## // FOREWORD

The annual production survey of fish farms in Scotland for 2017 was carried out by Marine Scotland Science (MSS). This survey collates annual production data from Scottish fin fish farm sites operated by authorised aquaculture production businesses. The production tonnage obtained is for the wet weight (i.e. weight of live fish) at harvest.

Responses to questionnaires from Scottish fish farming companies covering the period 1st January to 31st December 2017 are summarised in this survey. The questionnaires are given in Appendix 1a-d. The survey is structured to allow readers to follow industry trends within the rainbow trout, Atlantic salmon and other farmed species sectors. Data from previous years have been reassessed and updated where necessary. To allow direct comparison to data provided in previous surveys, production information by region is presented in defined areas.

The cooperation of the Scottish fish farming industry in completing the questionnaires is gratefully acknowledged. The authors also acknowledge Alan Christie, Liam Mason, Keith Mutch, Sarah Payne, Mhairi Sinclair, Ronald Smith, Diane Spalding and Andrea Warwick for their contributions to the production of this report.

## // EXECUTIVE SUMMARY

The tables below summarise the results from the 2017 fish farms annual production survey.

Rainbow Trout (Oncorhynchus mykiss)

|  |  | 2016 | 2017 |
| :--- | :---: | ---: | ---: | ---: |
| Total production | (tonnes) | 8,096 | 7,637 |
| Production for the table | (tonnes) | 7,437 | 6,997 |
| Production for restocking | (tonnes) | 659 | 640 |
| Number of staff employed |  | 121 | 132 |
| Mean productivity | (tonnes/person) | 66.9 | 57.9 |
| Number of ova laid down to hatch | (millions) | 9.9 | 7.0 |
| Number of ova imported | (millions) | 9.6 | 6.5 |

In 2017, the production of rainbow trout decreased by 459 tonnes. Employment increased by 11 staff and mean productivity decreased to 57.9 tonnes per person. The number of ova laid down to hatch decreased by 2.9 million and the number of ova imported decreased by 3.1 million.

## Atlantic salmon (Salmo salar)

## Smolts

|  |  | 2016 | 2017 |
| :--- | :--- | :---: | :---: |
| Number of ova produced | (millions) | 13.7 | 12.6 |
| Number of ova laid down to hatch | (millions) | 64.3 | 65.7 |
| Number of ova exported | (millions) | 0.4 | 0.3 |
| Number of ova imported | (millions) | 49.4 | 57.9 |
| Number of smolts produced | (millions) | 42.9 | 46.2 |
| Number of smolts put to sea | (millions) | 43.0 | 46.1 |
| Number of staff employed |  | 294 | 291 |
| Mean productivity (OOOs smolts/person) |  | 145.9 | 158.6 |

The production of ova decreased by 1.1 million in 2017 and the number of ova laid down to hatch increased by 1.4 million. A very small amount of ova were exported in 2017 ( 0.3 million) and the number of ova imported increased by 8.5 million from the 2016 figure. The number of smolts produced increased by 3.3 million. In 2017 the number of staff decreased by three and mean productivity increased by 12,700 smolts per person.

Production fish

|  |  | 2016 | 2017 |
| :--- | :---: | :---: | :---: |
| Total production | (tonnes) | 162,817 | 189,707 |
| Production of 0-year fish | (tonnes) | 333 | 0 |
| Production of grilse | (tonnes) | 59,853 | 68,116 |
| Production of pre-salmon | (tonnes) | 51,310 | 58,329 |
| Production of salmon | (tonnes) | 51,321 | 63,262 |
| Mean fish weight 0-year | (kg) | 2.9 | - |
| Mean fish weight grilse | (kg) | 4.4 | 5.0 |
| Mean fish weight pre-salmon | (kg) | 4.6 | 4.8 |
| Mean fish weight salmon | (kg) | 4.7 | 5.7 |
| Number of staff employed |  | 1,486 | 1,431 |
| Mean productivity | tonnes/person | 109.6 | 132.6 |

Production tonnage increased by 26,890 tonnes with an increase in the mean harvest weight of grilse, pre-salmon and salmon. There were no 0-year fish harvested during 2017. Staff numbers decreased by 55 and mean productivity increased to 132.6 tonnes per person.

Smolt survival (percentage harvested)

| Survival (\%) | Years 0+1 | Year 2 | Total |
| :---: | :---: | :---: | :---: |
| 2014 input year | 50.6 | 22.7 | 73.3 |
| class | 54.7 | 24.4 | 79.1 |
| 2015 input year <br> class |  |  |  |

The smolt survival rate for the 2015 input year class increased to 79.1\%.

## Other Species

Including brown/sea trout (Salmo trutta); halibut (Hippoglossus hippoglossus); lumpsucker (Cyclopterus lumpus) and several species of wrasse (Labridae).

|  |  | 2016 | 2017 |
| :--- | :---: | ---: | ---: |
| Total production | (tonnes) | 122 | $91^{\text {a }}$ |
| Number of staff employed | (full-time) | 43 | 45 |
|  | (part-time) | 20 | 17 |
| Number of ova laid down to hatch | (millions) | 16.9 | $4.7^{\text {b }}$ |
| Number of ova imported | (millions) | 3.2 | 1.2 |

Some figures are excluded from this report as providing them would reveal production information from an individual company.
${ }^{\text {a }}$ Excluding halibut production.
${ }^{\mathrm{b}}$ Excluding halibut ova laid down to hatch.

In 2017, the production of other species decreased by 31 tonnes from the 2016 total, although this figure does not include halibut production. Overall, employment decreased by one person in 2017. There was a decrease in the number of ova laid down to hatch but again any halibut ova laid down to hatch were excluded.

## Number of Confirmed Escape Incidents from Fish Farms Notified to the Scottish Government

| Species | Number of reported <br> incidents which could <br> have led to an escape <br> of farmed fish | Number of reported <br> incidents which did <br> lead to an escape of <br> farmed fish | Number <br> of fish <br> escaped |
| :--- | :---: | :---: | :---: |
| Rainbow trout | 0 | 1 | 216 |
| Atlantic salmon <br> (freshwater stages) | 0 | 1 | 163 |
| Atlantic salmon <br> (seawater stages) | 6 | 5 | 30,009 |
| Other Species <br> (from sites rearing <br> seawater Atlantic <br> salmon) | 0 | 2 | 776 |

## // 1.RAINBOW TROUT (ONCORHYNCHUS MYKISS)

Production survey information was collected from all 23 companies actively involved in rainbow trout production, farming 44 active sites. This figure represents the entire industry operating in Scotland.

## Production

Table 1a: Annual production (tonnes) of rainbow trout during 2003-2017 and projected production in 2018

| Year | Tonnes | Year | Tonnes |
| :---: | :---: | :---: | :---: |
| 2003 | 7,085 | 2011 | 4,619 |
| 2004 | 6,352 | 2012 | 5,670 |
| 2005 | 6,989 | 2013 | 5,611 |
| 2006 | 7,492 | 2014 | 5,882 |
| 2007 | 7,414 | 2015 | 8,588 |
| 2008 | 7,670 | 2016 | 8,096 |
| 2009 | 6,766 | 2017 | 7,637 |
| 2010 | 5,139 | 2018 | $6,361^{*}$ |

* Industry estimate based on stocks currently being on-grown.

Production decreased in 2017 by 459 tonnes, a decrease of 6\%, to 7,637 tonnes.

Table 1b: Production (tonnes) for the table trade during 2007-2017 according to weight category

| Year | $<450 \mathrm{~g}$ <br> $<1 \mathrm{lb}$ | $450-900 \mathrm{~g}$ <br> $1-2 \mathrm{lbs}$ | $>900 \mathrm{~g}$ <br> $>2 \mathrm{lbs}$ | Total <br> Tonnes |
| :---: | :---: | :---: | :---: | :---: |
| 2007 | 2,499 | 1,663 | 2,407 | 6,569 |
| 2008 | 2,375 | 1,950 | 2,487 | 6,812 |
| 2009 | 2,232 | 1,143 | 2,620 | 5,995 |
| 2010 | 2,125 | 727 | 1,606 | 4,458 |
| 2011 | 1,421 | 1,004 | 1,433 | 3,858 |
| 2012 | 1,195 | 1,655 | 2,209 | 5,059 |
| 2013 | 1,908 | 825 | 2,268 | 5,001 |
| 2014 | 2,334 | 290 | 2,704 | 5,328 |
| 2015 | 2,299 | 258 | 5,476 | 8,033 |
| 2016 | 2,393 | 234 | 4,810 | 7,437 |
| 2017 | 2,000 | 544 | 4,453 | 6,997 |

Production for the table in 2017 was 6,997 tonnes, a decrease of 440 tonnes (6\%) on the 2016 total. This accounted for $92 \%$ of the total rainbow trout production, the same proportion as was produced in 2016. Also, an increase in the number of fish in the medium size range and decreases in the number of fish in the small and large size ranges were highlighted.

Table 1c: Production (tonnes) for the restocking trade during 2007-2017 according to weight category

| Year | $<450 \mathrm{~g}$ <br> $<1 \mathrm{lb}$ | $450-900 \mathrm{~g}$ <br> $1-2 \mathrm{lbs}$ | $>900 \mathrm{~g}$ <br> $>2 \mathrm{lbs}$ | Total <br> Tonnes |
| :---: | :---: | :---: | :---: | :---: |
| 2007 | 24 | 413 | 408 | 845 |
| 2008 | 27 | 351 | 480 | 858 |
| 2009 | 32 | 294 | 444 | 770 |
| 2010 | 19 | 201 | 461 | 681 |
| 2011 | 8 | 419 | 334 | 761 |
| 2012 | 22 | 266 | 323 | 611 |
| 2013 | 24 | 221 | 365 | 610 |
| 2014 | 28 | 256 | 270 | 554 |
| 2015 | 15 | 158 | 382 | 555 |
| 2016 | 35 | 183 | 441 | 659 |
| 2017 | 10 | 150 | 480 | 640 |

In 2017, production for the restocking of angling waters decreased to 640 tonnes representing a decrease of 19 tonnes (3\%) on the 2016 total. This accounted for $8 \%$ of total rainbow trout production in 2017. These figures represent the tonnage of fish supplied to angling waters for restocking purposes; they do not account for the catch taken by anglers. The production of small and medium sized fish showed decreases while there was an increase in the production of large sized fish.

