caribbean or Black	<1%
Another ethnic group	1%
<b>Within White</b>	
Scottish	88%
Other British	10%
Irish	2%
Polish	1%
Gypsy/Traveller	<1%
Roma	<1%
Showman/Showwoman	<1%
Another white ethnic group <sup>5</sup>	2%
<b>Within Asian, Scottish Asian or British Asian</b>	
Pakistani, Scottish Pakistani or British Pakistani	20%
Indian, Scottish Indian or British Indian	46%
Bangladeshi, Scottish Bangladeshi or British Bangladeshi	2%
Chinese, Scottish Chinese or British Chinese	12%
Other <sup>6</sup>	20%
<b>Within Another ethnic group</b>	
Arab, Scottish Arab or British Arab	33%
Other <sup>7</sup>	67%

<sup>5</sup> Staff who are 'Other White' are from a wide range of countries from across the world

<sup>6</sup> Filipino and Nepalese are the most frequently mentioned ethnicities within 'Other Asian'

<sup>7</sup> 'Other ethnic groups mentioned are very varied including some also mentioned elsewhere such as Filipino, South American (various), Asian, Middle Eastern etc.

### Trend in Demographic Data

The demographic profile of staff completing iMatter 2022 have been compared to iMatter 2021. Comparisons to EMPS 2020 have **not** been made as the question wordings and answer options for many of the demographic characteristics differed. This, combined with the lower response rate and EMPS taking place during the Covid-19 pandemic, make it inappropriate to make direct comparisons between iMatter and EMPS demographics.

The vast majority of demographic attribute either do not differ from 2021 to 2022 or move only by plus or minus one percentage point. For reference all information is contained in [Appendix 2](#). The demographic characteristics that have moved more than one percentage point are:

- The percentage of staff who have never married or registered in a civil partnership, up 3 percentage points. This may be reflective of the general trend seen in the population as illustrated by the [England Census 2021](#).\*
- The percentage of staff who say they have no religion and do not belong to a religious denomination or body has decreased by 2 percentage points. This shift in religious belief is in line with other published population data ([ONS Data for England and Wales](#))\* and may be linked to the Covid-19 pandemic.
- There has been an increase of 2 percentage points in staff stating they have not taken maternity/parental leave in the last 12 months.

\* *Scottish 2022 Census data not available at the time of writing. English 2021 Census data is used as a proxy.*

Other sources of background reading on the impact of Covid-a9 on religious believe can be seen at: [COVID-19 and its effect on people's religious belief • City, University of London Faith and spirituality in the time of Covid - BBC News](#)

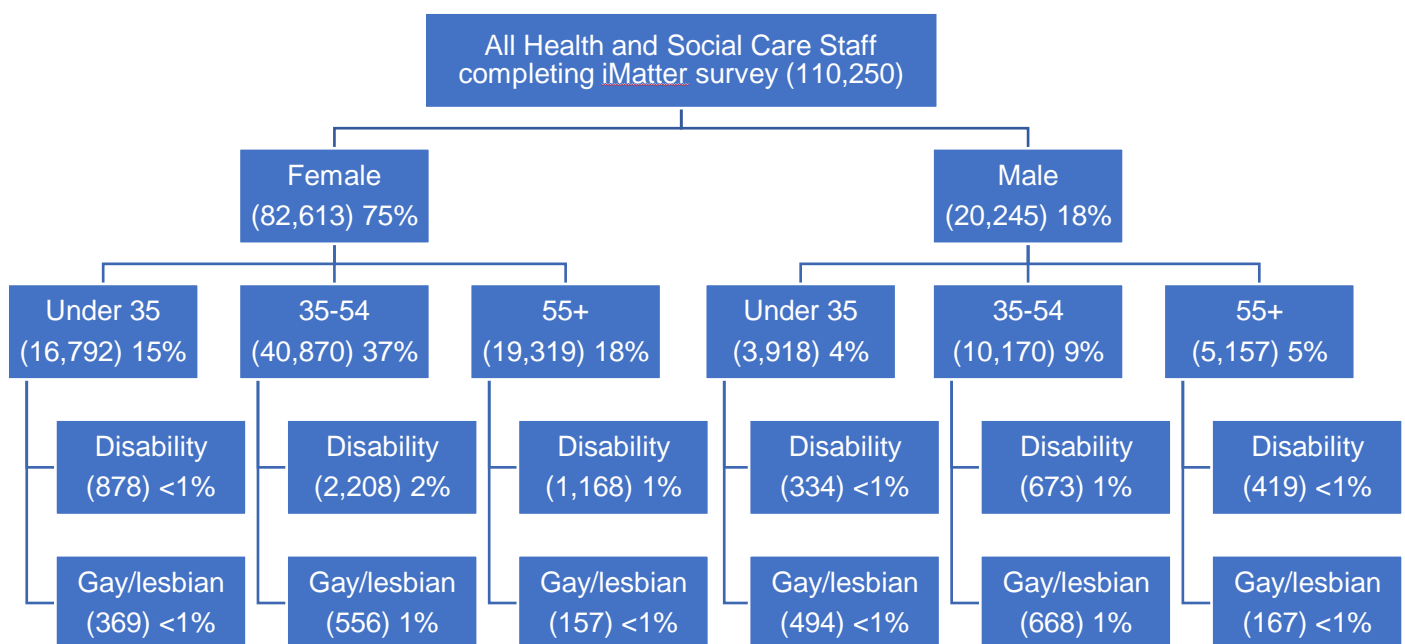

# Intersectionality

**Intersectionality - Overview**

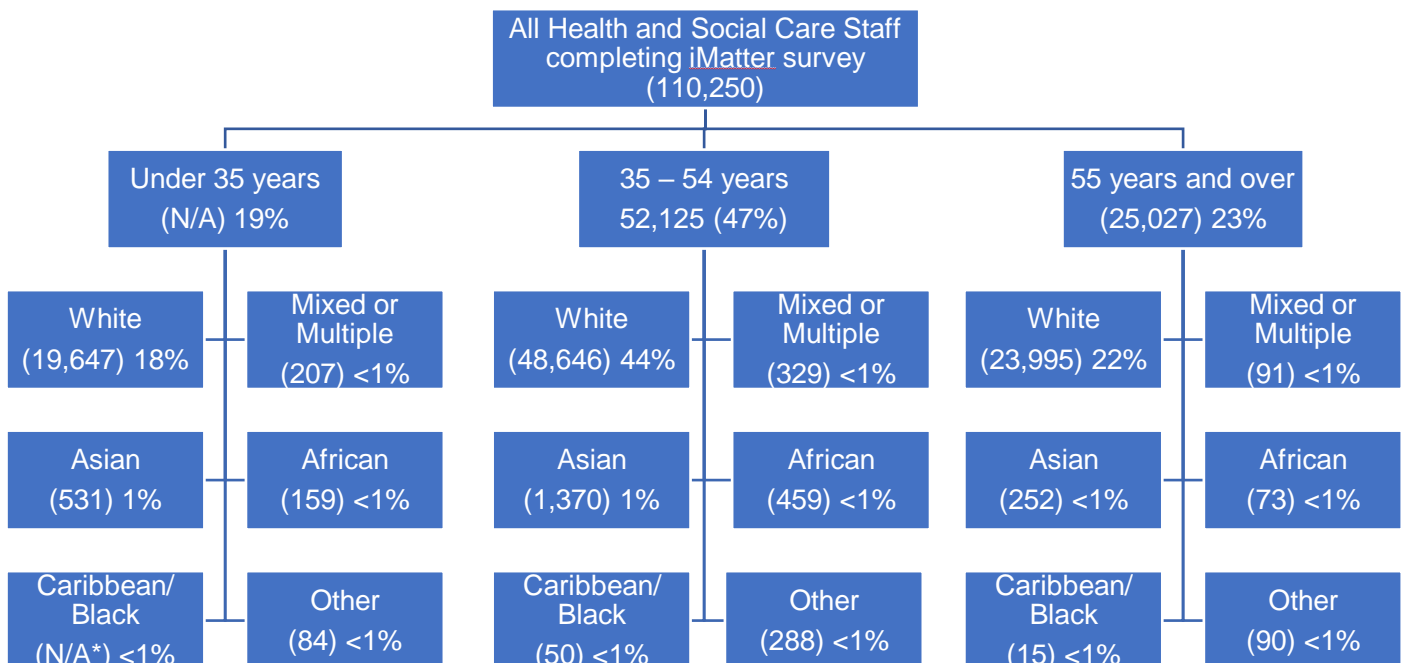

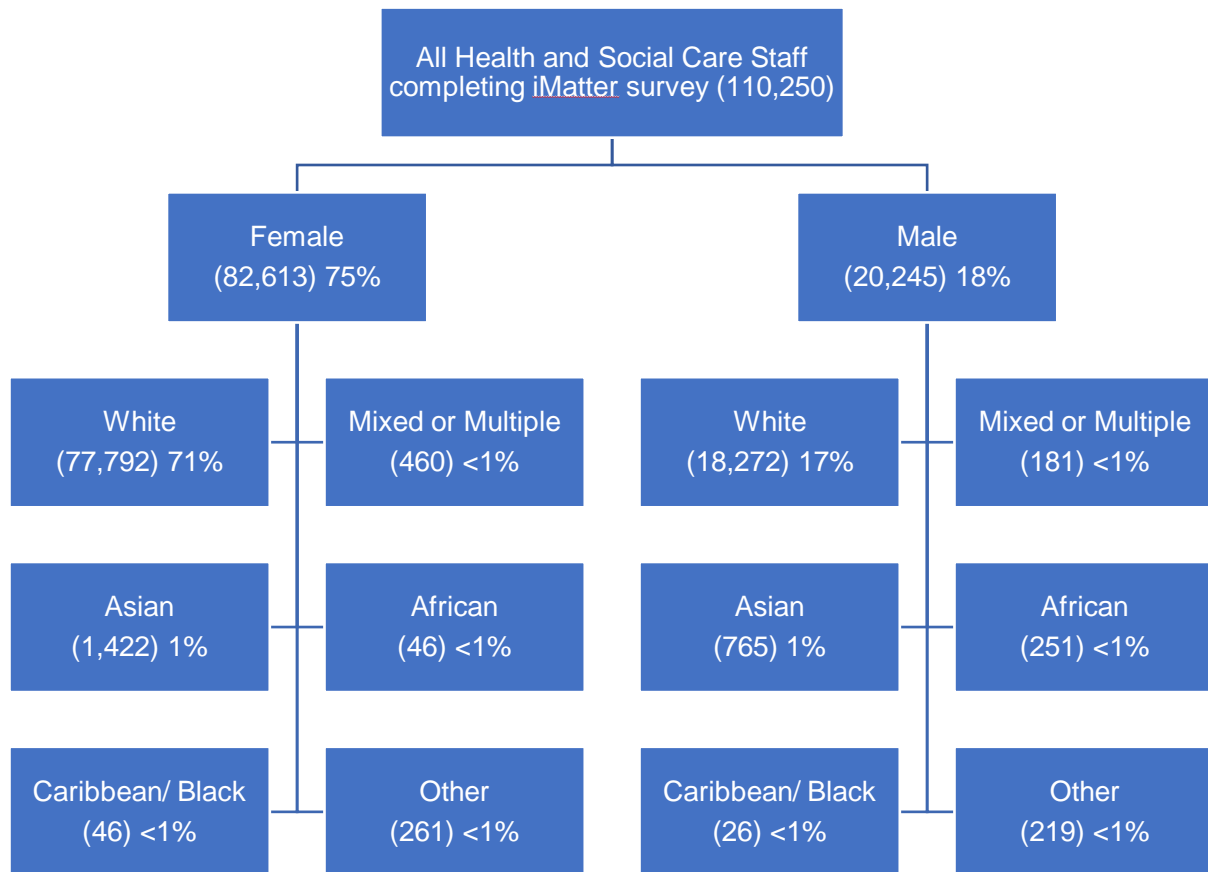

This section contains information on the size of various intersectional groups, by combining more than one demographic characteristic, for example, age and sex.

For each we show both the number of staff identifying within this group from their iMatter survey responses and the percentage of the total responding to iMatter. These percentages are therefore assumed to be indicative of the incidence of these groups across all Health and Social Care staff. Many of the intersectional groups comprise less than 1% of the Health and Social Care staff and are therefore very much minority groups. Others, whilst still a small share of the total workforce are larger groups that can be explored in more detail.

The same information is included within [Appendix 3](#) in accessible table format.

\* Small bases sizes are not shown to protect anonymity

## Intersectional Profiles

Within intersectional data there are variations between groups. These are summarised below and further details are included within [Appendix 3](#).