Production by Site
Table 2: Numbers of sites grouped by tonnage produced during 2007-2017

| Year | Number of sites per production tonnage |  |  |  | Total <br> number of <br> sites |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | $<1-25$ | $26-100$ | $101-200$ | $>200$ | 48 |
| 2007 | 14 | 15 | 3 | 16 | 44 |
| 2008 | 8 | 15 | 7 | 14 | 39 |
| 2009 | 10 | 11 | 7 | 11 | 36 |
| 2010 | 7 | 13 | 9 | 7 | 33 |
| 2011 | 9 | 10 | 6 | 8 | 33 |
| 2012 | 10 | 10 | 6 | 8 | 34 |
| 2013 | 6 | 11 | 5 | 8 | 30 |
| 2014 | 6 | 11 | 5 | 9 | 31 |
| 2015 | 4 | 10 | 5 | 11 | 30 |
| 2016 | 6 | 10 | 3 | 13 | 32 |
| 2017 | 4 | 8 | 5 | 11 | 28 |

Production was reported from 28 of the 44 active sites. The number of producers in the size bracket 101-200 tonnes increased while those in the <1-25 tonnes, 26-100 tonnes and $>200$ tonnes size brackets decreased. These figures do not include those sites specialising in the production of ova or young fish for on-growing.

## Production by Method

Table 3: Grouping of rainbow trout sites by production tonnages, main methods of production in 2017 and comparison with production in 2016

| Production method | Production grouping (tonnes) in 2017 |  |  |  |  | Total tonnage and (\%) by method |  | Number of sites |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | <10 | 10-25 | 26-50 | 51-100 | >100 | 2016 | 2017 | 2016 | 2017 |
| FW cages | 1 | 0 | 0 | 0 | 5 | $\begin{gathered} 2,836 \\ (35.0 \%) \end{gathered}$ | $\begin{gathered} 2,592 \\ (34.0 \%) \end{gathered}$ | 6 | 6 |
| FW ponds and raceways | 0 | 1 | 3 | 4 | 5 | $\begin{gathered} 1,420 \\ (17.6 \%) \end{gathered}$ | $\begin{gathered} 1,484 \\ (19.4 \%) \end{gathered}$ | 15 | 13 |
| FW tanks and hatcheries | 2 | 0 | 0 | 1 | 0 | 81 (1.0\%) | 79 (1.0\%) | 4 | 3 |
| SW cages | 0 | 0 | 0 | 0 | 6 | $\begin{gathered} 3,759 \\ (46.4 \%) \end{gathered}$ | $\begin{gathered} 3,482 \\ (45.6 \%) \end{gathered}$ | 7 | 6 |
| SW tanks | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Total | 3 | 1 | 3 | 5 | 16 | 8,096 | 7,637 | 32 | 28 |

Freshwater production accounted for 4,155 tonnes (54.4\%) and seawater production for the remaining 3,482 tonnes ( $45.6 \%$ ). Production from freshwater ponds and raceways increased whilst there were small decreases in production from freshwater cages, freshwater tanks and hatcheries and seawater cages.

## Company and Site Data

Table 4: Number of companies and sites in production during 2004-2017

| Year | No. of companies | No. of sites |
| :---: | :---: | :---: |
| 2004 | 38 | 62 |
| 2005 | 42 | 70 |
| 2006 | 36 | 66 |
| 2007 | 38 | 70 |
| 2008 | 31 | 66 |
| 2009 | 27 | 56 |
| 2010 | 25 | 51 |
| 2011 | 23 | 48 |
| 2012 | 25 | 48 |
| 2013 | 24 | 46 |
| 2014 | 24 | 46 |
| 2015 | 24 | 45 |
| 2017 | 24 | 44 |

In 2017 the number of companies authorised by the Scottish Government and actively engaged in rainbow trout production was 23 . The number of sites registered and in production was 44.

## Staffing and Productivity

Table 5: Number of staff employed and productivity per person during 2004-2017

| Year | Full-time | Part-time | Total | Productivity <br> (tonnes/person) |
| :---: | :---: | :---: | :---: | :---: |
| 2004 | 115 | 37 | 152 | 41.8 |
| 2005 | 108 | 35 | 143 | 48.9 |
| 2006 | 112 | 35 | 147 | 51.0 |
| 2007 | 111 | 32 | 143 | 51.8 |
| 2008 | 107 | 34 | 141 | 54.4 |
| 2009 | 111 | 27 | 138 | 49.0 |
| 2010 | 98 | 31 | 129 | 39.8 |
| 2011 | 95 | 23 | 118 | 39.1 |
| 2012 | 79 | 28 | 107 | 53.0 |
| 2013 | 89 | 21 | 110 | 51.0 |
| 2014 | 93 | 20 | 113 | 52.1 |
| 2015 | 110 | 16 | 126 | 68.2 |
| 2016 | 100 | 21 | 121 | 66.9 |
| 2017 | 110 | 22 | 132 | 57.9 |

The overall number of staff employed in 2017 increased by 11 to 132 . The number of full-time staff increased by 10 while the number of part-time staff increased by one. Productivity, measured as tonnes produced per person, decreased by 13.5\% in 2017 with no distinction between full and part-time employees being made for this calculation.

## Production by Area

Table 6: Production and staffing by area in 2017

| Area | No. <br> of <br> sites | Table <br> production <br> (tonnes) | Restocking <br> production <br> (tonnes) | Mean <br> tonnes <br> per site | Staffing |  |  | Productivity <br> (tonnes/ <br> person) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| North | 4 | 2 | 31 | 8.3 | 4 | 2 | 6 | 5.5 |
| East | 13 | 1,032 | 333 | 105.0 | 38 | 7 | 45 | 30.3 |
| West | 16 | 5,198 | 25 | 326.4 | 50 | 5 | 55 | 95.0 |
| South | 11 | 765 | 251 | 92.4 | 18 | 8 | 26 | 39.1 |
| All | 44 | 6,997 | 640 | 173.6 | 110 | 22 | 132 | 57.9 |

Productivity was greatest in the West at 326.4 tonnes per site and 95.0 tonnes per person.

FIGURE 1: THE DISTRIBUTION OF ACTIVE RAINBOW TROUT SITES IN 2017

## Type of Ova Laid Down

Table 7: Number (000s) and proportions (\%) of eyed ova types laid down to hatch during 2006-2017

| Year | All female <br> diploid no. (\%) | Triploid no. (\%) | Mixed sex <br> diploid no. (\%) | Total ova |
| :---: | :---: | :---: | :---: | :---: |
| 2006 | $22,378(84)$ | $2,804(10)$ | $1,626(6)$ | 26,808 |
| 2007 | $23,630(83)$ | $2,531(9)$ | $2,140(8)$ | 28,301 |
| 2008 | $22,978(88)$ | $2,526(9)$ | $725(3)$ | 26,229 |
| 2009 | $15,469(87)$ | $2,341(13)$ | $35(<1)$ | 17,845 |
| 2010 | $13,352(89)$ | $1,052(7)$ | $675(4)$ | 15,079 |
| 2011 | $12,673(84)$ | $2,254(15)$ | $215(1)$ | 15,142 |
| 2012 | $10,967(85)$ | $2,005(15)$ | $7(<1)$ | 12,979 |
| 2013 | $7,857(80)$ | $1,955(20)$ | $77(<1)$ | 9,889 |
| 2014 | $8,321(75)$ | $2,710(25)$ | $9(<1)$ | 11,040 |
| 2015 | $10,245(85)$ | $1,800(15)$ | $76(<1)$ | 12,121 |
| 2016 | $7,986(80)$ | $1,943(20)$ | $5(<1)$ | 9,934 |
| 2017 | $2,366(34)$ | $4,670(66)$ | $5(<1)$ | 7,041 |

## Source of Ova Laid Down

Table 8: Number (000s) and sources of eyed ova laid down to hatch in 2006-2017

| Year | Ova produced in Great Britain (GB) |  |  | Imported ova |  |  | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Own stock | Other stock | Total | Northern hemisphere | Southern hemisphere | Total |  |
| 2006 | 541 | 2,169 | 2,710 | 22,588 | 1,510 | 24,098 | 26,808 |
| 2007 | 936 | 230 | 1,166 | 26,650 | 485 | 27,135 | 28,301 |
| 2008 | 582 | 487 | 1,069 | 25,160 | 0 | 25,160 | 26,229 |
| 2009 | 603 | 220 | 823 | 17,022 | 0 | 17,022 | 17,845 |
| 2010 | 415 | 50 | 465 | 14,614 | 0 | 14,614 | 15,079 |
| 2011 | 215 | 189 | 404 | 14,738 | 0 | 14,738 | 15,142 |
| 2012 | 14 | 230 | 244 | 12,735 | 0 | 12,735 | 12,979 |
| 2013 | 77 | 537 | 614 | 9,275 | 0 | 9,275 | 9,889 |
| 2014 | 9 | 655 | 664 | 10,376 | 0 | 10,376 | 11,040 |
| 2015 | 6 | 888 | 894 | 11,227 | 0 | 11,227 | 12,121 |
| 2016 | 35 | 349 | 384 | 9,550 | 0 | 9,550 | 9,934 |
| 2017 | 20 | 547 | 567 | 6,474 | 0 | 6,474 | 7,041 |

In 2017, the total number of eyed ova laid down to hatch decreased by almost 2.9 million (29\%) on the 2016 figure. The proportion of ova from GB broodstock increased to 8.1\% of the total and the rainbow trout industry remained reliant on imported ova. Data on the importation of ova into Scotland are also available from the health certificates and are shown in Table 9a. Any discrepancy between the figures in Tables 8 and 9a is due to data being obtained from two independent sources.

## Imports from Official Import Health Certificates

Table 9a: Number (000s) and sources of ova imported into Scotland from outwith GB during 2010-2017

| Source | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 |

| December | 850 | 0 | 0 | 0 |
| Totals | 3,518 | 300 | 1,240 | 774 |

Table 9c: Number (000s) and sources of fish imported into Scotland from outwith GB during 2010-2017

| Source | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| N. Ireland | $<1$ | 72 | 155 | 537 | 674 | 746 | 592 | 486 |
| Republic <br> of Ireland | 2 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

Suppliers within the European Union (EU) accounted for $86.7 \%$ of ova imported into Scotland during 2017 with Norway accounting for the remaining 13.3\%. To maintain their ability to regulate production throughout the year and produce a constant supply of fish for their markets, producers have to rely upon supplies of out of season ova. In recent years there has been a trend for producers to import part grown rainbow trout into Scotland from outwith GB.

Trade in Fry and Fingerlings
Table 10: Number (000s) of fry and fingerlings traded during 2006-2017

| Year | Fry and fingerlings bought <br> Allemale <br> diploid no. (\%) |  |  | Triploid no. <br> $(\%)$ | Mixed sex <br> diploid no. (\%) |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2006 | $19,731(89)$ | $1,675(7)$ | $790(4)$ | Total <br> number <br> bought | Total <br> number <br> sold |
| 2007 | $14,830(89)$ | $1,140(7)$ | $675(4)$ | 16,645 | 23,196 |
| 2008 | $24,298(95)$ | $1,082(4)$ | $118(0.5)$ | 25,498 | 31,036 |
| 2009 | $21,113(94)$ | $1,358(6)$ | 0 | 22,471 | 20,597 |
| 2010 | $15,539(95)$ | $585(4)$ | $141(1)$ | 16,265 | 14,686 |
| 2011 | $16,288(88.5)$ | $1,970(10.7)$ | $138(0.8)$ | 18,396 | 16,612 |
| 2012 | $12,543(91)$ | $1,226(9)$ | 0 | 13,769 | 12,088 |
| 2013 | $6,734(84)$ | $1,239(16)$ | 0 | 7,973 | 6,749 |
| 2014 | $5,911(81)$ | $1,423(19)$ | 0 | 7,334 | 6,719 |
| 2015 | $6,104(87)$ | $598(9)$ | $290(4)$ | 6,992 | 6,971 |
| 2016 | $6,452(85)$ | $1,125(15)$ | 0 | 7,577 | 6,779 |
| 2017 | $3,989(73)$ | $1,446(27)$ | 0 | 5,435 | 4,145 |

The established trade between hatcheries and on-growing farms continued in 2017. Some companies specialised in the production of fry and fingerlings. The total number of fry and fingerlings bought decreased by $28.3 \%$ while the number sold decreased by $38.9 \%$. The disparity between supply and demand is due to trade with England and Wales.

## Use of Vaccines

Table 11: Number of sites rearing fish vaccinated against enteric redmouth disease (ERM) and number of fish vaccinated (millions) during 2006-2017

| Year | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of <br> sites | 31 | 28 | 28 | 31 | 27 | 26 | 24 | 19 | 21 | 17 | 18 | 18 |
| No. of <br> fish | 36.4 | 41.4 | 29.1 | 27.5 | 20.0 | 20.3 | 20.4 | 9.9 | 10.0 | 8.3 | 7.3 | 5.4 |

Vaccines continued to be used as a preventative treatment against enteric redmouth disease (ERM), a potentially serious bacterial infection, caused by Yersinia ruckeri. Vaccination is generally carried out as a bath treatment at the fingerling stage, although some vaccines are administered by intra-peritoneal injection. A total of 5.4 million fish were vaccinated on 18 sites.

## Organic Production

Of the 44 sites recorded as being active in rainbow trout production in 2017, none were certified as organic.

## Escapes

There was one incident involving the loss of 216 fish from a rainbow trout site in 2017.

## // 2. ATLANTIC SALMON (SALMO SALAR) OVA AND SMOLTS

Production survey information was collected from all 24 companies actively involved in the freshwater production of Atlantic salmon, farming 79 active sites. This figure represents the entire freshwater industry operating in Scotland.

## Company and Site Data

Table 12: Number of companies and sites in production during 2008-2017

| Year | No. of companies | No. of sites |
| :---: | :---: | :---: |
| 2008 | 38 | 130 |
| 2009 | 30 | 105 |
| 2010 | 31 | 104 |
| 2011 | 28 | 98 |
| 2012 | 28 | 100 |
| 2013 | 27 | 102 |
| 2014 | 26 | 96 |
| 2015 | 25 | 87 |
| 2016 | 26 | 87 |
| 2017 | 24 | 79 |

In 2017 the number of companies authorised by the Scottish Government for freshwater production of Atlantic salmon decreased by two to 24 . A total of 79 sites were actively engaged in commercial production, a decrease of eight from the 2016 figure.

## Production and Staffing

Table 13: Number (000s) of smolts produced, staff employed and smolt productivity during 2007-2017

| Year | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number (000s) of smolts produced | 38,125 | 36,450 | 36,868 | 36,872 | 43,626 | 44,324 | 40,457 | 45,004 | 44,571 | 42,894 | 46,152 |
| Fulltime | 217 | 209 | 216 | 233 | 225 | 235 | 237 | 244 | 239 | 252 | 250 |
| Staffing Parttime | 62 | 54 | 54 | 56 | 68 | 93 | 48 | 65 | 55 | 42 | 41 |
| Total | 279 | 263 | 270 | 289 | 293 | 328 | 285 | 309 | 294 | 294 | 291 |
| Productivity, 000s of smolts per person | 136.6 | 138.6 | 136.5 | 127.6 | 148.9 | 135.1 | 142.0 | 145.6 | 151.6 | 145.9 | 158.6 |

Smolt production in 2017 increased by $8 \%$ compared to 2016. The number of staff employed in 2017 decreased by three and productivity increased by $8.7 \%$ to a figure of 158.6 smolts produced per person. Data for staffing and productivity in 2013 are shown, however, there are uncertainties with these data due to consolidation within the industry.

## Smolts by Age Group

Table 14: Number of smolts (000s) produced by type during 2005-2017

| Year | S $1 / 2$ | S1 | S1 $1 / 2$ | S2 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2005 | 12,639 | 22,197 | 1,489 | 1 | 36,326 |
| 2006 | 16,953 | 23,172 | 698 | 4 | 40,827 |
| 2007 | 15,431 | 22,694 | 0 | 0 | 38,125 |
| 2008 | 12,431 | 24,019 | 0 | 0 | 36,450 |
| 2009 | 13,837 | 23,031 | 0 | 0 | 36,868 |
| 2010 | 14,116 | 22,756 | 0 | 0 | 36,872 |
| 2011 | 17,233 | 26,393 | 0 | 0 | 43,626 |
| 2012 | 18,795 | 25,239 | 290 | 0 | 44,324 |
| 2013 | 19,024 | 21,279 | 154 | 0 | 40,457 |
| 2014 | 22,367 | 22,473 | 164 | 0 | 45,004 |
| 2015 | 23,850 | 20,711 | 10 | 0 | 44,571 |
| 2016 | 25,072 | 17,822 | 0 | 0 | 42,894 |
| 2017 | 28,072 | 18,080 | 0 | 0 | 46,152 |

In 2017, there was an increase in the number of $\mathrm{S} 1 / 2$ smolts (12.0\%) and S 1 smolts (1.4\%) produced. There was no production of S1½ and S2 smolts in 2017.

## Production Systems

Table 15: Number and capacity of production systems during 2013-2017

| System | No. of sites with system |  |  |  |  | Total capacity, 000s cubic metres |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Year | 2013 | 2014 | 2015 | 2016 | 2017 | 2013 | 2014 | 2015 | 2016 | 2017 |
| Cages | 44 | 41 | 38 | 38 | 36 | 372 | 351 | 355 | 400 | 357 |
| Tanks and Raceways | 58 | 55 | 49 | 49 | 43 | 64 | 65 | 47 | 46 | 55 |
| Total | 102 | 96 | 87 | 87 | 79 | 436 | 416 | 402 | 446 | 412 |

The principal types of facility used for the production of smolts in freshwater are cages or tanks and raceways. In 2017, the number of farms using cages decreased by two and the number of farms using tanks and raceways decreased by six. In terms of volume, cage capacity decreased by $43,000 \mathrm{~m}^{3}$ while tank and raceway capacity increased by $9,000 \mathrm{~m}^{3}$. This resulted in a net decrease in volume of $34,000 \mathrm{~m}^{3}$ available for the production of smolts in Scotland during 2017.