Compared to males, **female** staff are more likely to be:

- Divorced (+4 percentage points [pp])
- Straight/heterosexual (+5pp)
- White (+4pp)
- Church of Scotland (+6pp)

Compared to older staff, **younger** staff are more likely to be:

- Female (82% of staff under 25 years are female, compared to 73% of those aged 65 years and over)
- Gay, lesbian or bisexual (4% of staff aged under 25 years are gay/lesbian and 7% are bisexual, compared to 1% and <1% of those aged 55 years and over)
- Never (not yet) married, divorced or widowed (30% of those aged 25 – 34 years are married, 1% are divorced and <1% are widowed, 64% of those aged 45 – 64 years are married, 17% of those aged 55 – 64 are divorced and 12% of those aged over 65 years are widowed)
- Without religion (75% of those aged under 25 years have no religion. This falls continually across the age groups to 33% of those aged 65 years and over having no religion.)

Staff who consider themselves **disabled** are more likely to be:

- Female (75% of those who are disabled are female, compared to 81% of those not disabled)
- Gay, lesbian or bisexual (+3pp for gay/lesbian and +4pp for bisexual)
- Not heterosexual/straight (-8pp)
- Never (not yet) married/been in a civil partnership (36% of disabled staff compared to 29% of staff who are not disabled)
- Older (58% are aged 45 years and over, compared to 54% of those who are not disabled)

Compared to heterosexual/straight staff, **gay/lesbian** staff are more likely to be:

- Male (55% are male, compared to 19% of those who are heterosexual/straight)
- Under 35 years (+ 16pps: 36% of those who are gay/lesbian are under 35 years, compared to 20% of those who are heterosexual/straight)
- Not married or in a civil partnership (61% of those who are Gay/lesbian are not married/in a civil partnership, compared to 28% of those who are heterosexual/straight)
- Disabled (+6pp with 12% of those who are gay/lesbian being disabled and 6% of those who are heterosexual/straight)
- Without religion (73% of those who are gay/lesbian have no religion, considerably higher than the 55% of those who are heterosexual/straight)

Compared to heterosexual/straight staff, **bisexual** staff are more likely to be:

- Under 35 years (62% are under 35 years, compared to 20% of those who are heterosexual/straight)
- Trans or have a trans history (+3pps)
- Not married or in a civil partnership (64% compared to 28% of those who are heterosexual/straight)
- Disabled (+13pp, from 6% of those who are heterosexual/straight to 19% of staff who are bisexual)
- Without religion (76% of bisexual staff have no religion compared to 55% of those who are heterosexual/straight)

Compared to heterosexual/straight staff, staff who **self-describe** are more likely to be:

- Male (+9pp)
- Trans or have a trans history (+8pp)
- Not married or in a civil partnership (+18pp; 46% are not married/in a civil partnership compared to 28% of those who are heterosexual/straight)
- Disabled (+9pp)
- Asian or other non-white ethnicity (+2pp)

Compared to non-trans staff, staff who are **trans or have a trans history** are more likely to be:

- Not married or in a civil partnership (+11pp)
- Under 35 years (31% are under 35 years, compared to 22% of staff who are not trans/do not have a trans history)
- Disabled (+13pp)

## Demographics across Staff Groupings

## Demographics Across Staff Groupings

### Context

The iMatter questionnaire asks staff whether they are employed by NHSScotland or by the Local Authority and within those employers which staff groupings they work for (see [Appendix 1](#) for details)

### NHSScotland and Local Authority Staff

83% staff taking part in iMatter say they are NHSScotland staff and 14% are Local Authority staff:

- Within NHSScotland, Nursing and Midwifery is the largest group, followed by Administration and Allied Health Professions
- Among Local Authority staff, Adult Services is the largest group, followed by Older People Services and Children's Services

The overall demographic profile between NHSScotland and Local Authority staff is very similar. The exception is age where 51% of Local Authority staff are aged over 50 years, compared to 40% of NHSScotland staff.

Comparison to published Turas data shows a similar profile among staff taking part in iMatter and answering the demographic questions and those providing information for Turas. iMatter respondents are slightly older, less likely to have a religion and a slightly greater proportion are white Scottish. Only 2% of those providing information for Turas say they are disabled (the question may differ from that asked in iMatter).

Demographic Characteristic	NHSScotland	Local Authority
<b>What was your age at your last birthday?</b>		
Under 25 years	4%	3%
25-34 years	19%	13%
35-44 years	24%	21%
45-54 years	29%	31%
55-64 years	22%	30%
65+ years	2%	3%
<b>What is your sex?</b>		
Male	20%	17%
Female	80%	83%
<b>Which of the following best describes your sexual orientation?</b>		
Straight/Heterosexual	95%	95%
Gay or Lesbian	2%	3%
Bisexual	2%	1%
Prefer to self-describe	1%	1%
<b>Do you consider yourself to be trans, or have a trans history?</b>		
Yes, I identify as transgender	<1%	<1%
<b>Have you been on maternity/parental or shared parental leave in the past 12 months?</b>		
Yes	4%	2%

Demographic Characteristic	NHSScotland	Local Authority
<b>What is your legal marital or registered civil partnership status?</b>		
Married	56%	52%
Never married and never in civil partnership	30%	29%
Divorced / dissolved	9%	12%
Separated	3%	4%
Widowed / surviving partner from civil partnership	1%	2%
In a registered civil partnership	1%	1%
<b>Ethnicity</b>		
White Scottish	80%	86%
White Other	14%	10%
Asian, Scottish Asian	2%	1%
Other Ethnicity	2%	2%
<b>Do you consider yourself to be disabled within the definition of the Equality Act 2010?</b>		
Yes	6%	8%
<b>What religion, religious denomination or body do you belong to?</b>		
None	56%	57%
Church of Scotland	22%	21%
Roman Catholic	15%	17%
Other Christian	5%	3%
Other	2%	2%

### Staff Groupings

Much greater differences are seen across the staff groupings within NHSScotland and Local Authorities.

- Ambulance Service staff grouping is the only one to have more males (59%) than females (41%). In contrast only 10% of Nursing & Midwifery and Older People Services are male.
- Other Therapeutic and Health Science Services have the largest proportion of staff under 35 years (34%) with Support Services and Older People Services having the greatest proportions (41%, 39%) of staff aged 55 years and over.
- Reflecting the age profile of staff Health Science Services and Other Therapeutic have the highest proportion of staff to have not married or been in a civil partnership. In contrast 74% of Medical & Dental and 73% of Senior Managers are currently married or in a civil partnership.
- Medical and Dental has the highest proportion of staff who are not White Scottish

Details of demographics by staff grouping are included in [Appendix 4](#).

## **Workplace Experience: Overall Experience**

## Workplace Experience

In this chapter we explore the relationship between demographic characteristics and how staff feel about their experience at work. Differences may be as a result of a range of factors as well as, or apart from, the demographic characteristics being compared. Where differences are seen it does not necessarily point towards absolute differences in how staff are treated at work as it could also be reflective of how different demographic groups perceive their experience.

Comparisons in this report are primarily made between mean scores as the distribution of responses in smaller demographic groups would be based on very small sample sizes.

### Statistical Significance

When comparing data between two or more groups e.g. overall experience scores given by those who are male and those who are female, it is important to consider whether they are 'true' or 'chance' differences. Statistical significance testing is used to examine the size of difference and to establish the level of confidence that a 'true' change has happened.

The key element in determining whether differences are statistically significant is the number of responses. The larger the number of responses, the smaller the minimum change that can be deemed statistically significant (meaning that the change is highly likely to be 'true').

Across large demographic groups within Health and Social Care, differences of 0.3, or even 0.2 points would be significant. When looking at demographic groups that have less than 500 people in them, then differences of 3 or 4 points would be needed to be statistically significant.

Other factors that can influence the extent to which differences are true are the percentage of the population included within the sample i.e. the iMatter response rate. However, when looking at demographic data we only know the profile of those responding and not of those who do not. Therefore, statistical significance is an approximate calculation. Each score and each combination of demographic groups will have slightly different levels at which the differences would be statistically significant.

For the purposes of this summary report, the following differences in scores should be deemed to be significant:

- Samples of 100 to 500 responses in each group: differences of 4 points or more are typically significant
- Samples of 500 - 1000 responses in each group: differences of 3 points or more are typically significant
- Samples of between 1,000 and 2,500 responses in each group: differences of 2 points are typically significant
- Samples of over 2,500 responses in each group: differences of 1 point are typically significant

*Note: Because iMatter scores are reported with no decimal places, there are incidences where significant movements are not evident in data reported at whole integer level only. Occasionally where there appears to be a movement in scores, this is simply a result of rounding to whole integers and the difference is in fact, not significant.*

Overall experience is measured on an 11 point scale (0 – 10), where 0 is a very poor experience and 10 a very good experience.

- Overall, male staff score lower for overall satisfaction than females, with a mean of 6.8 for males compared to 7.0 for females. This trend is seen in other staff engagement surveys. For example, published data from the Civil Service People Survey\* shows females typically scoring higher than males.
- The largest difference is in the proportions scoring 4 or less (14% of males and 11% of females)

Overall Experience	0 – 4	5 – 6	7 – 8	9 - 10
Male	14%	22%	41%	23%
Female	11%	24%	41%	24%

- The youngest and the oldest staff score highest for overall experience, perhaps reflecting their life stages with the very young just starting out on their working life and the older staff having reached a period of contentment in their working life.

Overall Experience	Under 25 years	25 – 34 years	35 – 44 years	45 – 54 years	55 – 64 years`	65 years & over
Mean score	7.3	7.0	7.0	6.9	7.0	7.4

- Staff who prefer to self-describe give the lowest scores for their overall experience at work across all the sexual orientation groups. Those who consider themselves Trans or to have a Trans history score lower than those who are not Trans. The tendency for people who are Trans or have a Trans history to score lower than those who don't is also seen in the Civil Service People Survey\*, suggesting it is a general trend rather than something that is specific to Health & Social Care in Scotland

Demographic Group	Overall Experience (Mean Score)
Straight/Heterosexual	7.0
Gay/Lesbian	6.7
Bisexual	6.6
Self describe	6.2
Not Trans	6.9
Trans	6.6

\*Source: [Civil-Service-People-Survey-2021-results-by-all-demographics.ods \(live.com\)](https://www.civilservice.gov.uk/civil-service-people-survey-2021-results-by-all-demographics.ods)

- Those with a disability tend to score their overall experience lower, particularly where that condition involves mental health and/or development disorders. Again, this trend is reflective data seen elsewhere. The Civil Service People Survey also shows staff with long term limiting condition, illness or disability rating their satisfaction at work notably lower than those without.

Demographic Group	Overall Experience Mean score	Demographic Group	Overall Experience Mean score
Disability Yes	6.5	Hearing Loss	6.8
Disability No	7.0	Sight Loss	6.6
		Learning Disability	6.5
		Learning Difficulty	6.7
		Developmental Disorder	6.4
		Physical Disability	6.5
		Mental Health	6.3
		Long-term	6.7
		Other & Speaking Loss/Difficulty	6.9

- Those who are Muslim, Hindu or Sikh score considerably higher than average for overall experience, while Pagan and ‘Other’ religions score lower

Demographic Group Religion	Overall Experience Mean score
None	6.9
Church of Scotland	7.0
Roman Catholic	7.1
Other Christian	7.0
Muslim	7.4
Hindu	7.6
Buddhist	7.1
Sikh	7.6
Jewish	7.0
Pagan	6.4
Other	6.6

- Staff who are of Arab, African or Asian (Indian or Bangladeshi) ethnicity score highly for overall experience, along with those who identify as White Polish
- White British (other than Scottish) have the lowest overall experience score, along with those who identify as ‘other’ ethnicity
- Benchmark data from the Civil Service People Survey shows a broadly similar pattern with those of mixed/multiple ethnicity rating lowest. Asian ethnicities tend to rate highest along with those of Arab ethnicity

<b>Demographic Group Ethnicity</b>	<b>Overall Experience Mean score</b>
<b>White</b>	6.9
White Scottish	6.9
White Other British	6.8
White Irish	6.9
White Polish	7.5
White Other	7.0
<b>Mixed/Multiple</b>	6.9
<b>Asian</b>	7.4
Pakistani, Scottish Pakistani or British Pakistani	7.3
Indian, Scottish Indian or British Indian	7.5
Chinese, Scottish Chinese or British Chinese	7.1
Other + Bangladeshi, Scottish Bangladeshi or British Bangladeshi	7.5
<b>African</b>	7.6
<b>Caribbean or Black</b>	6.9
<b>Other</b>	7.0
Arab, Scottish Arab or British Arab	7.6
Other ethnic group	6.8

- The pattern of males scoring lower than females is repeated across all age groups. It is also seen across ethnic groups where females score higher than males with the exception of those who are of African and mixed ethnicities among whom males score higher than females.

<b>Overall Experience (Mean Score)</b>	<b>Male</b>	<b>Female</b>
Under 35 years	7.0	7.1
35 – 54 years	7.0	6.8
55 years and over	7.1	6.9
White	6.8	7.0
Mixed/Multiple	7.0	6.9
Asian	7.4	7.4
African	7.7	7.5
Caribbean/Black	6.6	7.1
Other ethnicity	6.9	7.1

- Looking at differences in Overall Experience scores between males and females within the various staff groupings, there is typically a similar pattern with males scoring lower than females
- The exceptions to this are both NHSScotland and Local Authority male Senior Managers who score higher than their female colleagues. Males in Personal & Social (LA) also score higher than females.