Table 16: Number (000s) of smolts produced and stocking densities by production system during 2013-2017

|  | Number of smolts produced (000s) |  |  |  |  | Stocking densities (smolts/m³) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Year | 2013 | 2014 | 2015 | 2016 | 2017 | 2013 | 2014 | 2015 | 2016 | 2017 |
| Cages | 20,910 | 22,816 | 18,135 | 15,884 | 17,207 | 56 | 65 | 51 | 40 | 48 |
| All others | 19,547 | 22,188 | 26,436 | 27,010 | 28,945 | 305 | 341 | 562 | 587 | 526 |
| Total | 40,457 | 45,004 | 44,571 | 42,894 | 46,152 | - | - | - | - | - |

The average stocking densities of cages increased from 40 to 48 smolts per m ${ }^{3}$ in 2017 compared to 2016, while densities in tanks and raceways decreased from 587 to 526 smolts per $\mathrm{m}^{3}$.

## Ova Production

Table 17: Number (000s) of salmon ova produced during 2010-2017

| Year | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of <br> ova | 91,655 | 78,208 | 57,489 | 56,904 | 33,450 | 11,605 | 13,689 | 12,631 |

In 2017, 12.6 million ova were stripped, a decrease of $8 \%$ from the number of ova produced in 2016.

Table 18: Source, number (000s) and previous year's estimate of ova laid down to hatch during 2006-2018

| Year | In-house <br> broodstock | Out- <br> sourced GB <br> broodstock | GB wild <br> broodstock | Foreign ova | Total | Previous <br> year's <br> estimate |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2006 | 19,063 | 17,768 | 63 | 27,157 | 64,051 | 58,385 |
| 2007 | 18,837 | 14,366 | 78 | 42,022 | 75,303 | 68,032 |
| 2008 | 19,831 | 14,261 | 171 | 26,409 | 60,672 | 75,302 |
| 2009 | 17,148 | 20,158 | 65 | 30,200 | 67,571 | 64,693 |
| 2010 | 13,744 | 26,220 | 0 | 29,657 | 69,621 | 61,011 |
| 2011 | 15,664 | 14,630 | 0 | 34,322 | 64,616 | 54,526 |
| 2012 | 18,556 | 9,981 | 0 | 34,700 | 63,237 | 55,723 |
| 2013 | 16,996 | 8,263 | 0 | 41,315 | 66,573 | 49,249 |
| 2014 | 14,418 | 2,725 | 10 | 53,684 | 70,837 | 48,149 |
| 2015 | 6,479 | 223 | 10 | 61,463 | 68,175 | 65,284 |
| 2016 | 5,884 | 4 | 0 | 58,458 | 64,346 | 59,604 |
| 2017 | 6,228 | 360 | 0 | 59,158 | 65,746 | 60,673 |
| 2018 |  |  |  |  |  | 67,374 |

The number of ova laid down to hatch was 65.7 million, an increase of 1.4 million (2.2\%) on the 2016 figure. The majority of the ova ( $90.0 \%$ ) were derived from foreign sources, this being an increase of 0.7 million (1.2\%) on the 2016 figure. Supplies derived from GB broodstock increased by 0.7 million, a $11.9 \%$ increase on the 2016 figure. No ova from GB wild broodstock were laid down in 2017, however, in previous years the ova derived from wild stocks were generally held and hatched for wild stock enhancement by the aquaculture industry in cooperation with wild fisheries managers.

## Smolts Produced and Put to Sea

Table 19: Actual and projected smolt production and smolts put to sea (millions) during 2008-2019

|  | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Actual smolts <br> put to sea | 36.6 | 38.5 | 38.5 | 42.7 | 41.1 | 40.9 | 48.1 | 45.5 | 43.0 | 46.1 |  |  |
| Smolts <br> produced | 36.4 | 36.9 | 36.9 | 43.6 | 44.3 | 40.5 | 45.0 | 44.6 | 42.9 | 46.2 |  |  |
| Estimated <br> production <br> Ratio of ova <br> laid down <br> to smolts <br> produced | 34.9 | 32.6 | 28.7 | 35.9 | 31.3 | 28.1 | 39.9 | 43.4 | 36.6 | 39.3 | 46.1 | 50.9 |

The figure for the number of smolts put to sea includes smolts produced in England and smolts imported from elsewhere, whereas smolt production data relate only to those produced in Scotland. Smolt producers estimate putting 46.1 million smolts to sea in 2018. The ratio of ova laid down to hatch to smolts produced in 2017 was less than the ratio in 2016.

## Scale of Production

Table 20: Smolt-producing sites grouped by numbers (000s) of smolts produced during 2004-2017

|  | Scale of production |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Year | No. of |  |  |  |  |  |  |  |  |
| sites in |  |  |  |  |  |  |  |  |  |  | \(\left.\begin{array}{c}Total <br>

smolts\end{array}\right)\)

Note: These data refer only to sites producing smolts. The sites holding only ova, fry or parr are excluded.
The number of sites producing smolts in 2017 was 45 . The number of sites producing less than 101,000 smolts has decreased by two and there has also been a decrease of four in the number of sites producing between 101,000 and one million smolts. The number of sites producing in excess of one million smolts per year increased by three.

## Production of Ova and Smolt by Production Area

Table 21: Staffing in 2017, ova laid down to hatch in 2016-2017, smolt production in 2016-2017 and estimated production in 2018-2019 by region

| Region | Number of staff employed in 2017 |  | Ova laid down to hatch (000s) |  | Smolt production (OOOs) |  | Estimated smolt production (000s) |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | F/T | P/T | 2016 | 2017 | 2016 | 2017 | 2018 | 2019 |
| North West | 133 | 26 | 31,637 | 34,643 | 23,787 | 26,316 | 25,999 | 30,736 |
| Orkney | 2 | 2 | 0 | 159 | 150 | 145 | 130 | 130 |
| Shetland | 28 | 0 | 7,834 | 7,602 | 3,428 | 3,055 | 3,450 | 3,750 |
| West | 53 | 11 | 17,363 | 16,362 | 10,386 | 10,675 | 11,578 | 11,518 |
| Western Isles | 24 | 2 | 6,460 | 6,980 | 3,785 | 4,769 | 4,445 | 4,270 |
| East and South | 10 | 0 | 1,052 | 0 | 1,358 | 1,192 | 540 | 540 |
| All Scotland | 250 | 41 | 64,346 | 65,746 | 42,894 | 46,152 | 46,142 | 50,944 |

In 2017, the North West and the West were the main areas where ova were laid down to hatch. The North West and the West were the main smolt producing areas. The greatest number of staff were employed in the North West region.

FIGURE 2: THE DISTRIBUTION OF ACTIVE ATLANTIC SALMON SMOLT SITES IN 2017

## International Trade in Ova

Since the introduction of the EU single market on 1st January 1993 and the associated Fish Health Regulations common to all EU member states, a trade in live salmon and ova has been established. In addition, the European Economic Area (EEA) agreement allows trade between the EU and the member states of the European Free Trade Association (EFTA). Trade is based on the same rules as are established within the EU regarding compartments and zones declared free from listed diseases.

Trade with Third Countries has also been established, but only from sites that have met the same health standards as are established within the EU regarding the approval of farms and zones for listed diseases. Exports to countries outside the EU are subject to the health conditions placed by the importing country. Marine Scotland Science advises potential exporters to ascertain with the importing country any specific health testing requirements that may be a condition of import.

## Imports and Exports

Table 22a: Source and number (000s) of ova, parr and smolts imported during 2005-2017 derived from health certificates

| Import Year | Ova |  |  |  |  |  | Parr and Smolts |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Member States | EFTA |  | Third Countries |  | Total |  |  |
|  |  | Iceland | Norway | Australia | USA |  | States | Norway |
| 2005 | 2,610 | 570 | 13,210 | 0 | 450 | 16,840 | 150 | 0 |
| 2006 | 11,575 | 300 | 15,940 | 2,400 | 0 | 30,215 | 375 | 0 |
| 2007 | 10,511 | 0 | 33,555 | 0 | 0 | 44,066 | 420 | 0 |
| 2008 | 5,600 | 0 | 22,703 | 0 | 0 | 28,303 | 519 | 0 |
| 2009 | 5,460 | 0 | 29,938 | 0 | 0 | 35,398 | 328 | 0 |
| 2010 | 2,150 | 0 | 26,533 | 0 | 0 | 28,683 | 452 | 0 |
| 2011 | 3,400 | 0 | 35,851 | 0 | 0 | 39,251 | 800 | 0 |
| 2012 | 10,134 | 0 | 23,849 | 0 | 0 | 33,983 | 0 | 0 |
| 2013 | 10,700 | 2,719 | 35,044 | 0 | 0 | 48,463 | 55 | 0 |
| 2014 | 5,218 | 3,813 | 49,831 | 0 | 0 | 58,862 | 1,602 | 1,748 |
| 2015 | 4,815 | 8,978 | 45,926 | 0 | 0 | 59,719 | 2,118 | 365 |
| 2016 | 5,444 | 5,324 | 38,602 | 0 | 0 | 49,370 | 1,956 | 0 |
| 2017 | 7,000 | 13,883 | 37,025 | 0 | 0 | 57,908 | 2,012 | 0 |

The numbers of ova imported increased by 17.3\%. The number of parr and smolts imported increased from that observed in 2016, with just over 2 million parr and smolts imported from EU member states.

Table 22b: Destination and number (000s) of salmon ova, parr and smolts exported during 2006-2017 derived from health certificates

|  | Farmed origin ova |  |  |  |  | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | Parr and Smolts

In 2017, 339,000 ova were exported. Parr and smolt exports increased by 33,000 fish on the 2016 figure.

## Vaccines

Table 23: Number of sites using vaccines and number (millions) of fish vaccinated during 2009-2017

| Year | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of sites <br> No. of fish <br> (millions) <br> vaccinated | 68 | 70 | 67 | 63 | 63 | 56 | 55 | 47 | 46 |

Vaccines were used to provide protection against furunculosis, infectious pancreatic necrosis (IPN), ERM, vibriosis and salmonid alphavirus (SAV). The majority of fish were vaccinated against furunculosis and IPN, with smaller numbers of fish being vaccinated against ERM, vibriosis and SAV. A total of 58.4 million fish were vaccinated across 46 sites.

## Escapes

In 2017, there was one incident involving the loss of 163 fish from a site rearing freshwater Atlantic salmon.

## // 3.ATLANTIC SALMON - PRODUCTION

## Production

Production survey information was collected from all 12 companies actively involved in Atlantic salmon production, farming 226 active sites. This figure represents the entire industry operating in Scotland.

Table 24: Annual production of salmon (tonnes) during 1997-2017 and projected production in 2018

| Year | Tonnes | Percentage <br> difference | Year | Tonnes | Percentage <br> difference |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1997 | 99,197 | 19 | 2008 | 128,606 | -1 |
| 1998 | 110,897 | 12 | 2009 | 144,247 | 12 |
| 1999 | 126,686 | 14 | 2010 | 154,164 | 6.9 |
| 2000 | 128,959 | 2 | 2011 | 158,018 | 2.5 |
| 2001 | 138,519 | 7 | 2012 | 162,223 | 2.7 |
| 2002 | 144,589 | 4 | 2013 | 163,234 | 0.6 |
| 2003 | 169,736 | 17 | 2014 | 179,022 | 9.7 |
| 2004 | 158,099 | -7 | 2015 | 171,722 | -4.1 |
| 2005 | 129,588 | -18 | 2016 | 162,817 | -5.2 |
| 2006 | 131,847 | 2 | 2017 | 189,707 | 16.5 |
| 2007 | 129,930 | -1.4 | 2018 | $150,774^{\star}$ |  |

*industry estimate of projected tonnage based on stocks currently being on-grown.

The total production of Atlantic salmon during 2017 was 189,707 tonnes, an increase of 26,890 tonnes ( $16.5 \%$ ) on the 2016 total and the highest ever level of production recorded in Scotland.

Table 25: Number (000s), production (tonnes) of salmon harvested and mean fish weight (kg) per year class during 2007-2017

|  | Year of smolt input | Year of harvest | Number (000s) | Production (tonnes) | Mean weight at harvest (kg) |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Harvest in year 0 (i.e. in year of input) | 2007 | 2007 | 23 | 40 | 1.7 |

| 2017 | 46,116 | 0 | - | - | 0 |  |  |  |  |  |  |  |  |  |  |  |

In 2015, the last year for which survival can be calculated, the survival rate from smolt input to harvest increased to $79.1 \%$. Of the 2016 year class, $59.9 \%$ of the input has been harvested, $5.2 \%$ higher than the average harvest of fish one year after input in the 2015 year class. In 2017, there was no harvest of fish from the 2017 input. This was a decrease compared with the proportion of fish harvested from the same year class in 2016.

## Smolts to Sea

Table 29: Number (000s) and origin of smolts put to sea during 2005-2017

| Year | Smolts put to sea (000s) |  |  |  | $\begin{aligned} & \text { Total } \\ & \text { (000s) } \end{aligned}$ | Scottish Origin <br> \% | English Origin |  | Other Origin |  |

|  | S1/2 | S1 | S11/2 | S2 |  |  | (000s) | \% | (000s) | \% |
| 2005 | 13,051 | 22,501 | 1,616 | 0 | 37,168 | 96 | 1,594 | 4 | 0 | 0 |
| 2006 | 15,578 | 23,733 | 1,779 | 0 | 41,090 | 96 | 1,257 | 3 | 272 | <1 |
| 2007 | 14,665 | 23,188 | 0 | 0 | 37,853 | 94 | 1,747 | 5 | 420 | 1 |
| 2008 | 11,101 | 25,561 | 0 | 0 | 36,662 | 96 | 1,418 | 4 | 0 | 0 |
| 2009 | 14,967 | 23,581 | 0 | 0 | 38,548 | 95 | 1,700 | 4 | 105 | <1 |
| 2010 | 14,069 | 24,421 | 0 | 0 | 38,490 | 95 | 1,541 | 4 | 120 | <1 |
| 2011 | 17,721 | 25,012 | 0 | 0 | 42,733 | 96 | 1,765 | 4 | 0 | 0 |
| 2012 | 17,334 | 23,480 | 280 | 0 | 41,094 | 96 | 1,510 | 4 | 0 | 0 |
| 2013 | 19,262 | 21,534 | 140 | 0 | 40,936 | 97 | 1,169 | 3 | 0 | 0 |
| 2014 | 23,758 | 24,212 | 142 | 0 | 48,112 | 94 | 893 | 2 | 2,072 | 4 |
| 2015 | 22,886 | 22,569 | 10 | 0 | 45,465 | 96 | 938 | 2 | 1,082 | 2 |
| 2016 | 22,052 | 20,905 | 0 | 0 | 42,957 | 97 | 1,048 | 2 | 611 | 1 |
| 2017 | 25,490 | 20,626 | 0 | 0 | 46,116 | 97 | 976 | 2 | 300 | <1 |

The total number of smolts put to sea in 2017 was 46.1 million. This smolt input comprised S1s (44.7\%) and S $1 / 2$ s (55.3\%). There was no production of S1 $1 / 2 \mathrm{~s}$ or S 2 s in 2017. Just under 3\% of the smolts stocked to Scottish salmon farms were sourced from outwith Scotland, less than 1\% of which came from sources outwith GB. This was a very slight decrease compared with the proportion observed in 2016.

Survival and Production in Smolt Year Classes by Production Area
Table 30: Number (000s) of smolts put to sea and year class survival by area during 2006-2017

| Region | Smolts put to sea (000s) |  | Harvest in year 0 |  |  | Harvest in year 1 |  |  | Harvest in year 2 |  |  | Total Harvest |  |

## Staffing

Table 31: Number of staff employed in the production of salmon during 2007-2017

| Year | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 |
| ---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Staff $\quad$ F/T | 798 | 849 | 874 | 944 | 923 | 944 | 1,081 | 1,191 | 1,256 | 1,379 | 1,362 |
| P/T | 118 | 100 | 89 | 120 | 90 | 115 | 99 | 134 | 107 | 107 | 69 |
| Total staff | 916 | 949 | 963 | 1,064 | 1,013 | 1,059 | 1,180 | 1,325 | 1,363 | 1,486 | 1,431 |
| Productivity <br> (tonnes/person) | 141.8 | 135.5 | 149.8 | 144.9 | 156.0 | 153.2 | 138.3 | 135.1 | 126.0 | 109.6 | 132.6 |

In 2017, the total number of staff employed in salmon production was 1,431, a decrease of 55 compared with 2016. The staffing figures collected refer specifically to the production of Atlantic salmon and do not include figures for staff involved with processing or marketing activities. Productivity increased from 109.6 to 132.6 tonnes produced per person.

## Production Methods

Table 32: Production methods, capacity, tonnage and average stocking densities ( $\mathrm{kg} / \mathrm{m}^{3}$ ) during 2015-2017

| Method | Number of sites |  |  | Total capacity (000s cubic metres) |  |  | Production (tonnes) |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2015 | 2016 | 2017 | 2015 | 2016 | 2017 | 2015 | 2016 | 2017 |
| Seawater tanks | 4 | 5 | 4 | 6.2 | 7.4 | 5.7 | 179 | 21 | 26 |
| Seawater cages | 250 | 248 | 222 | 20,338 | 20,067 | 19,108 | 171,543 | 162,796 | 189,681 |
| For cage sites: ratio of production (kg) to cage capacity (m) |  |  |  |  |  |  | 8.4 | 8.1 | 9.9 |

In 2017, the majority of fish were produced in seawater cages. There were 26 tonnes of production from seawater tank sites in 2017. This reflects the high installation and running costs incurred in operating seawater tank systems. Most seawater tank capacity has been re-deployed for the production of other species of marine fin fish or salmon broodstock.

Sea cage capacity decreased by 959,000 $\mathrm{m}^{3}$ during 2017 and the number of sea cage sites in production decreased by 26. Production efficiency in sea cages, measured as the ratio of fish weight in kilograms produced per cubic metre, increased to $9.9 \mathrm{~kg} / \mathrm{m} 3$. In cage sites, the ratio of production (expressed in kilograms) to cage capacity (expressed in cubic metres) was 8.4, 8.1 and 9.9 in 2015, 2016 and 2017 respectively.

| 2017 | 0 | $<0.1$ | 0 | 0.6 | 3.2 | 13.9 | 82.3 | - | - |

*Includes farms stocked but having no production.

In 2017, the number of sites with no production decreased by 24 whilst the number producing 1 to 500 tonnes decreased by 14. The number of sites producing over 500 tonnes increased by 11, continuing the trend towards production in larger sites and 82.3\% of production being derived from sites producing over 1000 tonnes.