<b>NHSScotland</b>	<b>Male</b>	<b>Female</b>	<b>Local Authority</b>	<b>Male</b>	<b>Female</b>
Admin Services	7.3	7.4	Adult Services	7.1	7.1
Allied Health	6.8	6.9	Business Services	7.4	7.6
Ambulance Services	6.1	6.1	Children's Services	7.0	7.1
Health Science Services	6.8	6.9	Criminal Justice	7.1	7.5
Medical & Dental	6.6	6.8	Older People Services	6.8	7.0
Medical & Dental Support	6.5	7.1	Senior Managers	8.0	7.4
Nursing & Midwifery	6.5	6.6	Strategic Development	7.4	7.6
Therapeutic	7.0	7.1			
Personal & Social	7.5	7.3			
Senior Managers	7.7	7.5			
Support Services	6.8	7.2			

## **Workplace Experience: Component Scores**

## Component Scores - Context

The iMatter questionnaire includes a series of component questions; ratings relating to various aspects of staff experience. They are grouped into three main areas: Experience as an Individual, My Team/Line Manager and My Organisation. Details of all the component questions can be found in [Appendix 1](#).

There is overall consistency with the differences seen earlier in this report in Overall Experience scores across demographic groups. The components that show the most differentiation between demographic groups are typically within four themes:

- **Being seen and heard:** 'I am confident my ideas and suggestions are listened to', 'I am confident my ideas and suggestions are acted upon', 'I feel sufficiently involved in decisions relating to my organisation'
- **Confidence and trust:** 'I feel that board members who are responsible for my organisation are sufficiently visible', 'I have confidence and trust in Board members who are responsible for my organisation'
- **Performance management:** 'I am confident performance is managed well within my organisation', 'I am given the time and resources to support my learning growth'
- **Wellbeing:** 'I feel my organisation cares about my health and wellbeing', 'My work gives me a sense of achievement'

The main areas of differentiation are summarised below and [Appendix 5](#) contains full details of the component data by demographic group.

### Sex

Typically, females score 1 or 2 points higher than males. Females score 3 points higher for:

- I am confident my ideas and suggestions are listened to
- I am confident my ideas and suggestions are acted upon
- I feel that board members who are responsible for my organisation are sufficiently visible
- I have confidence and trust in Board members who are responsible for my organisation
- I am confident performance is managed well within my organisation

### Age

Staff under 25 years, typically score 3 – 4 points higher than the overall Health & Social Care scores. They score considerably higher for four of the Organisation components:

- I am confident performance is managed well within my organisation (+8)
- I feel that board members who are responsible for my organisation are sufficiently visible (+7)
- I have confidence and trust in Board members who are responsible for my organisation (+7)
- I feel sufficiently involved in decisions relating to my organisation (+6)

Staff aged 65 years and over score higher than average for most components, with the largest gaps for:

- I am given the time and resources to support my learning growth (+5)
- I feel my organisation cares about my health and wellbeing (+5)
- My work gives me a sense of achievement (+4)
- Differences seen across age groups may be reflective of career stage and expectations.

## **Age and Sex**

Note: we look here at broader age clusters, which tend to show a lowering of satisfaction with age, which is generally seen across both males and females.

Young males feel more supported in their role than older males. Males under 35 years score 81 for 'sufficient support to do my job well' compared to 77 for Males aged 35 and over. Young males under 35 years are also more likely to recommend their organisation as a good place to work (76), three points higher than those aged 35 and over (73). Males under 35 years would be happier for a friend or relative to access services (79 compared to 76 for those aged 35 and over).

There is less variation in scores given by females across the age groups with differences typically of only one or two points across the three age groups explored (under 35 years, 35 – 54 years and 55 years and over). The exception to this is for 'confidence that performance is managed well within in their organisation' where females under 35 years score 66, 3 pts above the 63 scored by females 35 years and over.

## **Sexual Orientation**

Typically, those who are straight/heterosexual score highest across the components, with those who self-describe scoring lowest. The biggest differences are for:

- I am confident my ideas and suggestion are acted upon (8 pts)
- I have confidence and trust in Board members who are responsible for my organisation (8pts)
- I feel my organisation cares about my health and wellbeing (8pts)

## **Trans**

Staff who identify as Trans typically score 2 points lower than other staff. The components with the greatest differences are:

- I feel involved in decisions relating to my team (-4)
- I am confident performance is managed well within my team (-4)
- Involved in decisions relating to my job (-4)

## Disability

Staff who consider themselves disabled score lower than those who do not, typically by 3 to 4 points. There are 3 components where those with disabilities score 5 points lower than other staff, all in the Treatment as an Individual strand:

- I am confident my ideas and suggestions are listened to
- I am treated fairly and consistently
- I am treated with dignity and respect as an individual

## Health Conditions

Although staff with Mental Health issues score quite highly for My Experience as an Individual and My Team, they have the lowest scores of all health conditions for My Organisation components. Those with Physical Disabilities score lower than most other health conditions for measures relating being listened to, feeling involved in decisions and being given time and resources to support learning growth.

## Ethnicity

Staff of African and Asian ethnicity typically score higher than other ethnicities. Components where the uplift is greatest are in those relating to the organisation:

- Confidence and trust in Board members: Asian 70, African 72 (Health & Social Care 61)
- Board members are sufficiently visible: Asian 65, African 66 (Health & Social Care 55)
- Confident that performance is well managed: Asian 71, African 74 (Health & Social Care 63)
- Feel sufficiently involved in decisions relating to my organisation Asian 64, African 63 (Health & Social Care 55)
- Feel my organisation cares about my health and wellbeing Asian 78, African 81 (Health & Social Care 71)

Within those of white ethnicity, there is little difference in scores for Individual and Team components. Staff who are white Polish score higher than other white ethnicities for Organisation components, in particular:

- I feel that board members who are responsible for my organisation are sufficiently visible (White Polish 67, other white ethnicities score between 54 and 56)
- I have confidence and trust in Board members who are responsible for my organisation (White Polish 70, other white ethnicities score between 60 and 61)
- I feel sufficiently involved in decisions relating to my organisation (White Polish 64, other white ethnicities score between 55 and 56)

There is limited difference in scores across the various Asian ethnicities. Staff who are Indian or Bangladeshi/other Asian tend to score higher than staff who are Pakistani or Chinese. Components where the difference is greatest are those relating to the Organisation (see below) and for:

- Given time and resources to support learning growth (Indian, Bangladeshi/other Asian 79, Pakistani 75, Chinese 74)