## Company Productivity

Table 34: Number of companies grouped by production (tonnes), staff and productivity (tonnes per person) during 2016-2017

| Total Tonnage |  | 0-100 | $\begin{aligned} & 101- \\ & 200 \end{aligned}$ | $\begin{aligned} & 201 \\ & 400 \end{aligned}$ | $\begin{aligned} & 401 \\ & 700 \end{aligned}$ | $\begin{aligned} & 701- \\ & 1,000 \end{aligned}$ | $\begin{aligned} & 1,001- \\ & 2,000 \end{aligned}$ | >2,000 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of companies | 2016 | 6 | 0 | 1 | 0 | 1 | 0 | 7 | 15 |
|  | 2017 | 5 | 0 | 0 | 0 | 0 | 1 | 6 | 12 |
| No. of tonnes | 2016 | 21 | 0 | 211 | 0 | 808 | 0 | 161,777 | 162,817 |
|  | 2017 | 26 | 0 | 0 | 0 | 0 | 1864 | 187,817 | 189,707 |
| Staff (total) | 2016 | 14 | 0 | 4 | 0 | 38 | 0 | 1,430 | 1,486 |
|  | 2017 | 10 | 0 | 0 | 0 | 0 | 31 | 1,390 | 1,431 |
| Productivity (tonnes/person) | 2016 | 2 | - | 53 | - | 21 | - | 113 | 110 |
|  | 2017 | 3 | - | - | - | - | 60 | 135 | 133 |

The greatest productivity of 135 tonnes per person was achieved in the companies producing over 2000 tonnes. The least productivity of 3 tonnes per person was from the companies producing between 0-100 tonnes. In comparison with 2016, the average company productivity increased from 110 to 133 tonnes per person. Overall, production was dominated by six companies in 2017 which between them accounted for $99 \%$ of Scotland's farmed Atlantic salmon production.

Staff and Production by Production Area
Table 35: Staff and production (tonnes) by area 2008-2017 and projected production in 2018

| Region | Year | Staff |  | Annual Production | Productivity (t/person) | Year of input |  | Grilse |  | Pre-salmon |  | Salmon |  |

## Company and Site Data

Table 36: Number of companies and sites engaged in the production of Atlantic salmon during 2007-2017

| Year | Number of companies |  |  | Number of sites |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Producing | Non-producing | Total | Producing | Non-producing | Total |
| 2007 | 28 | 10 | 38 | 158 | 89 | 247 |
| 2008 | 26 | 9 | 35 | 139 | 118 | 257 |
| 2009 | 25 | 6 | 31 | 150 | 104 | 254 |
| 2010 | 20 | 10 | 30 | 140 | 109 | 249 |
| 2011 | 21 | 6 | 27 | 148 | 106 | 254 |
| 2012 | 16 | 6 | 22 | 142 | 115 | 257 |
| 2013 | 15 | 6 | 21 | 145 | 112 | 257 |
| 2014 | 11 | 7 | 18 | 143 | 117 | 260 |
| 2015 | 10 | 6 | 16 | 139 | 115 | 254 |
| 2016 | 10 | 5 | 15 | 136 | 117 | 253 |
| 2017 | 8 | 4 | 12 | 133 | 93 | 226 |

The number of companies authorised and actively producing Atlantic salmon in 2017 was eight, a decrease of two from 2016. Four companies remained active and authorised, although not producing salmon for harvest in 2017. This continued the trend of Atlantic salmon production becoming concentrated within fewer companies. These 12 companies had 226 registered active sites, although not all these sites produced fish for harvest in 2017.

## Fallowing

Table 37: Number of seawater cage sites employing a fallow period during 2008-2017

|  | Fallow Period (weeks) |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Year | 0 | $<4$ | $4-8$ | $9-26$ | $27-51$ | 52 | Total |
|  | 53 | 16 | 28 | 92 | 40 | 28 | 257 |
| 2008 | 51 | 3 | 30 | 86 | 46 | 37 | 253 |
| 2010 | 53 | 8 | 26 | 83 | 41 | 36 | 247 |
| 2011 | 60 | 10 | 31 | 85 | 27 | 39 | 252 |
| 2012 | 58 | 4 | 31 | 97 | 28 | 37 | 255 |
| 2013 | 51 | 4 | 31 | 92 | 35 | 43 | 253 |
| 2014 | 48 | 4 | 36 | 89 | 29 | 51 | 257 |
| 2015 | 45 | 6 | 41 | 84 | 27 | 47 | 250 |
| 2016 | 47 | 5 | 27 | 88 | 32 | 49 | 248 |
| 2017 | 40 | 9 | 21 | 88 | 24 | 40 | 222 |

Of the 222 seawater cage sites recorded as being active in 2017, 40 sites were fallow for the entire year whilst 142 sites were fallow for a variable period. There were 40 sites that did not fallow in 2017. The normal production cycle in seawater varies in length between 12 months and two years and a fallow period at the end of production can break the cycle of disease or parasitic infections.

## Broodstock Sites

Table 38: Number of sites holding Atlantic salmon broodstock during 2006-2017

| Year | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Broodstock <br> sites | 17 | 20 | 20 | 11 | 10 | 11 | 7 | 8 | 8 | 4 | 3 | 4 |

In 2017, the number of freshwater and seawater sites holding broodstock increased by one. The number of sites holding broodstock in any one year can be variable, as can be seen from the previous years' figures, which indicate no obvious trend. A total of 4,776 fish were stripped, yielding 12.6 million ova, giving an average yield of 2,638 ova per fish.

## Organic Production

Table 39: Organic production of Atlantic salmon during 2010-2017

| Year | Number of active cage <br> sites | Number of cage sites <br> certified as organic | Production <br> (tonnes) |
| :---: | :---: | :---: | :---: |
| 2010 | 247 | 14 | 6,122 |
| 2011 | 252 | 10 | 3,104 |
| 2012 | 255 | 7 | 4,597 |
| 2013 | 253 | 8 | 5,207 |
| 2014 | 257 | 8 | 3,588 |
| 2015 | 250 | 5 | 2,382 |
| 2016 | 248 | 5 | 3,903 |
| 2017 | 222 | 5 | 4,644 |

Of the 222 active Atlantic salmon seawater cage sites in 2017, five were certified as organic, producing 4,644 tonnes.

## Escapes

There were five incidents involving the loss of 30,009 fish from seawater Atlantic salmon sites in 2017. There were six additional incidents reported where the companies confirmed there was no loss of fish.

## // 4.OTHER SPECIES

The Scottish aquaculture industry has continued to farm other species of fish during 2017. The production of brown trout (Salmo trutta) showed an increase, with the majority of production being for the angling restocking market. In 2017 there was production of halibut (Hippoglossus hippoglossus) but the figure cannot be published without revealing the production from an individual company. No Arctic charr (Salvelinus alpinus) or cod (Gadus morhua) were produced during 2017. Lumpsucker (Cyclopterus lumpus) and several species of wrasse (Labridae) were also produced in 2017. The production of lumpsucker and wrasse are targeted at the marine Atlantic salmon industry where they are used as a biological control for parasites.

## Company, Site and Production Data

Table 40: Number of companies and sites producing other species in 2017, annual production of other species (tonnes) during 2014-2017 and estimated production in 2018

|  | No. of <br> companies | No. of <br> sites | 2014 <br> Production <br> tonnage | 2015 <br> Production <br> tonnage | 2016 <br> Production <br> tonnage | 2017 <br> Production <br> tonnage | 2018 <br> Production <br> tonnage* |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Arctic charr | 0 | 0 | 0 | $\dagger$ | 0 | 0 | 0 |
| Brown trout/ <br> Sea trout | 11 | 12 | 48 | 42 | 41 | 61 | 27 |
| Cod | 0 | 0 | $\dagger$ | 0 | 0 | 0 | 0 |
| Halibut | 1 | 3 | 66 | 56 | 67 | $\dagger$ | $\ddagger$ |
| Lumpsucker | 4 | 6 | 5 | 6 | 10 | 26 | 37 |
| Wrasse spp. | 3 | 4 | 0.1 | 3 | 4 | 4 | 5 |

* Industry estimates based on stocks currently being on-grown.
$\dagger$ Production occurred but this cannot be shown without revealing the figure for an individual company.
$\ddagger$ Estimate provided but cannot be shown without revealing the figure for an individual company.

## Staffing

Table 41: Number of staff employed in farming other species during 2008-2017

| Year | Full-time | Part-time | Total |
| :---: | :---: | :---: | :---: |
| 2008 | 80 | 44 | 124 |
| 2009 | 23 | 22 | 45 |
| 2010 | 19 | 24 | 43 |
| 2011 | 24 | 19 | 43 |
| 2012 | 25 | 21 | 46 |
| 2013 | 29 | 21 | 50 |
| 2014 | 29 | 20 | 49 |
| 2015 | 35 | 15 | 50 |
| 2016 | 43 | 20 | 63 |
| 2017 | 45 | 17 | 62 |

In 2017, the overall number of staff employed in the production of other species decreased by one, to 62 staff.

Production of Cleaner fish
Table 42: Number (000s) of cleaner fish produced during 2015-2017

|  | Number of fish produced (000s) |  |  |
| :--- | :---: | :---: | :---: |
| Species | 2015 | 2016 | 2017 |
| Lumpsucker | 235 | 262 | 925 |
| Wrasse spp. | 75 | 118 | 58 |

In recent years lumpsucker and wrasse spp. have been produced for use as a biological control for parasites in the marine Atlantic salmon industry. Data on the number of fish produced has only been collected since 2015. As data for future years is collected it will show trends in cleaner fish production.

## Ova Laid Down to Hatch

Table 43: Source of ova from other species laid down to hatch during 2017

|  | Source of ova laid down to hatch (000s) |  |  |
| :--- | :---: | :---: | :---: |
| Species | Own broodstock | Other GB <br> broodstock | Foreign ova |
| Brown trout/sea trout | 489 | 7 | 0 |
| Halibut | $\S$ | 0 | 0 |
| Lumpsucker | 0 | 100 | 1,200 |
| Wrasse spp. | 2,935 | 0 | 0 |

§ Own broodstock ova was laid down to hatch but this cannot be shown without revealing the figure for an individual company.

## Trade in Small Fish

Table 44: Trade in small fish of other species in 2017

| Species | Bought (000s) | Sold (000s) |
| :--- | :---: | :---: |
| Halibut | $\#$ | $\#$ |
| Brown trout/sea trout | 56 | 0 |
| Lumpsucker | 5,033 | 454 |
| Wrasse spp. | 0 | 44 |

\# During 2017 there was trade of small halibut but figures cannot be shown without revealing the figure for an individual company.

There was also a small amount of production of: brook charr (Saluelinus fontinalis) and tiger trout (Salmo trutta $\times$ Saluelinus fontinalis). However, due to the small number of companies in production, it is not possible to summarise these data without revealing the production of individual companies.

## Organic Production

Of the 25 sites recorded as producing other species in 2017, no organic production was reported.

## Escapes

There were two incidents involving the loss of 776 cleaner fish (283 lumpsucker and 493 wrasse) from sites rearing seawater salmon during 2017.

## // 5.SCOTTISH MARINE REGIONS

The Marine (Scotland) Act 2010 introduces integrated management of Scotland's seas. The creation of a National Marine Plan, as required by the Act, sets the wider context for planning within Scotland including what should be considered when creating regional marine plans. Eleven Scottish Marine Regions have been created under the Act (see Figure 4) which cover sea areas extending out to 12 nautical miles.

To support the development of Regional Marine Plans by Regional Marine Planning Partnerships, tonnages and financial values of annual finfish production have been calculated for the regions defined under the Act. These regional data are presented in Appendix 3. In order to maintain commercial confidentiality salmon production figures for Argyll \& Clyde and the North Coast \& West Highlands have been merged. Other finfish species including brown/sea trout, rainbow trout, cod, halibut and cleaner fish were produced, however these figures cannot be attributed to Scottish Marine Regions due to commercial confidentiality.

FIGURE 4: SCOTTISH MARINE REGIONS

## // 6.SUMMARY

## Rainbow trout

The production of rainbow trout decreased by $6 \%$ in 2017 to 7,637 tonnes and was directed at the table (92\%) and restocking (8\%) markets. The total numbers of staff employed by the sector increased by 11 to 132 . There was an overall decrease in the productivity of the industry to 57.9 tonnes per person.

In 2017, the number of eyed ova laid down to hatch ( 7.0 million) decreased by 2.9 million and was mainly triploid stock (66\%). The proportion of ova from GB broodstock increased to $8.1 \%$. Denmark was the largest source of imported ova with $60.3 \%$ of the total, this was an increase proportionally from 2016. There were no imports of ova from the Southern hemisphere during 2017. The Scottish rainbow trout industry continues to be highly dependent on imported ova. Additionally, imports of part grown rainbow trout from Northern Ireland continued in 2017.

## Atlantic salmon

In 2017, the total production of Atlantic salmon increased by 26,890 tonnes to 189,707 tonnes, a $16.5 \%$ increase on the 2016 production total and the highest ever level of production recorded in Scotland. The survey shows increases in the production of grilse pre-salmon and salmon. The number of staff directly employed on the farms decreased by 55. Overall, there was a increase in the productivity of tonnes produced per person from 109.6 to 132.6. The estimated harvest forecast for 2018 is 150,774 tonnes. The trend towards concentrating production in larger sites was maintained with $82.3 \%$ of production being concentrated in the sites producing over 1,000 tonnes per annum.

During 2017 there was a decrease in the number of ova produced to 12.6 million. The number of ova laid down to hatch increased by $2.2 \%$ to 65.7 million. This highlights the trend towards using foreign ova sources with $90.0 \%$ of the ova laid down to hatch being imported and only $10.0 \%$ derived from GB sources. Smolt production increased to 46.2 million, with the majority being produced as $\mathrm{S}^{1} / 2$ smolts ( $60.8 \%$ ) and the remainder as S1 smolts (39.2\%). The number of staff directly employed on freshwater sites decreased by three in 2017 to 291 staff while productivity increased to 158,600 fish per person. Projections for 2018 suggest that a similar number of smolts will be produced as was seen in 2017, followed by an increase in 2019.

## Other Species

There was an increase in the production of brown/sea trout from 41 tonnes in 2016 to 61 tonnes in 2017. Halibut production occurred in 2017 but the figure cannot be shown without revealing the production of an individual company. During 2017, there was no reported production of Arctic charr or cod. Lumpsucker and wrasse were produced for use as biological controls for parasites in the marine Atlantic salmon farming industry. In 2017, the total number of staff employed in the production of other species decreased by one to 62 .

## // APPENDIX 1

## Questionnaires sent to Fish Farmers

# ANNUAL RETURN OF INFORMATION FRом SCOTTISH FISH FARMS FOR the PERIOD 1 JANUARY to 31 DECEMBER 2017 <br> RAINBOW TROUT - DATA 

Please complete and return by 31 January 2018 to L A Munro, Marine Scotland Science 375 Victoria Road, Aberdeen, AB11 9DB

Business No:

How many staff were employed in rainbow trout production (company total)
 Part time male Part time female

2 Please detail any accreditation schemes this company is a member of;

3 How many eyed ova were laid down for hatching in 2017
a from own broodstock
b from other GB broodstock

6 How many bought fry/fingerlings were

7 How many of these fish were vaccinated against ERM TONNES for the TABLE TRADE
$<450 \mathrm{~g}$ (<1 lb)
$450-900 \mathrm{~g}(1-2 \mathrm{lb})$
$>900 \mathrm{~g}(>2 \mathrm{lb})$
9 What was your total production in TONNES for the RESTOCKING TRADE
a $\quad<450 \mathrm{~g}(<1 \mathrm{lb})$
b $\quad 450-900 \mathrm{~g} \mathrm{(1-2} \mathrm{lb})$
$>900 \mathrm{~g}(>2 \mathrm{lb})$
From the total production what amount in TONNES was certified as organic

What is your predicted production in 2018 in TONNES

12 What is the fish holding capacity of the holding units for each site in cubic metres
Tanks
Ponds
c Raceways Cages

## ANNUAL PRODUCTION SURVEY 2017

## GUIDANCE NOTES FOR QUESTIONNAIRE

## Rainbow Trout

## GENERAL NOTES

1. Please check that the pre-printed information on the sheet is correct.
2. If a site is inactive and not part of a fallowing cycle, please write "INACTIVE" after the site name.
3. When completing the boxes please start from the right, if NONE then enter a zero in right hand box eg

Hopefully all questions are self-explanatory but you may wish to note that:
Q1. How many staff
a Please give the total number of full and part-time workers employed by the company in rainbow trout production
b Please ensure that the same staff are NOT included more than once if the company/business operates more than one site
c Staff employed solely in processing dead fish for marketing should NOT be included

## Q2. Accreditation Schemes

Please include membership to trade associations, quality schemes or organic certification schemes.

## Q3. Ova laid down for hatching

Give the TOTAL NUMBER of ova laid down, if the number exceeds six figures please indicate the total number clearly in margin beside the appropriate box - this also applies to questions 3-5
Ova from abroad- Northern Hemisphere includes those from Northern Ireland and Isle of Man.

## Q8-9. Weight of fish sold for:

Please record the weight of fish sold to the nearest tonne (not in kgs), for part tonnes please indicate strongly using a decimal point, eg 31.5

## Q12. Fish Holding Capacity

Please enter the total cubic metre capacity for each type of production unit

It will be appreciated if the questionnaires are returned promptly and not later than 31 January 2018 to allow the Annual Survey Report for 2017 to be produced.

## ANNUAL RETURN of INFORMATION FROM SCOTTISH FISH FARMS FOR THE PERIOD 1 JANUARY to 31 DECEMBER 2017 <br> ATLANTIC SALMON - SMOLT DATA

Please complete and return by 31 January 2018 to L A Munro, Marine Scotland Science 375 Victoria Road, Aberdeen, AB11 9DB

3 How many ova were produced in the winter of 2016-2017 (company total)

How many eyed ova were laid down for hatching in winter of 2016-2017
$B$ wild broodstock
d From foreign sources

How many eyed ova do you expect to hatch this winter (2017-2018)

How many fry or parr were
a Transferred into the site
b Transferred out of the site

7 How many smolts were produced as
a $\quad \mathbf{S}^{1} /{ }_{2} \mathbf{s}$ (ie from 2017 hatch)
b $\quad \mathbf{S 1 s}$ (ie from 2016 hatch)
c $\quad \mathbf{S} 1 \frac{1}{2} \mathbf{s}$ or $\mathbf{S 2 s}$ (ie from 2016 or 2015 hatch)

How many smolts were sold as
S1s (incl S ${ }^{1} / 2 \mathrm{~s}$ )
S2s (incl S1 $1 \frac{1}{2} \mathrm{~s}$ )

9 How many smolts do you expect to produce for sea winter on-growing in 2018 as
S1s (incl S $1 / 2$ s)
b $\quad \mathbf{S 2 s}($ incl S1 $1 / 2 \mathrm{~s})$

How many smolts do you plan to produce in 2019

What is the current fish holding capacity of each site in cubic metres

Duration of FALLOW PERIOD in WEEKS (cage sites; MAX = 52)

13 How many fish did you vaccinate
a against furunculosis
b against ERM
c against IPN
d against Vibrio spp.
e against SAV

## ANNUAL PRODUCTION SURVEY 2017

## GUIDANCE NOTES FOR QUESTIONNAIRE

## Atlantic Salmon Smolts

## GENERAL NOTES

1. Please check that the pre-printed information on the sheet is correct.
2. If a site is inactive and not part of a fallowing cycle, please write "INACTIVE" after the site name.
3. When completing the boxes please start from the right, if NONE then enter a zero in right hand box eg
4. If the numbers for any box exceeds 6 figures please indicate the total number clearly in margin beside the appropriate box

Hopefully all questions are self explanatory but you may wish to note that:

## Q1. How many staff

Please enter the total number of full and part-time staff employed in smolt production, this includes maintenance staff and staff seasonally employed for specific purposes, eg vaccination - please indicate clearly if you have contracted out vaccinating work to avoid duplication in numbers

Please ensure that the same staff are NOT included more than once if your company operates more than one site, especially for companies which operate both smolt and salmon grower sites

Companies are asked to use their discretion as to what they class as full and part-time staff

## Q2. Accreditation Schemes

Please include membership to trade associations, quality schemes or organic certification schemes.