	<b>Pakistani, Scottish Pakistani or British Pakistani</b>	<b>Indian, Scottish Indian or British Indian</b>	<b>Chinese, Scottish Chinese or British Chinese</b>	<b>Other + Bangladeshi, Scottish Bangladeshi or British Bangladeshi</b>
I feel my organisation cares about my health and wellbeing	75	79	74	79
I feel sufficiently involved in decisions relating to my organisation	60	65	61	67
I feel that board members who are responsible for my organisation are sufficiently visible	62	66	63	68

# Change

## Change

### Change Experienced

Questions were first asked about change that staff had experienced in the circa 6 months prior to completing the survey in the 2020 Everyone Matters Pulse Survey (EMPS). The questions were asked in recognition of huge impact that the COVID-19 pandemic had on both professional and personal lives. As that change was still ongoing for many, the questions were asked again in iMatter 2021 and 2022. It is recognised that the interpretation of this question may have changed as society has returned to normality post-Covid.

While this analysis is focused on demographic profile data, we saw evidence in 2020 of a relationship between certain demographic attributes and the nature of change experienced and so the topic is explored again in 2022.

The incidence of staff experiencing change is now 41%. This is a considerable reduction from the 63% who had experienced change in 2021.

<b>Have you experienced change either in your job role or the environment you work in?</b>	<b>EMPS 2020</b>	<b>iMatter 2021</b>	<b>iMatter 2022</b>
Experienced Change	74%	63%	41%
Did not Experience Change	22%	35%	57%
No answer given	4%	3%	2%

This may be because life is returning to pre-pandemic norms, both in the workplace and for staff personally. It may also be because change experienced during the pandemic has now been adopted as the 'new normal'. For example, working from home more may no longer be considered a change as it has become a part of normal working life for some staff.

Overall the demographic profile of staff experiencing change is similar to that of staff not experiencing change. Where there are small differences they are typically less than one percentage point. The areas where there are some slightly larger differences between staff experiencing change or not are:

- Those experiencing change are slightly older with 30% aged 55 years and over, compared to 28% of those not experiencing change
- 54% of staff experienced change are married compared to 56% of those who did not experience change
- Similarly 54% of staff experiencing change are without religion compared to 57% of those who did not
- Staff experiencing change are more likely to be disabled (8% compared to 5%).

## Type of Change Experienced

### Work Changes

Across changes in work circumstances there has been a reduction in all types of change experienced, with the largest falls in the percentage of staff working in different locations and/or working from home more than usual.

Changes in Work Circumstances Experienced	EMPS 2020	iMatter 2021	iMatter 2022
Working at a different location (e.g. different hospital, care home etc.)	16%	15%	10%
Working from home more than usual	31%	25%	9%
Reassigned to a different team	11%	10%	7%
Reassigned to a different role, but still in the same team	10%	9%	7%
Reassigned to a different Directorate	1%	2%	1%
Reassigned to a different Board	1%	1%	1%

There are some variations in the demographic profile of staff experiencing each type of work change (full details are provided in [Appendix 6](#)):

- Staff with disabilities and those aged 45 years and over are more likely to be working from home more than usual
- Staff aged 25 – 54 years are more likely to be reassigned to a different Board. This is then reflected in a greater proportion of staff who have never married or been in a civil partnership reassigned to a different Board. 24% of those reassigned to a different Board are male, compared to 20% of all staff responding

*Note: Whilst comparative data is shown in this section, the time periods staff were asked to consider varied each year, which may lead to variations in some data. For example, the proportion experiencing a life event will be likely to vary as a direct result of the different time frames referenced:*

- *EMPS 2020: typically 6 months (from pandemic start in March to the survey in September)*
- *iMatter 2021: the time period was longer for most staff (from September 2020 to the time of completing the survey up to September 2021)*
- *iMatter 2022: typically around 9 to 10 months (September 2021 to survey completion up to early August 2022)*

## Personal Changes

Personal changes, previously amplified by Covid-19 restrictions (e.g. children at home, household members furloughed, supporting vulnerable relatives etc.) all reduced greatly in 2022. The one change that has seen a considerable increase in 2022 is the proportion of staff who have tested positive for Covid-19.

Changes in Personal Circumstances Experienced	EMPS 2020	iMatter 2021	iMatter 2022
I have tested positive for COVID-19	1%	7%	16%
I have experienced physical or mental ill health (non-COVID-19)	11%	13%	8%
Loss of a friend or relative	10%	11%	7%
Providing support for vulnerable relative (living elsewhere)	19%	13%	6%
Worsening of financial situation (e.g. household member job loss/reduced hours)	9%	6%	5%
Care responsibilities for another member of the household	7%	6%	3%
School age children at home	17%	13%	3%
Preschool children at home	6%	4%	2%
Other household members furloughed	11%	7%	2%
Shielding at home (because I/other household members are clinically vulnerable)	4%	3%	1%
Staying away from home to protect my family	2%	1%	<1%

There are some variations in the demographic profile of staff experiencing types of personal change (full details are provided in [Appendix 6](#)):

- Older staff are more likely to have care responsibilities (34% are 55 years and over), have lost someone close to them (34% are 55 years and over) or be shielding (43% are 55 years and over).
- As might be expected, those with pre-school children at home are younger (42% are aged under 35 years) and more likely to have been on maternity/parental leave (34%).
- 32% of those who have been shielding consider themselves disabled.
- 17% of staff who have suffered physical or mental ill health have disabilities

## Impact of Change on Staff Experience

Staff who have experienced change, rate their overall experience at work lower than those who have not experienced change. This may be a direct or indirect relationship, with the change potentially impacting life satisfaction as well as workplace experience.

Overall Experience score	Experienced Change	Not Experienced Change
0 - 4	15%	10%
5 - 6	27%	23%
7 - 8	39%	42%
9 - 10	20%	25%
<b>Mean Score</b>	6.6	7.1

Looking in more detail at the individual component scores the pattern is quite consistent with most scoring lower among those who have experienced change. The difference is typically smallest within My Team/My Line Manager:

- **Experience as an Individual:** All components are 3 or 4 points lower for those who have experienced change
- **My Team/Line Manager:** Those who have experienced change rate 2 or 3 pts lower, except “I feel involved in decisions relating to my team” which is 4 pts lower.
- **My Organisation:** Most components are 3 to 4 pts lower among those who have experienced change, except “I have confidence & trust in Board members” which is 5 pts lower and “I understand how my role contributes to my organisation’s goals”, just 1 pt lower.

The type of change experienced has a differing level of impact on overall experience, with those suffering physical or mental ill-health scoring lowest and those reassigned to a different board scoring highest.

Overall Experience: Changes in Work Circumstances	Mean Score
Working at a different location	6.8
Working from home more than usual	6.9
Reassigned to a different team	6.6
Reassigned to a different role, but still in the same team	6.7
Reassigned to a different Directorate	6.6
Reassigned to a different Board	7.2
Overall Experience: Changes in Personal Circumstances	
I have tested positive for COVID-19	6.6
I have experienced physical or mental ill health	5.9
Loss of a friend or relative	6.4
Providing support for vulnerable relative	6.4
Worsening of financial situation	6.1
Care responsibilities for another member of the household	6.3
School age children at home	6.6
Preschool children at home	6.6
Other household members furloughed	6.6
Shielding at home	6.6
Staying away from home to protect my family	6.1

*Note: this analysis does not account for the impact of individuals experiencing multiple different types of change.*

Staff working from home more than usual do not differ greatly in demographic profile from the overall Health & Social Care profile. However, some staff groupings have an above average proportion of staff who say they are working from home more than usual:

- NHSScotland Senior Managers 19%
- Local Authority Adult Services 15%
- Local Authority Children's Services 19%
- Local Authority Criminal Justice 20%
- Local Authority Strategic Development 21%

Staff who have been reassigned to a different Board tend to be younger (32% are aged under 35 years). They are also more likely to be male (24%).

17% of Staff who have experienced (non-Covid) mental or physical ill-health are disabled, but otherwise have a demographic profile that is very similar to Health and Social Care overall.

As noted previously, staff with care responsibilities tend to be older (34% are 55 years and over) and 12% are themselves disabled.

# Appendix

## Appendix 1: iMatter 2022 Questionnaire

NHS Scotland is committed to improving the experience of those we provide care for through enhancing our "Staff Experience". The COVID-19 pandemic has impacted us all, how we work and how we live. Whilst we are moving forward and some areas of life are returning to normality, there are still many challenges to face.

The iMatter Staff Experience Continuous Improvement Model aims to deliver ways of engaging staff which feel right for you at every level and introduce new opportunities where you can feedback your experiences, in your teams, in a real-time basis.

The questionnaire should take no longer than 10 minutes to complete. Please answer as fully as possible by clicking the relevant buttons for each option. The "About You" questions are optional, but all others need to be answered in order to submit your response. If you are completing the questionnaire online you must select the submit button at the end of the questionnaire.

This is an anonymous survey, all answers collected will be treated with the utmost confidentiality. You will receive your team result and will be encouraged to take the opportunity to develop actions plans and solutions for continuous improvement as well as to share your successes through the Staff experience stories.

Thank you for your time and participation.

### **Please answer each question using one tick**

For the purpose of this questionnaire, My/I refers to you and your experience as an individual. Thinking of your experience in the 12 months please tell us if you agree or disagree with the following statements:

- Strongly Agree
- Agree
- Slightly Agree
- Disagree
- Strongly Disagree

- I am clear about my duties and responsibilities
- I get the information I need to do my job well
- I am given the time and resources to support my learning growth
- I have sufficient support to do my job well
- I am confident my ideas and suggestions are listened to
- I am confident my ideas and suggestion are acted upon
- I feel involved in decisions relating to my job
- I am treated with dignity & respect as an individual
- I am treated fairly and consistently
- I get enough helpful feedback on how well I do my work
- I feel appreciated for the work I do
- My work gives me a sense of achievement

### **My Team/My Direct Line Manager**

#### **Please answer each question using one tick**

For the purposes of this questionnaire, Direct Line Manager refers to the person who has overall responsibility for your team, this person has been named in the cover email.

Thinking of your experience in the last 12 months please tell us if you agree or disagree with the following statements relating to your team and direct line manager:

- Strongly Agree
- Agree
- Slightly Agree
- Disagree
- Strongly Disagree

I feel my direct line manager cares about my health & well-being  
My direct line manager is sufficiently approachable  
I have confidence & trust in my direct line manager  
I feel involved in decisions relating to my team  
I am confident performance is managed well within my team  
My team works well together  
I would recommend my team as a good one to be a part of

### **My Organisation**

**Please answer each question using one tick.**

- My Organisation refers to the NHS Board/Health & Social Care Partnership you are part of.
- Board/Health & Social Care Partnership members refers to:
  - Directors/Chief Officer, Executives
  - Non-Executives & the Chief Executive of your NHS Board/HSCP (the people who make the high level decisions in your organisation)

Thinking of your experience in the last 12 months please tell us if you agree or disagree with the following statements relating to your Organisation:

- Strongly Agree
- Agree
- Slightly Agree
- Disagree
- Strongly Disagree

I understand how my role contributes to the goals of my organisation  
I feel my organisation cares about my health & wellbeing  
I feel that board members who are responsible for my organisation are sufficiently visible  
I have confidence & trust in Board members who are responsible for my organisation  
I feel sufficiently involved in decisions relating to my organisation  
I am confident performance is managed well within my organisation  
I get the help & support I need from other teams and services within the organisation to do my job  
I would recommend my organisation as a good place to work  
I would be happy for a friend or relative to access services within my organisation

Please tell us how you feel about your overall experience of working for your organisation from a scale of 0 to 10 (where 0 = very poor and 10 = very good): \*

Overall working within my organisation is a.....

0 Very Poor Experience 1 2 3 4 5 6 7 8 9 10 Very Good Experience

### **About You**

We are asking the following questions in order that we can understand more about the profile of staff taking part in iMatter. It is NOT mandatory to answer these questions, but it will help us greatly if you do. The answers to these questions will be used in the following ways:

- To profile staff at a National, Board, Staff Grouping level
- To explore the relationship between staff profile and staff experience

Your anonymity is important to us and so we will not look at any groups with less than 10 people in them.

Please refer to Privacy Notice for information on how this data may be used.

Since last September, have you experienced change either in your job role or the environment you work in?

Yes            No

Which of the following have changed for you? (Select all that apply)

Working from home more than usual

Working at a different location (e.g., different hospital, care home etc.)