## Q3. Number of ova produced

Enter the total number of ova produced by the company only once, if more than one form is used please enter zero or score out on subsequent forms

Q7. How many smolts produced as $\mathbf{S} 1 / 2$ or $\mathbf{S} 1$ etc

The definitions used for the survey are:
$S^{1} / 2<12$ months old, ie put to sea in year of hatch
S1 12-18 months old, ie put to sea in January-June in year post hatch
S1 $1 / 2$ 19-24 months old, ie put to sea in July-December in year post hatch
S2 >24 months old when put to sea

Q8. For S1s - combine numbers of $S^{1} / 2 s$ with $S 1 s$ and
Q9. $\}$ For S 2 s - combine numbers of $\mathrm{S} 1{ }^{1} / 2 \mathrm{~s}$ with S 2 s

Q10. Enter here the total number of smolts (any stage) likely to be produced
Q11. Please enter the total cubic metre capacity for all tanks or cages combined
Q12. Fallow period - applies to cage sites only
Please enter any weeks that the site was fallow in 2017 (maximum = 52)
It will be appreciated if the questionnaires are returned promptly and not later than 31 January 2018 to allow the Annual Survey Report for 2017 to be produced.

# ANNUAL RETURN OF INFORMATION FROM SCOTTISH FISH FARMS <br> FOR THE PERIOD 1 JANUARY TO 31 DECEMBER 2017 <br> ATLANTIC SALMON - PRODUCTION DATA <br> Please complete and return by 31 January 2018 to L A Munro, Marine Scotland Science 375 Victoria Road, Aberdeen, AB11 9DB 

Business No: in 2017 as:
a $\quad \mathbf{S}^{1} /{ }_{2} \mathbf{S}$ (ie from 2017 hatch)
b $\quad \mathbf{S} 1 \mathbf{s}$ (ie from 2016 hatch)
c $\quad \mathbf{S} 1 \frac{1}{2} \mathbf{2}$ or $\mathbf{S 2 s}$ (ie from 2016 or 2015 hatch)

6 HARVEST of 2017 SMOLT INPUT in 2017
a Number of tonnes (wet weight at harvest)
b Number of fish
7 HARVEST of 2016 SMOLT INPUT from 1 JANUARY to 31 AUGUST

8 HARVEST of 2016 SMOLT INPUT from 1 SEPTEMBER to 31 DECEMBER
a Number of tonnes (wet weight at harvest)
b Number of fish

HARVEST of 2015 SMOLT INPUT
a Number of tonnes (wet weight at harvest)
b Number of fish

10 From the total production what amount in TONNES was certified as organic

11 How many tonnes of fish do you expect to harvest in 2018

BROODSTOCK PRODUCTION
production (company total), excluding post-harvest processing staff

How many of above came from England Number of tonnes (wet weight at harvest) Number of fish
 Were brood fish produced in 20 How many fish were stripped

What is the current fish holding capacity of each site in cubic metres Duration of FALLOW PERIOD in WEEKS (cage sites; MAX = 52)

## ANNUAL PRODUCTION SURVEY 2017

## gUIDANCE NOTES FOR QUESTIONNAIRE

## Atlantic Salmon

## GENERAL NOTES

1. Please check that the pre-printed information on the sheet is correct.
2. If a site is inactive and not part of a fallowing cycle, please enter "INACTIVE" after the site name.
3. All harvest tonnages should be supplied for the wet weight of fish at harvest.
4. If a site was used only to hold broodstock for stripping please enter "BRD" after the site name.
5. When completing the boxes please start from the right eg for 250 tonnes enter
as $\square$ or if NONE then enter as $\qquad$

Hopefully all questions are self-explanatory but you should note that:

## Q1. How many staff

Please enter the total number of full and part-time workers employed in salmon production; this includes site staff, veterinary and maintenance staff, vaccination teams, administrative and harvesting staff but NOT processing or marketing staff

Please ensure that the same staff are NOT included more than once if the company operates more than one site, especially if your company operates both salmon grower and smolt sites.

Q2. Accreditation Schemes

Please include membership to trade associations, quality schemes or organic certification schemes.
Q3. How many smolts put to sea
The definitions used for the survey are:
$\mathrm{S}^{1} 1_{2}<12$ months old, ie put to sea in year of hatch
S1 $\quad$ 12-18 months old, ie put to sea in January-June in the year post hatch
S1 $1 / 2$ 19-24 months old, ie put to sea in July-December in the year post hatch
S2 $\mathbf{> 2 4}$ months old, ie when put to sea

## Q12. Broodstock production

Please circle YES if broodfish were produced on the site

## Q13. Fish holding capacity

Please enter the total cubic metre capacity for all tanks and cages combined or, if not known, give the size of tanks or cages (area or circumference plus depth x nos tanks or cages)

## Q14. Fallow period

For cage sites only; please enter any number of weeks a site was fallow in 2017; the total number of fallow weeks should not exceed 52

## Q15. Conversion Factor

Please enter the value used to convert gutted weights to wet weight at harvest (i.e. weight of live fish)
It will be appreciated if the questionnaires are returned promptly and not later than 31 January 2018 to allow the Annual Survey Report for 2017 to be produced.

# ANNUAL RETURN OF INFORMATION FROM SCOTTISH FISH FARMS FOR THE PERIOD 1 JANUARY To 31 DECEMBER 2017 OTHER SPECIES - DATA <br> Please complete and return by 31 January 2018 to L A Munro, Marine Scotland Science 375 Victoria Road, Aberdeen, AB11 9DB 

Business No:

1 How many staff were employed in other species production (company total)

Part time male Part time female

2 Please detail any accreditation schemes this company is a member of: $\qquad$

3 How many eyed ova were laid down for hatching in 2017
a from own broodstock
b from other GB broodstock
c from foreign sources

4 How many fry/small fish were
a bought
b sold

5 What was your total production for the market
a Number of tonnes
b Number of fish

6 From this production what amount in TONNES was certified as organic

7 What is your predicted
production for the market in
2018
a Number of tonnes
b Number of fish

8 What is the holding capacity of the holding units for each site in cubic metres
a Tanks
b Ponds
c Raceways
d Cages

## ANNUAL PRODUCTION SURVEY 2017

## GUIDANCE NOTES FOR QUESTIONNAIRE

## OTHER SPECIES

## general notes

1. Please check that the pre-printed information on the sheet is correct.
2. If a site is inactive and not part of a fallowing cycle, or is no longer used to culture the species concerned, please score through the relevant site or species code.
3. When completing the boxes please start from the right, if NONE then enter a zero in right hand box eg

## Q1. How many staff

Please include those staff that were involved only in other species production. Please do not include staff that are involved in the production of Atlantic salmon or rainbow trout.

## Q2. Accreditation Schemes

Please include membership to trade associations, quality schemes or organic certification schemes.

## Q5-7. Weight of fish sold

Please record the wet weight of fish sold to the nearest tonne (not in kgs), for part tonnes please indicate strongly using a decimal point, e.g. 31.5

It will be appreciated if the questionnaires are returned promptly and not later than 31 January 2018 to allow the Annual Survey Report for 2017 to be produced.

Pre-salmon

Fish farms in a production growing cycle which may contain stock or be fallow.

Young fish, at stage from hatching to end of dependence on yolk sacs as primary source of nutrition.

Adult fish held until maturation for breeding purposes.
Fish with the normal two sets of chromosomes.
European Economic Area.
European Free Trade Association.
Enteric redmouth disease.
European Union.
Fish egg(s) at the stage of development when the heavily pigmented eyes of the embryo are sufficiently developed to be clearly visible.

Fish farm having no stock, but still part of a growing cycle.
A term commonly applied to young stages of salmonid fish.
The life stage of a young salmon from independence of the yolk sac as the primary source of nutrition to dispersal from the redd.

Reproductive cells.
Salmon harvested between $1^{\text {st }}$ January and $31^{\text {st }}$ August after one winter at sea.

Within the body cavity.
Infectious pancreatic necrosis.
A site which is active, may be stocked with fish, but has not produced any fish for harvest during the specified year.

Farm producing fish for the table market.
Eggs.
Fish in their first year of life.
Marine Scotland Science.
Young salmon at stage from dispersal from redd to migration as a smolt.

Alteration of the daylight regime.
Salmon harvested between $1^{\text {st }}$ September and 31 ${ }^{\text {st }}$ December after one winter at sea.

Raceway Concrete or brick channels used for farming fish.

SAV Salmonid alphavirus.

S 1 1 2
Salmon or sea trout smolting at approximately six months from hatch (usually by photoperiod and/or temperature manipulation).

S1½
S2

Smolt

Third Country

Triploid

Year class

S1 Salmon or sea trout smolting at approximately one year from hatch.
Salmon or sea trout smolting at approximately 18 months from hatch.
Salmon or sea trout smolting at approximately two years from hatch. Fully silvered juvenile salmon or sea trout ready to be transferred or to migrate to sea.

Country outside the EU except Norway and Iceland.
Triploid fish are sterile fish which have three sets of chromosomes, unlike a fertile fish that have two sets of chromosomes (diploid).

Fish hatched or put to sea in a given year.

Published by The Scottish Government, October 2018

[^0]:    * The survival of the 2008 smolt input in the South West is over $100 \%$ due to the practice of putting smolts to sea in one region and subsequently moving them to another sea water site in another region for harvest.

[^1]:    *Estimated production for 2018.