Reassigned to a different team

Reassigned to a different directorate

Reassigned to a different board

Reassigned to a different role, but still in the same team

Shielding at home (because I or other household members are clinically vulnerable)

Staying away from home to protect my family

Preschool children at home

School age children at home

Care responsibilities for another member of the household

Loss of a friend or relative

I have tested positive for COVID-19

I have been furloughed

Other household members furloughed

Worsening of financial situation (e.g., household job loss or reduced hours)

Providing support for vulnerable relative (living elsewhere)

Other (please specify)

### **Staff Grouping**

Which staff group do you belong to? (please select the group that reflects your main role)

NHSScotland Employees

Local Authority Employees

Which staff group do you belong to? (NHSScotland staff only)

Administrative Services (Finance, HR, IT, call handler, office and patient services)

Allied Health Profession

Ambulance Services

Health Science Services

Medical and Dental

Medical and Dental Support (physicians assistant, theatre services, operating dept, dental technician, hygienist, dental and orthodontist therapist, oral health)

Nursing and Midwifery

Other Therapeutic (Optometry, pharmacy, psychology, genetic counselling.)

Personal and Social Care

Senior Managers (Executive grades, senior manager pay band)

Support Services (Catering, domestic, portering, estates and facilities, security, laundry, transport, sterile services.)

Which staff group do you belong to? (local authority staff only)

Adult Services

Business Services (Business Improvement, Support Services, Information Systems, Finance and Administration)

Children's Services

Criminal Justice

Older People Services

Senior Managers

Strategic Development

As employers we are committed to ensuring all staff are treated fairly. It is important therefore for us to understand how the pandemic has impacted everyone in our organisations. This section helps your employer to look for any trends or patterns which might be cause for concern. Your response will not be tracked back to you. You can choose to answer all of these questions or only some of them.

What was your age at your last birthday?

What is your sex?

Male

Female

Do you consider yourself to be trans, or have a trans history?

Trans is a term used to describe people whose gender is not the same as the sex they were registered at birth

No

Yes, please describe your trans status (for example, non-binary trans man, trans woman)

What is your legal marital or registered civil partnership status?

Never married and never registered in a civil partnership

Married

In a registered civil partnership

Separated, but still legally married

Separated, but still legally in a civil partnership

Divorced

Formerly in a civil partnership which is now legally dissolved

Widowed

Surviving partner from a civil partnership

Which of the following best describes your sexual orientation?

Straight/Heterosexual

Gay or Lesbian

Bisexual

Prefer to self-describe, please write in:

Disability: The Equality Act 2010 describes a disabled person as: '...anyone who has a physical, sensory or mental impairment, which has a substantial and long term adverse effect on their ability to carry out normal day-to-day activities'.

Do you consider yourself to be disabled within the definition of the Equality Act 2010?

Yes

No

Do you have any of the following, which have lasted, or are expected to last, at least 12 months?

Deafness or partial hearing loss

Blindness or partial sight loss

Full or partial loss of voice or difficulty speaking (a condition which requires you to use equipment to speak)

Learning disability (a condition that you have had since childhood that affects the way you learn, understand information and communicate)

Learning difficulty (a specific learning condition that affects the way you learn and process information)

Developmental disorder (a condition that you have had since childhood which affects motor, cognitive, social and emotional skills, and speech and language)

Physical disability (a condition that substantially limits one or more basic physical activities such as walking, climbing stairs, lifting or carrying)

Mental health condition (a condition that affects your emotional, physical and mental wellbeing)

Long-term illness, disease or condition (a condition, not listed above, that you may have for life, which may be managed with treatment or medication)

Other condition, please write in:

No condition

Have you been on maternity/parental or shared parental leave in the past 12 months?

Yes

No

What religion, religious denomination or body do you belong to?

None

Church of Scotland

Roman Catholic

Other Christian, please write in:

Muslim, write in denomination:

Hindu

Buddhist

Sikh

Jewish

Pagan

Another religion or body, please write in:

What is your ethnic group?

White

Mixed or multiple ethnic group

Asian, Scottish Asian or British Asian

African, Scottish African or British African

Caribbean or Black

Other ethnic group

White

- Scottish
- Other British
- Irish
- Polish
- Gypsy / Traveller
- Roma
- Showman / Showwoman
- Other which ethnic group, please write in:

Mixed or multiple ethnic groups

Any mixed or multiple ethnic groups, please write in:

Asian, Scottish Asian or British Asian

Pakistani, Scottish Pakistani or British Pakistani

Indian, Scottish Indian or British Indian

Bangladeshi, Scottish Bangladeshi or British Bangladeshi

Chinese, Scottish Chinese or British Chinese

Other, please write in:

African, Scottish Africa or British African

Please write in (for example, NIGERIAN, SOMALI):

Caribbean or Black

Please write in (for example, SCOTTISH CARIBBEAN, BLACK SCOTTISH):

Other ethnic group

Arab, Scottish Arab or British Arab

Other, please write in (for example, SIKH, JEWISH):

**Appendix 2: Demographic Trend**

	2021	2022	Movement 2022 – 2021 (Percentage points)
<b>What is your sex?</b>			
Female	75%	75%	0
Male	19%	18%	-1
No Answer Given	6%	7%	+1
<b>What was your age at your last birthday?</b>			
Under 25	3%	3%	0
25-34	15%	16%	+1
35-44	21%	21%	0
45-54	27%	26%	-1
55-64	21%	21%	0
65+	2%	2%	0
No Answer Given	11%	11%	0
<b>Do you consider yourself to be trans, or have a trans history?</b>

**Appendix 5: Component Scores**

<b>All Health and Social Care staff responding to the iMatter 2022 survey</b>	<b>iMatter 2022</b>
<b>My Experience as an Individual</b>	
I am clear about my duties and responsibilities	87
I get the information I need to do my job well	81
I am given the time and resources to support my learning growth	72
I have sufficient support to do my job well	78
I am confident my ideas and suggestions are listened to	76
I am confident my ideas and suggestion are acted upon	72
I feel involved in decisions relating to my job	71
I am treated with dignity and respect as an individual	84
I am treated fairly and consistently	82
I get enough helpful feedback on how well I do my work	74
I feel appreciated for the work I do	75
My work gives me a sense of achievement	81
<b>My Team/My Line Manager</b>	
I feel my direct line manager cares about my health and well-being	86
My direct line manager is sufficiently approachable	88
I have confidence and trust in my direct line manager	85
I feel involved in decisions relating to my team	76
I am confident performance is managed well within my team	78
My team works well together	83
I would recommend my team as a good one to be a part of	84
<b>My Organisation</b>	
I understand how my role contributes to the goals of my organisation	83
I feel my organisation cares about my health and wellbeing	71
I feel that board members who are responsible for my organisation are sufficiently visible	55
I have confidence and trust in Board members who are responsible for my organisation	61
I feel sufficiently involved in decisions relating to my organisation	55
I am confident performance is managed well within my organisation	63
I get the help and support I need from other teams and services within the organisation to do my job	70
I would recommend my organisation as a good place to work	74
I would be happy for a friend or relative to access services within my organisation	77
